"This book offers an empirically grounded theory that reframes the study of law and society from a predominantly national context, which dichotomizes the study of international law and national compliance into a dynamic perspective that places national, international, and transnational lawmaking and practice within a coherent single frame. By presenting and elaborating on a new concept, transnational legal orders it offers an original approach to the emergence of legal orders beyond nation-states. It shows how they originate, where they compete and cooperate, and how they settle on institutions that legally order fundamental economic and social behaviors that transcend national borders. This original theory is applied and developed by distinguished scholars from North America and Europe in business law, regulatory law and human rights"--

The last two decades have witnessed the growth of new forms of entrepreneurial cooperation such as dynamic networks like virtual enterprises and enterprise pools. These business forms are often hybrid, having elements of both contract-based organizations and corporate forms, in particular partnership. This book examines the relative utility of contract and partnership law in fostering and maintaining these emerging business models, focusing on dynamic networks. The book analyses how dynamic networks are organized and set up through, very often, collaborative contracts and how the behaviour of their member firms is regulated. Good faith and fair dealing as a behavioural criterion in contractual and partnership relations, is an important theme of this work. The background and preconditions for the emergence and growth of such business forms is also investigated. The book contains case studies of such networks from different countries in particular Germany, Austria, Switzerland, England and Norway. It examines relevant legal rules in a number of jurisdictions such as England, Norway, Germany, Italy, France and the US. This detailed book will appeal to postgraduate students and academics in the fields of contract law, comparative law, partnership law and business/commercial law.
