## **NATHANIEL DASHAWN**

*Collection Of  
World's Best  
Mystery And  
Detective  
Stories*  
Independently  
Published  
Human  
Development  
It offers an  
overview of a  
wide range of  
contemporary  
issues in  
education and  
society,  
including  
emotional  
intelligence;  
various  
models of  
education;  
family,  
leadership;  
experiential

learning;  
personal  
development;  
recreational  
activities; the  
arts;  
philosophy;  
music; and  
media. These  
topics are all  
currently  
subject to  
research and  
debate, but  
have been  
prevalent  
throughout  
history,  
impacting on  
different  
fields,  
including  
education,  
communicatio  
n, and health.  
It is vital to  
understand  
these topics in  
order to live in  
a society in  
which one  
must interact

with other  
people and  
regulate one's  
emotions. All  
the  
contributors to  
this volume  
investigate  
and discuss  
how these  
issues affect  
society in  
general,  
reflecting on  
the causes of  
the  
functioning of  
the world. All  
chapters in  
this book  
provide a full  
and clear  
frame of  
reference for  
several  
problems,  
issues and  
disciplines  
discussed  
here, offering  
professional  
and

experienced insights from a range of disciplines including psychology and arts. As such, this book represents a highly useful and contemporary manual for both students and the general public interested in the social sciences. The Black Mirror and Other Stories DigiCat Science Fiction and Fantasy Literature, A Checklist, 1700-1974, Volume one of Two, contains

an Author Index, Title Index, Series Index, Awards Index, and the Ace and Belmont Doubles Index. **Distant Worlds** NYU Press 18 year old Paul, his mother and his sister land on Altair-4, a recently established human colony. They expect to be reunited with Paul's father there and start a new life, but he doesn't show up to welcome them at the spaceport... Later, they are

rescued from a gang of thugs by a Stepanerk, a member of a sentient alien species. An encounter that will prove invaluable to Paul when he decides to go and look for his father... Distant Worlds Fredonia Books (NL) Describes the present status of settlement planets that have won a place in the Federation at great cost in lives and effort. *A History of the Family: Distant worlds, ancient worlds*

PRABIR RAI  
CHAUDHURI  
When this  
book was  
originally  
published in  
the Soviet  
Union in 1957  
- the year  
Sputnik was  
launched - the  
author said:  
"The youth  
throughout  
the world  
have been  
manifesting a  
great interest  
in the problem  
of space  
travel. This  
interest has  
long since  
ceased to be a  
question of  
idle curiosity:  
'Is space  
travel  
possible?'  
Every pupil  
now knows  
the answer to

this question.  
"The interest  
of our young  
people in the  
problem of  
space travel  
has assumed  
quite concrete  
form. They  
want to know  
what  
interplanetary  
flights are  
possible  
today, at the  
present level  
of scientific  
and technical  
development,  
they want to  
know what  
achievements  
have been  
attained in the  
development  
of remarkable  
reaction  
engines,  
which will be  
the vital part  
of any  
interplanetary

vessel. These  
young people  
question the  
astronomers  
about the  
routes of  
future cosmic  
flights. They  
question the  
doctors about  
the specific  
effects of  
space travel  
on the human  
organism.  
They are  
interested in  
the possibility  
of a collision  
between a  
space ship  
and meteors,  
in the  
possibility of  
using artificial  
satellites of  
the Earth and  
in many other  
things. "In a  
few words, our  
youth are  
keenly

interested in all the problems covered by the science of space travel. This science has already developed to such an extent, especially during the past decade, that it is impossible even to attempt any detailed account of its achievements in any one book."

*Odes to the Multiverse*  
Sterling Publishing Company, Inc.  
From the big bang to meteor showers, from

moon phases to solar eclipses, this wonderfully lively introduction to astronomy is like an armchair rocket ship flying kids to the stars. Remarkably clear explanations of scientific concepts, enticing photos and illustrations, fascinating fun facts, and enjoyable activities make this book truly stellar.

*THE GOLDEN BOOK OF WORLD'S GREATEST MYSTERIES -*

*60+ Detective Stories* Simon and Schuster  
Punk sci-fi, space opera, horror & urban fantasy vignettes and short stories featuring cosmic tales of distant worlds and strange futures where earthbound horrors unfold. This omnibus invites you to marvel at the macabre and maleficent; and embrace the weird and wonderful.

**The Golden Book of Greatest Mysteries - 60+ Whodunit**

## Tales & Detective Stories

Infobase Publishing At The Publishing Room, we believe in new and emerging writers. Because of this, we decided to hold a Fantasy Short Story Contest and select the ten best stories. We have compiled these stories into one brilliant anthology that will keep you wanting more. If you are a fan of Game of Thrones, Harry Potter or Westworld,

you will love this book! *Innovations in Narrative and Metaphor* Good Press At the close of the nineteenth century, American youths developed a growing interest in electricity and its applications, machines, and gadgetry. When authors and publishers recognized the extent of this interest in technology, they sought to create reading materials that would meet this market need. The result was

science fiction written especially for young adults. While critics tended to neglect young adult science fiction for decades, they gradually came to recognize its practical and cultural value. Science fiction inspired many young adults to study science and engineering and helped foster technological innovation. At the same time, these works also explored cultural and social concerns

more commonly associated with serious literature. Nor was young adult science fiction a peculiarly American phenomenon: authors in other countries likewise wrote science fiction for young adult readers. This book examines young adult science fiction in the U.S. and several other countries and explores issues central to the genre. The first part of the book treats the larger

contexts of young adult science fiction and includes chapters on its history and development. Included are discussions of science fiction for young adults in the U.S. and in Canada, Great Britain, Germany, and Australia. These chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present. The second section of the

book considers topics of special interest to young adult science fiction. Some of the chapters look at particular forms and expressions of science fiction, such as films and comic books. Others treat particular topics, such as the portrayal of women in Robert Heinlein's works and representation of war in young adult science fiction. Yet another chapter

studies the young adult science fiction novel as a coming-of-age story and thus helps distinguish the genre from science fiction written for adult readers. All chapters reflect current research, and the volume concludes with extensive bibliographies.

**Young Adult Science Fiction**

VolumesOfValue  
Arab Voices in Diaspora offers a wide-ranging overview and an insightful study of the field of

anglophone Arab literature produced across the world. The first of its kind, it chronicles the development of this literature from its inception at the turn of the past century until the post 9/11 era. The book sheds light not only on the historical but also on the cultural and aesthetic value of this literary production, which has so far received little scholarly attention. It also seeks to place

anglophone Arab literary works within the larger nomenclature of postcolonial, emerging, and ethnic literature, as it finds that the authors are haunted by the same 'hybrid', 'exilic', and 'diasporic' questions that have dogged their fellow postcolonialists. Issues of belonging, loyalty, and affinity are recognized and dealt with in the various essays, as are the various concerns involved in

cultural and relational identification. The contributors to this volume come from different national backgrounds and share in examining the nuances of this emerging literature. Authors discussed include Elmaz Abinader, Diana Abu-Jaber, Leila Aboulela, Leila Ahmed, Rabih Alameddine, Edward Atiyah, Shaw Dallal, Ibrahim Fawal, Fadia Faqir, Khalil Gibran, Suheir Hammad, Loubna Haikal, Nada Awar Jarrar, Jad El Hage, Lawrence Joseph, Mohja Kahf, Jamal Mahjoub, Hisham Matar, Dunya Mikhail, Samia Serageldine, Naomi Shihab Nye, Ameen Rihani, Mona Simpson, Ahdaf Soueif, and Cecile Yazbak. Contributors: Victoria M. Abboud, Diya M. Abdo, Samaa Abdurraqib, Marta Cariello, Carol Fadda-Conrey, Cristina Garrigós, Lamia Hammad, Yasmeen Hanoosh, Wail S. Hassan, Richard E. Hishmeh, Syrine Hout, Layla Al Maleh, Brinda J. Mehta, Dawn Mirapuri, Geoffrey P. Nash, Boulus Sarru, Fadia Fayez Suyoufie

**Beacons**  
Cinebook  
Handsomely equipped with a comprehensive introductory historical essay, editor's notes and selected bibliography, this distinguished anthology is a model of genre

<p>research. These previously untranslated stories, published from 1871 onward, offer reading virtually unknown to most American (and many German) readers. Some authors combine scientific and philosophical issues, like Kurd Lasswitz in his witty tale "To the Absolute Zero of Existence: A Story from 2371," while others, as in Erik Simon's 1983 title story, pose</p>	<p>psychological puzzles involving alien phenomena. Though the earlier stories in particular demand painstaking reading, all of them repay it with rewarding insights into German and Austrian culture and the many possible uses and misuses of science. <i>Library of the World's Best Mystery and Detective Stories</i> Bloomsbury Publishing USA Excerpt from The Story of the Stars: New</p>	<p>Descriptive Astronomy Believing that Natural Science is full of fascination, the author has sought to weave the story of those far-distant worlds into a form that may attract the attention and kindle the enthusiasm of the pupil. This work is not written for the information of scientific men, but for the inspiration of youth. About the Publisher Forgotten Books publishes hundreds of thousands of rare and</p>

classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in

our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. *The Stories of Rabbi Nachman of Breslov and Saba Yisroel* Cinebook This book pursues an interdisciplinary approach to open a discourse on innovative methodologies and practices

associated with narrative and metaphor. Scholars from diverse fields in the humanities and social sciences report on how they use narrative and/or metaphor in their scholarship/research to arrive at new ways of seeing, thinking about and acting in the world. The book provides a range of methodological chapters for academics and practitioners alike. Each chapter

discusses various aspects of the author's transformative methodologies and practices and how they contribute to the lives of others in their field. In this regard, the authors address traditional disciplines such as history and geography, as well as professional practices such as counselling, teaching and community work.

*Human Development II*  
CreateSpace  
The Stepanerks,

those strange aliens who The Stepanerks, those strange aliens who sometimes mingle with Humans, have contacted another, as yet undiscovered, alien species that has been guarding Altair for centuries. Those guardians want to forcefully evict Humans, who are doing terrible damage to the ecosystem. But Paul, unwitting 'guest' at their meeting, defended Humanity's

right to a second chance. It now falls to him to convince the Human colonial authorities to change everyone's behaviour...

**Travel to Distant Worlds** Kent State University Press  
A Kepler's Dozen presents thirteen action-packed, mysterious, and humorous stories all based on real planets discovered by the NASA Kepler mission.  
Edited by and

contributing stories are David Lee Summers, editor of Tales of the Talisman Magazine, and Steve B. Howell, project scientist for the Kepler mission. Whether on a prison colony, in a fast escape from the authorities, or encircling a binary star, these exoplanet stories will amuse, frighten, and intrigue you while you share fantasy adventures among

Kepler's real-life planets. *Settlers in Space* Wesleyan University Press An incredible collection of stories for our shared planet from the likes of Joanne Harris, Toby Litt and Liz Jensen A riveting and provocative collection of short fiction, *Beacons* throws down the gauntlet to award-winning writers, challenging them to devise original responses to the climate crisis. From

Joanne Harris' cautionary tale of a world where 'outside' has become a thing of the past, to Nick Hayes' graphic depiction of the primeval bond between man and nature, each story thrills the senses as it attempts to make sense of a world warping into something unfamiliar. Original, eclectic, and inventive, *Beacons* warns and inspires by offering stories that are as various

as our possible futures. All author royalties will go to the Stop Climate Chaos Coalition. The Story of the Stars Forgotten Books The authors, Paul V. Adams, Lily Hwa, Erick D. Langer, Peter N. Stearns, and Merry Wiesner-Hanks, present a chronological framework of world history in terms of its impact on society in Asia, Africa, Europe, the Americas, and the Pacific.

**Distant Worlds - Episode 3** Wildside Press LLC The story of unmanned space exploration, from Viking to today Dreams of Other Worlds describes the unmanned space missions that have opened new windows on distant worlds. Spanning four decades of dramatic advances in astronomy and planetary science, this book tells the story of eleven iconic exploratory

missions and how they have fundamentally transformed our scientific and cultural perspectives on the universe and our place in it. The journey begins with the Viking and Mars Exploration Rover missions to Mars, which paint a startling picture of a planet at the cusp of habitability. It then moves into the realm of the gas giants with the Voyager probes and Cassini's ongoing

exploration of the moons of Saturn. The Stardust probe's dramatic round-trip encounter with a comet is brought vividly to life, as are the SOHO and Hipparcos missions to study the Sun and Milky Way. This stunningly illustrated book also explores how our view of the universe has been brought into sharp focus by NASA's great observatories—Spitzer, Chandra, and Hubble—and

how the WMAP mission has provided rare glimpses of the dawn of creation. Dreams of Other Worlds reveals how these unmanned exploratory missions have redefined what it means to be the temporary tenants of a small planet in a vast cosmos. **Of Distant Worlds** BRILL Detective stories are a uniquely thrilling genre. You get to follow your curiosity by solving a puzzle

alongside the sleuth, slowly unraveling a mystery until you find the truth. There are so many fantastic detective novels and stories that it's hard to choose a list of favorites, but we've done our best to identify the ones that have truly become staples of the crime fiction genre. In this article, we've compiled our list of the best detective books and mystery series of all time. Happy reading! Best

Detective and Mystery Stories Let's start with our picks for the best standalone detective stories. Many stories on this list are part of a series, but we've only included stories that you can enjoy on their own—either the first story in a series, or a later in a series that

you don't need to read in chronological order. A Kepler's Dozen Simcha Nanach Abandoned amidst a hostile wilderness, Paul has been rescued by a biologist, Mr Amid. The scientist is studying the pearls that are Altair's true wealth - and more particularly

the plants that produce them and that appear to be dying off. Amid offers to take on Paul as his assistant, but the young man is still looking for his father. As he follows the trail, Paul becomes tougher and more inured to life on his new planet - and to human nature.
