Backed by the resources of Independent Feature Project/West, co-authors Nicole Shay LaLoggia and Eden H. Wurmfeld have written the definitive low-budget production manual. Using examples from the Swingers and Kissing Jessica Stein, this comprehensive manual offers the independent filmmaker a single volume reference covering every aspect of making a film: script rights and rewrites, financing, breakdown, scheduling and budgeting, pre-production,

production, postproduction, and distribution. A resource guide listing useful references and organizations, as well as a glossary, complete this guide. The downloadable resources feature interviews with important figures in the independent film industry, including Billy Bob Thornton and Ang Lee. Forms that are illuminated in the text are also included on the downloadable resources for ease of use. The new edition is updated with thorough coverage of

digital and HD-how to decide which to shoot on, what the financial impact is, and the effect on preproduction. There is also a new chapter on distribution and expanded material on postproduction.

In response to a congressional request, GAO examined issues studied and recommendations made by the President's Private Sector Survey on Cost Control, better known as the Grace Commission, to

determine whether: (1) the issues and recommendations made on program management and cost control had merit; (2) legislation would be necessary to implement the recommendations; (3) implementation efforts were completely underway; and (4) the savings estimates were realistic. GAO found that many of the issues studied and recommendations made by the Commission had overall merit and that, while many have already

been implemented by legislative or administrative action, many more require additional legislative action to be fully implemented. However, GAO questioned the accuracy of many of the associated savings estimates, found flaws in the methodology used to develop some of the estimates, and found that the description of the methodology used in some estimates was insufficient to allow an assessment of its validity. In most of the instances

where GAO questioned the methodology used, it believed that the savings were overstated. GAO supported management improvement issues more frequently than policy-oriented issues; however, policy-oriented issues constitute a large portion of the total estimated savings. GAO does not support restructuring federal subsidy programs and fixing federal health care costs to a percentage of the gross national product, and it disagreed with selected aspects of

recommendations to reduce civilian and military retirement benefits. GAO support was most extensive in the areas aimed at strengthening federal management systems, federal automatic data processing operations, federal credit and cash management efforts, and civilian procurement and property management activities. GAO has made similar or related recommendations in nearly half of the areas in which it agreed with the Commission. Additional

legislative action would be necessary to fully implement approximately half of the recommendations analyzed.

The opening of the story vividly follows the author's relocation to

Detroit, Michigan from Seattle, Washington. Munson crosses the plains in his Volvo, pulling his sailboat to his new home in Grosse Pointe, Michigan. He, a teacher, is moving there because his wife, a pathologist has found a new job at Detroit Medical Center. As he drives he reflects on the land he crosses and the experiences he had in school in rural South Dakota and how it shaped his outlook. As he drives, he has great doubts about moving to Michigan and questions his future there.

Yet, he is on the road with no way to turn back. Finally, he arrives in Detroit, entering the rustbelt city that looks like a new planet to him -- poverty stricken, destroyed and hopeless. The scene shifts to his experiences while moving in and getting settled and the adjustments he has to make to live in a large, crime-ridden Midwestern city. After a discouraging job hunt he is suddenly employed by Detroit Public Schools as a chemistry teacher and enters the classroom. The

experience is so incredibly different than anything else that he has previously seen in education that he decides to start keeping a diary of relevant day-to-day activities. Months lead to years and he describes the dynamics of teaching in a inner-city school. Corruption, abysmal administrative incompetence and even great, but not-to-numerous, educational triumphs go down in print. His journal is that of an observer from the outside looking in. The diary

becomes the stream of consciousness of a hard-working, dedicated teacher who is tormented by what he sees and cannot change. There are successes, but the climb is constantly uphill due to administrative bungling, a pathetic lack of supplies and low expectations placed on students by the system. As the years go by, the school is engifted with a huge grant from the Kellogg Foundation. It is supposed to reform the school and result in a turn-around that never happens. Funds

disappear, not very much appears in the classrooms and nobody seems to notice any appreciable difference in the quality of education. After all is spent, there is only disillusionment and anger in the school over the project. A new principal takes over and the school further declines into violence and chaos. Yet, through all of this, Munson finds that education can and does take place in his classroom if he works hard with what he has available and does the

best he can under the worsening circumstances. In the end, his main positive experience is the students themselves, those who could be changed and enabled. After thirteen years in Northern High School, the environment becomes so violent, dangerous, and hopeless that Munson seriously contemplates transferring out to another school. In this last year, he describes a crumbling, lawless school so vividly that you can smell the smoke from the fires and hear the

screams of students beating and being beaten. August 2004 finds Munson in Finney High School, just a bit over a mile from his home. He finds more of the same there, but the commute is at least short. He surprisingly teaches quite successfully there for three years and then on June 22, 2007, he retires from thirty years of public school teaching. On that very same day, Northern High closes its doors due to lack of enrollment. At the end of the day the lights were turned out.

The Complete Idiot's Guide to Being a Smart Landlord

The Sourcebook on the Foundations of Social Protection Delivery Systems synthesizes real-world experiences and lessons learned of social protection delivery systems from around the globe. It takes a broad view of social protection,

covering various intended populations such as poor or low-income families, unemployed workers, persons with disabilities, and individuals facing social risks. It discusses many types of interventions that governments provide to individuals, families, or households, including categorical programs, poverty-targeted programs, labor benefits and services, disability benefits and services, and social services. The Sourcebook seeks to address concrete “how-

to?” questions, including:

- How do countries deliver social protection benefits and services?
- How do they do so effectively and efficiently?
- How do they ensure dynamic inclusion, especially for the most vulnerable and needy?
- How do they promote better coordination and integration—not only among social protection programs but also among programs in other parts of government?
- How can they meet the needs of their intended populations and provide a better client experience? The delivery

systems framework elaborates on the key elements of that operating environment. The framework is anchored in core implementation phases along the delivery chain. Key actors, including people and institutions, interact all along that delivery chain. Those interactions are facilitated by communications, information systems, and technology. This framework can apply to the delivery of one or many programs and to the delivery of adaptive

social protection. The Sourcebook structures itself around eight key principles that can frame the delivery systems mind-set: 1. There is no single blueprint for delivery systems, but there are commonalities, and those common elements constitute the core of the delivery systems framework. 2. Quality of implementation matters, and weaknesses in any of the core elements will negatively affect the entire system, reducing the impacts of the program(s) they

support. 3. Delivery systems evolve over time, in a nonlinear fashion, and their starting points matter. 4. Efforts should be made to “keep it simple?” and to “do simple well,†?” from the start. 5. The “first mile?”—people’s direct interface with administrative functions—is often the weakest link in the delivery chain; improving it may take systemic change but will greatly improve overall efficiencies and mitigate the risk of failures on the

frontlines. 6. Social protection programs do not operate in a vacuum, and thus their delivery systems should not be developed in silos; synergies across institutions and information systems are possible and can improve program outcomes. 7. Social protection delivery systems can contribute more broadly to government's ability to serve other sectors, such as health insurance subsidies, scholarships, social energy tariffs, housing benefits, and

legal services. 8. The dual challenges of inclusion and coordination are pervasive and perennial and encourage the continuous improvement of delivery systems, through a dynamic, integrated, and human-centered approach.
