A red tail hawk and his mate build their nest near the top of a Fifth Avenue apartment building and bird watchers gather hoping to see the chicks in the nest.

Red Foxes
Univ. of Queensland Press
Every autumn, thousands of migrating Red-tailed Hawks arrive on the southern

Great Plains to spend the winter, and Oklahoma is one of the best places to observe this amazing phenomenon. Above the prairie, as Oscar Hammerstein wrote, they make "lazy circles in the sky," but not for entertainment, theirs or ours. Author Jim Lish draws on more than forty years' experience as a professional biologist and ornithologist to present almost two hundred color photographs

of Red-tails and relate important lessons in southern Great Plains biodiversity, underscoring the place of the Red-tailed Hawk in Oklahoma's tallgrass prairie ecology. Winter's Hawk introduces the reader to the hawk's biology, social behavior, and useful role in limiting destructive rodent populations. In sharing many anecdotes from his long experience in the field, Lish describes the

hunting techniques of Red-tails, their competition with other raptors, and their behavior in the presence of human observers. He describes the subtle differences in plumage, and other characteristics between the various subspecies of Red-tailed Hawks that winter here. His account of their behavior includes intergenerational warfare, in which young Red-tails are frequently the losers.

Detailed and scientifically accurate, this informal, jargon-free account will appeal to birders, sportsmen, naturalists, and falconers, as well as biologists. Red-tails can see ultraviolet light, which enables them to easily locate trails left by rodents. Cotton rats are by far their most important winter food, but they also eat carrion, large snakes, medium-sized mammals, and smaller

birds. The main motive for the birds' behavior, Lish reminds us, is survival, and he includes birds'-eye views of the hazards Red-tails face: foot injuries, damage to feathers, starvation, electrocution, and illegal shooting. A treasure trove of rich descriptive writing and astonishing photographs, Winter's Hawk inspires readers to help preserve these magnificent birds of prey so that future

generations may see a Red-tail standing sentinel over a field or circling above it. My Side of the Mountain Penguin Special edition slipcase edition of John Green's Paper Towns, with pop-up paper town. From the bestselling author of The Fault in our Stars. Quentin Jacobsen has always loved Margo Roth Spiegelman, for Margo (and her adventures) are the stuff of legend at their high school. So when she

Q soon learns that there are clues in her disappearance . . . and they are for him. But as he gets deeper into the mystery - culminating in another awesome road trip across America - he becomes less sure of who

and what he is looking for. Masterfully written by John Green, this is a thoughtful, insightful and hilarious coming-of-age story.

The Thirteenth Tale Pel
The astonishing, never before told story of the greatest rescue mission of World War II—when the OSS set out to recover more than 500 airmen trapped behind enemy lines in Yugoslavia... During a bombing campaign over Romanian oil fields, hundreds of American airmen were shot down in Nazi-occupied Yugoslavia. Local Serbian

farmers and peasants risked their own lives to give refuge to the soldiers while they waited for rescue, and in 1944, Operation Halyard was born. The risks were incredible. The starving Americans in Yugoslavia had to construct a landing strip large enough for C-47 cargo planes—without tools, without alerting the Germans, and without endangering the villagers. And the cargo

planes had to make it through enemy airspace and back—without getting shot down themselves. Classified for over half a century for political reasons, the full account of this unforgettable story of loyalty, self-sacrifice, and bravery is now being told for the first time ever. The Forgotten 500 is the gripping, behind-the-scenes look at the greatest escape of World War II.

 Marie Winn is our guide into a secret world, a true wilderness in the heart of a city. The scene is New York's Central Park, but the rich natural history that emerges here—the loons, raccoons,

woodpeckers, owls, and hundreds of visiting songbirds--will appeal to wildlife lovers everywhere. At its heart is the saga of the Fifth Avenue hawks, which begins as a love story and develops into a full-fledged mystery. At the outset of our journey we meet the Regulars, a small band of nature lovers who devote themselves to the park and its wildlife. As they watch Pale Male, a remarkable young red-

tailed hawk, woo and win his first mate, they are soon transformed into addicted hawk-watchers. From a bench at the park's model-boat pond they observe the hawks building a nest in an astonishing spot--a high ledge of a Fifth Avenue building three floors above Mary Tyler Moore's apartment and across the street from Woody Allen's. The drama of the Fifth Avenue hawks--

hunting, courting, mating, and striving against great odds to raise a family in their unprecedented nest site--is alternately hilarious and heartbreaking.
