STEWART ARELY

Buffalo Woman Comes Singing Grand Central Publishing
 SECOND EDITION This book is a beautiful synthesis of Marlow's decades of internal cultivation and study of the Five Element system of medicine. This is most poignantly illustrated by her inclusion of the works from her students. Chinese medicine has always been a collective endeavor. For thousands of years, human beings have drawn upon a deep desire to know themselves and how to apply those discoveries to the process of healing. This is how Chinese medicine evolves and grows to continuously meet the needs of the

current era. The sign of a wise and cultivated teacher, in my opinion, is one who creates spaces for his or her students to discover their own wisdom in ways that vitalize and perpetually transform the field of medicine. In this endeavor, Chinese medicine continues to evolve through the eager hearts of empowered leaders. The multiplicity of voices forms a larger melody that contains a kind of beauty, elegance, and potency only available through collective expression. This book is an exquisite example of a collective offering that will add to the development of Chinese medicine as a healing art.-Alexander LoveM. Ac., Acupuncturist & Coach, Professor, Academy for Five Element Acupuncture, Associate Professor, Southwest

Acupuncture College Marlow Brooks has taught Five Element Plant Spirit Healing to students at Naropa University in Boulder, CO for twenty years. Singing Our Heart's Song includes the fresh and lively voices of students from as far back as 1998, woven together by a thread of Marlow's voice and her artwork. May it open doors to a new way of knowing and being human, and provide a path for greater transformation within ourselves and our community.

Women's Work, Women's Poverty

Ballantine Books
 From "one of the nation's foremost Chicano literary artists" comes a coming-of-age classic and the bestselling Chicano novel of all time that follows a young boy as he questions his faith and beliefs -- now one of PBS's

"100 Great American Reads" (Denver Post). Antonio Marez is six years old when Ultima comes to stay with his family in New Mexico. She is a curandera, one who cures with herbs and magic. Under her wise wing, Tony will probe the family ties that bind and rend him, and he will discover himself in the magical secrets of the pagan past--a mythic legacy as palpable as the Catholicism of Latin America. And at each life turn there is Ultima, who delivered Tony into the world... and will nurture the birth of his soul.

Singing to the Plants

Turtleback

In the Upper Amazon, mestizos are the Spanish-speaking descendants of Hispanic colonizers and the indigenous peoples of

the jungle. Some mestizos have migrated to Amazon towns and cities, such as Iquitos and Pucallpa; most remain in small villages. They have retained features of a folk Catholicism and traditional Hispanic medicine, and have incorporated much of the religious tradition of the Amazon, especially its healing, sorcery, shamanism, and the use of potent plant hallucinogens, including ayahuasca. The result is a uniquely eclectic shamanist culture that continues to fascinate outsiders with its brilliant visionary art. Ayahuasca shamanism is now part of global culture. Once the terrain of anthropologists, it is now the subject of novels and spiritual memoirs, while ayahuasca shamans perform their healing rituals in Ontario and Wisconsin. Singing to the Plants sets forth just what this shamanism is about--what happens at an ayahuasca healing ceremony, how the apprentice shaman forms a spiritual relationship with the healing plant spirits, how sorcerers inflict the harm that the shaman heals, and the ways that plants are used in healing, love magic, and sorcery.

 Publisher Introduction
 Nobody knows when the
 attractive Woodland plant
 known to the world as
 strawberries decided to
 leave the edges of the
 wood lands and invade
 the gardens of human
 beings. But one is grateful
 that this is one plant
 which was allowed to
 grow and flourish in the
 gardens, instead of being
 considered to be just
 another weed, which had
 this habit of taking over
 large coppices, which
 were rich in natural
 humus. This very popular
 fruit, cultivated globally is
 now known as the garden
 or just a strawberry. It
 belongs to the *Fragaria*
 genus of plants, which is
 made up of other fruits
 which are not berries, but
 are a number of
 aggregate fruits. Thanks
 to its very attractive red
 and bright color,
 strawberry aroma,
 sweetness and juicy

flavor, is it a surprise that
 there is no fruit like the
 strawberry for adding
 style and distinction to
 your garden patch. Just
 imagine ice creams, fruit
 juice, milkshakes,
 chocolates and pies,
 which have not been
 flavored with the delicate
 flavor of a strawberry. In
 fact artificially produced
 strawberry flavors are
 used extensively in lip
 glosses, lip balms and
 other beauty products.
 Strawberries, especially
 the Woodland
 strawberries are supposed
 to have originated in
 Europe, because
 references to these sweet
 delicious berries have
 been found in ancient
 Roman classical cuisine.
 They were also used by
 the Romans to cure a
 number of ailments
 related to the skin.
 Crushed strawberries
 were placed under ashes
 and skin problems in
 order to clear and cure
 the skin ailment and to
 make it smooth and
 glowing again. The plant
 was also used to treat
 depression. Strawberry
 growers of the early
 Victorian days used to
 take a great delight in
 digging up large coppices
 in the wood lands. These
 lands were rich in natural
 fertilizer, especially
 organic fertilizer, humus,

and a well fertilized soil
 too. These lands were
 then allowed to be
 overrun with strawberries.
 When people got to know
 in the medieval ages that
 all you had to do was go
 into the woods, cut some
 strawberry runners and
 plant them in your plot of
 land, and they would grow
 and bear fruit, this fruit
 began to be more and
 more popular both with
 gardeners and with
 farmers.

Singing for the Dead
 chronicles ethnic revival
 in Oaxaca, Mexico, where
 new forms of singing and
 writing in the local
 Mazatec indigenous
 language are producing
 powerful, transformative
 political effects. Paja
 Faudree argues for the
 inclusion of singing as a
 necessary component in
 the polarized debates
 about indigenous orality
 and literacy, and she
 considers how the
 coupling of literacy and

song has allowed people from the region to create texts of enduring social resonance. She examines how local young people are learning to read and write in Mazatec as a result of the region's new Day of the Dead song contest. Faudree also studies how tourist interest in local psychedelic mushrooms has led to their commodification, producing both opportunities and challenges for songwriters and others who represent Mazatec culture. She situates these revival movements within the contexts of Mexico and Latin America, as well as the broad, hemisphere-wide movement to create indigenous literatures. *Singing for the Dead* provides a new way to think about the politics of ethnicity, the success of social movements, and the limits of national belonging.

Stan the Plant-eater

South End Press

Barbara Kingsolver's acclaimed international bestseller tells the story of an American missionary family in the Congo during a poignant chapter in African history. It spins the tale of the fierce evangelical Baptist, Nathan Price, who takes

his wife and four daughters on a missionary journey into the heart of darkness of the Belgian Congo in 1959. They carry with them to Africa all they believe they will need from home, but soon find that all of it - from garden seeds to the King James Bible - is calamitously transformed on African soil. Told from the perspective of the five women, this is a compelling exploration of African history, religion, family, and the many paths to redemption. The *Poisonwood Bible* was nominated for the Pulitzer Prize in 1999 and was chosen as the best reading group novel ever at the Penguin/Orange Awards. It continues to be read and adored by millions worldwide.

Singing Grass, Burning Sage Penguin

As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and

animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on "a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise" (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return. *How's the Weather in Winter?* Faber & Faber From legendary playwright August Wilson

comes the powerful, stunning dramatic bestseller that won him critical acclaim, including the Tony Award for Best Play and the Pulitzer Prize. Troy Maxson is a strong man, a hard man. He has had to be to survive. Troy Maxson has gone through life in an America where to be proud and black is to face pressures that could crush a man, body and soul. But the 1950s are yielding to the new spirit of liberation in the 1960s, a spirit that is changing the world Troy Maxson has learned to deal with the only way he can, a spirit that is making him a stranger, angry and afraid, in a world he never knew and to a wife and son he understands less and less. This is a modern classic, a book that deals with the impossibly difficult themes of race in America, set during the Civil Rights Movement of the 1950s and 60s. Now an Academy Award-winning film directed by and starring Denzel Washington, along with Academy Award and Golden Globe winner Viola Davis. This work seeks to understand this form of shamanism, its relationship to other shamanisms, and its survival in the new global economy, through anthropology, ethnobotany, cognitive psychology, legal history, and personal memoir. "An exhaustively researched and detailed study, unique among its kind and an absolute 'must-have' for college library collections strong in anthropology and information on indigenous religions."--Midwest Book Review
Plant Dreaming Deep Little, Brown Books for Young Readers
'This extraordinarily lucid book demonstrates that women from all walks of

life get the short end of the stick because of their gender. From welfare mothers to corporate executives, Albelda and Tilly show and why the powers-that-be benefit from scapegoating and marginalizing women.' Professor Mimi Abramowitz, author, *Regulating the Lives of Women* A cogent analysis of the economic and social realities for women in the United States, across class lines. In an age when the right wing manipulates the dialogue around women's issues to separate middle- and upper-class women from their poorer sisters this book's facts, figures, and analysis provide a much needed antidote.

Silent Singing Whitecap Books Limited

*Carrion crows in the Japanese city of Sendai have learned to use passing traffic to crack nuts. *Lizards in Puerto Rico are evolving feet that better grip surfaces like concrete. *Europe's urban blackbirds sing at a higher pitch than their rural cousins, to be heard over the din of traffic. How is this happening? Menno Schilthuizen is one of a growing number of "urban ecologists" studying how our manmade environments are

accelerating and changing the evolution of the animals and plants around us. In *Darwin Comes to Town*, he takes us around the world for an up-close look at just how stunningly flexible and swift-moving natural selection can be. With human populations growing, we're having an increasing impact on global ecosystems, and nowhere do these impacts overlap as much as they do in cities. The urban environment is about as extreme as it gets, and the wild animals and plants that live side-by-side with us need to adapt to a whole suite of challenging conditions: they must manage in the city's hotter climate (the "urban heat island"); they need to be able to live either in the semidesert of the tall, rocky, and cavernous structures we call buildings or in the pocket-like oases of city parks (which pose their own dangers, including smog and free-ranging dogs and cats); traffic causes continuous noise, a mist of fine dust particles, and barriers to movement for any animal that cannot fly or burrow; food sources are mainly human-derived. And yet, as Schilthuizen shows, the wildlife sharing these

spaces with us is not just surviving, but evolving ways of thriving. *Darwin Comes to Town* draws on eye-popping examples of adaptation to share a stunning vision of urban evolution in which humans and wildlife co-exist in a unique harmony. It reveals that evolution can happen far more rapidly than Darwin dreamed, while providing a glimmer of hope that our race toward over population might not take the rest of nature down with us.

The Secret Life of Plants

W. W. Norton & Company

This comprehensive compilation presents the available reports on the medicinal use of Fijian plants in an attractive and readable form using 'everyday' terms as much as possible. The book covers the origin and dispersal of plants, literature, use of medicinal plants within traditional Fijian culture, diseases of Fiji, and medicinal chemicals from plants. Four hundred and fifty plant species are described. The entries for species are arranged by plant family, and give current botanical name, Fijian or local name, brief botanical notes, medicinal uses and chemistry. Separate indexes to plant

species and Fijian names are provided, as well as a glossary of medicinal and

botanical terms. This book may point the way to

plants from which new and effective cures might be obtained.
