

Language And Gender Ijser

Recognizing the exaggeration ways to get this book **Language And Gender Ijser** is additionally useful. You have remained in right site to start getting this info. get the Language And Gender Ijser link that we meet the expense of here and check out the link.

You could purchase guide Language And Gender Ijser or get it as soon as feasible. You could quickly download this Language And Gender Ijser after getting deal. So, behind you require the ebook swiftly, you can straight acquire it. Its in view of that agreed simple and appropriately fats, isnt it? You have to favor to in this atmosphere

Artificial Intelligence for Data-Driven Medical Diagnosis

Springer Science & Business Media

Non-native language teachers have often been viewed as an unavoidable fate of the profession, rather than an asset worth exploring and investigating. Now that non-natives are increasingly found teaching languages, and particularly English, both in ESL and EFL contexts, the identification of their specific contributions and their main strengths has become more relevant than ever. As a result, there has recently been a surge of interest in the role of non-native teachers but little empirical research has been published so far. This volume is particularly rich in providing different approaches to the study of non-native teachers: NNS teachers as seen by students, teachers, graduate supervisors, and by themselves. It also contributes little explored perspectives, like classroom discourse analysis, or a social-psychological framework to discuss conceptions of NNS teachers. *Single-chip Microcomputers* Walter de Gruyter GmbH & Co KG This two volume handbook provides a comprehensive examination of policy, practice, research and theory related to English Language Teaching in international contexts. More than 70 chapters highlight the research foundation for best practices, frameworks for policy decisions, and areas of consensus and controversy in second language acquisition and pedagogy. The Handbook provides a unique resource for policy makers, educational administrators, and researchers concerned with meeting the increasing demand for effective English language teaching. It offers a strongly socio-cultural view of language learning and teaching. It is comprehensive and global in

perspective with a range of fresh new voices in English language teaching research.

Ethnobotany of the Himalayas Springer Nature

This book is an investigation of the world of gay, containing personal interviews with homosexuals in India and abroad. It touches on many aspects of the subject and makes a plea for more humane, compassionate, rational scrutiny of its social and psychological repercussions.

Critical Perspectives Past and Present Springer Science & Business Media

This book comprises select peer-reviewed papers from the International Conference on Emerging Trends in Electromechanical Technologies & Management (TEMT) 2019. The focus is on current research in interdisciplinary areas of mechanical, electrical, electronics and information technologies, and their management from design to market. The book covers a wide range of topics such as computer integrated manufacturing, additive manufacturing, materials science and engineering, simulation and modelling, finite element analysis, operations and supply chain management, decision sciences, business analytics, project management, and sustainable freight transportation. The book will be of interest to researchers and practitioners of various disciplines, in particular mechanical and industrial engineering. *Emerging Technologies in Data Mining and Information Security* McGraw-Hill Companies

With the growing use of information technology and the recent advances in web systems, the amount of data available to users has increased exponentially. Thus, there is a critical need to understand the content of the data. As a result, data-mining has become a popular research topic in recent years for the treatment of the "data rich and information poor" syndrome. In this carefully edited volume a theoretical foundation as well as important new

directions for data-mining research are presented. It brings together a set of well respected data mining theoreticians and researchers with practical data mining experiences. The presented theories will give data mining practitioners a scientific perspective in data mining and thus provide more insight into their problems, and the provided new data mining topics can be expected to stimulate further research in these important directions.

Proceedings of CCODE 2019 Springer Nature

This book embodies principles and applications of advanced soft computing approaches in engineering, healthcare and allied domains directed toward the researchers aspiring to learn and apply intelligent data analytics techniques. The first part covers AI, machine learning and data analytics tools and techniques and their applications to the class of several hospital and health real-life problems. In the later part, the applications of AI, ML and data analytics shall be covered over the wide variety of applications in hospital, health, engineering and/or applied sciences such as the clinical services, medical image analysis, management support, quality analysis, bioinformatics, device analysis and operations. The book presents knowledge of experts in the form of chapters with the objective to introduce the theme of intelligent data analytics and discusses associated theoretical applications. At last, it presents simulation codes for the problems included in the book for better understanding for beginners.

Major Challenges Facing Higher Education in the Arab World:

Quality Assurance and Relevance Bond Street Books

Moving from the elegant drawing rooms of Lahore to the mud villages of rural Multan, a powerful collection of short stories about feudal Pakistan. An impoverished young woman becomes a wealthy relative's mistress; an electrician on the make confronts his desperate assailant to protect his most prized possession; a

farm manager rises far in the world—but his family discovers after his death the transience of power; a maid, who advances herself through sexual favours, unexpectedly falls in love. In these linked stories about the family and household staff of the ageing KK Harouni, we meet masters and servants, landlords and supplicants, politicians and electricians, village women, and Karachi housewives. Part Chekhov, part RK Narayan, these stories are dark and light, complex and humane; at heart about the relationship between the powerful and powerless, bound together in life—and in death. Together they make up a vivid portrait of a feudal world rarely brought alive in the English language. Sensuous, graceful, melancholy, *In Other Rooms, Other Wonders* gives you Pakistan as you have never seen it. It marks the debut of an amazing new talent.

ICMCSI 2020 Springer

Sustainability and mobile computing embraces a wide range of Information and Communication Technologies [ICT] in recent times. This book focuses more on the recent research and development works in almost all the facets of sustainable, ubiquitous computing and communication paradigm. The recent research efforts on this evolving paradigm help to advance the technologies for next-generation, where socio-economic growth and sustainability poses significant challenges to the computing and communication infrastructures. The main purpose of this book is to promote the technical advances and impacts of sustainability and mobile computing to the informatics research. The key strands of this book include green computing, predictive models, mobility, data analytics, mobile computing, optimization, Quality of Service [QoS], new communicating and computing frameworks, human computer interaction, Artificial Intelligence [AI], communication networks, risk management, Ubiquitous computing, robotics, smart city and applications. The book has also addressed myriad of sustainability challenges in various computing and information processing infrastructures.

ICT Analysis and Applications Prometheus Books

Containing almost 250 entries written by scholars from around the world, this two-volume resource provides current, accurate, and useful information on the politics, economics, society, and cultures of India since 1947. • 240 A-Z entries on the social, political, cultural, and economic development of India since 1947 • Contributions from more than 100 distinguished international

scholars from five continents • A chronology of major domestic, regional, and world events in and involving India from 1947 to 2010 • A "Guide to Related Topics" to allow readers to trace main themes across related entries • An extensive Selected Bibliography containing multicultural and multidisciplinary materials and scholarship on the growth and development of the Republic of India from 1947 to the present

Education and Social Mobility Edward Elgar Publishing
Focuses on Single-Chip Architecture & Describes Ways in Which Single-Chip Architecture Differs From General Purpose Microprocessor

Proceedings of CoMSO 2020 Random House India

This book includes selected peer-reviewed papers presented at the International Conference on Modeling, Simulation and Optimization, organized by National Institute of Technology, Silchar, Assam, India, during 3-5 August 2020. The book covers topics of modeling, simulation and optimization, including computational modeling and simulation, system modeling and simulation, device/VLSI modeling and simulation, control theory and applications, modeling and simulation of energy system and optimization. The book disseminates various models of diverse systems and includes solutions of emerging challenges of diverse scientific fields.

Burnt Shadows Cambridge University Press

This book includes high-quality research papers presented at the Third International Conference on Innovative Computing and Communication (ICICC 2020), which is held at the Shaheed Sukhdev College of Business Studies, University of Delhi, Delhi, India, on 21-23 February, 2020. Introducing the innovative works of scientists, professors, research scholars, students and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-time applications.

Semantics and Comprehension Springer

This book features research papers presented at the International Conference on Emerging Technologies in Data Mining and Information Security (IEMIS 2020) held at the University of Engineering & Management, Kolkata, India, during July 2020. The book is organized in three volumes and includes high-quality research work by academicians and industrial experts in the field

of computing and communication, including full-length papers, research-in-progress papers and case studies related to all the areas of data mining, machine learning, Internet of things (IoT) and information security.

Select Proceedings of TEMT 2019 ABC-CLIO

Hiroko steps out onto the veranda. Her body from neck down a silk column, white with three black cranes swooping across her back. She looks out towards the mountains, and everything is more beautiful to her than it was early this morning. Nagasaki is more beautiful to her than ever before. She turns her head and sees the spires of Urakami Cathedral, which Konrad is looking up at when he notices a gap open between the clouds. Sunlight streams through, pushing the clouds apart even further. Hiroko. And then the world goes white. —From *Burnt Shadows* by Kamila Shamsie -- The morning of August 9, 1945 breaks dreary and unspectacular in the city of Nagasaki. Nonetheless, twenty-one year-old Hiroko Tanaka is elated: she is in love. Her emerging romance with the displaced German Konrad Weiss offers release from the greyness of wartime deprivation. In this time of heightened xenophobia, their affair must be kept secret, particularly as Hiroko's father has recently been outcast for questioning the patriotism of sending children on kamikaze missions. As Hiroko and Konrad furtively plan for a future after the war, there is no way they can comprehend the unspeakable devastation bearing down upon them. Two years later, Hiroko arrives in Delhi at the home of Konrad's sister Ilse and his brother-in-law James Burton. Upon Hiroko's back are crane-shaped scars, seared into her skin when her kimono was incinerated by the bomb. She is on the run from unbearable memories, as well as from the stigma of being branded a hibakusha, a survivor of the bomb. Ilse, in an uncharacteristically impulsive move, welcomes Hiroko into her home, seeing in the brave young woman a possibility of release from her own conscripted existence. Hiroko quickly destabilizes the frigid hierarchy of the household, much to the relief of Sajjad Ashraf, James's bored servant. Tensions are running high in the Mohalla with the looming partition of India and Pakistan. Will Sajjad remain in his beloved Dilli/Delhi, or depart with so many others for the promise of Pakistan? Sajjad's family has secured for him a wife, and he yearns for a legal career, still half-clinging to the hope that James will assist him. But James's only use for him is as

a chess opponent, an idle distraction as the Raj winds to a close. The Burtons are preparing to decamp for England, having already dispatched their son Harry to boarding school. But what James does not know is that Ilse is making other plans. A romance blooms between Hiroko and Sajjad, much to the incredulity of the Burtons, whose own emotional lives have become entwined in the futures of their charismatic young charges. Despite outbursts of jealousies and a terrible act of betrayal, the Burtons nevertheless assist Hiroko and Sajjad in their flight to married life in Istanbul. Later the Ashrafs will move to Karachi to raise their son, Raza. The lives of the Ashrafs and the Burtons will remain entwined for decades, though in ways they cannot anticipate. Across continents and through geopolitical flux, each family will continue to act as a catalytic force upon the other, sometimes in life-saving ways, and sometimes causing great peril. Why is it that some bonds flourish in times of crisis, and why do some fail? What defines the character that survives the cruelest of circumstances? And how is it that entire populations can support unspeakable acts en masse, while relating as individuals with compassion? Longlisted for the prestigious Orange Prize for Fiction, Kamila Shamsie's *Burnt Shadows* is an enthralling meta-cultural epic, the panoramic tale of two families tangled together in some of the most devastating conflicts of modern history.

Athena Unbound Springer Nature

Doctoral Thesis / Dissertation from the year 2021 in the subject Education - Reading Instruction, grade: Doctor of Philosophy, , course: Education, language: English, abstract: This thesis explored the impact of Home grown school feeding program which were designed and implemented by WFP with its different partners in Rwanda between 2015 and 2020, with the aim to understand their impact on literacy improvement. Primary education is receiving much attention from governments of all countries and NGOs in recent times. However, poverty and hunger serves as barriers to achieving the Education for All (EFA) policy in Rwanda. To actualize the EFA in Rwanda, there was the introduction of some educational intervention programmes such as the capitation grant and the school feeding. School feeding programmes are safety net programmes as well as educational interventions ensuring that children with poor parents are given at least a meal a day at school. In Home grown school feeding program intervention (Rutsiro, Karongi, Nyaruguru and

Nyamagabe districts), students get porridge and food respectively. Therefore, this thesis adopted the qualitative research method to investigate how Home grown school feeding program contributes to literacy improvement in Rutsiro district, Rwanda. As a result, approximately one-third of our research sample is reading at or above the WCPM range. Besides this, there are differences in boys' and girls' performance at certain ranges of WCPM, with a quarter of the male sample reading no words at all compared to 11.8 percent of females. Girls also outperform boys at the 16-30 WCPM range, but this trend reverses at the highest WCPM range, with nearly a quarter of boys reading 41-56 WCPM but just 13.6 percent of girls. The findings show that students who could read aloud have much better comprehension ratings: 92.6 percent meet or exceed standard compared to 64.8 percent of those with lower oral fluency. The difference is even more marked when comparing the percentages in the exceeds category: 65.6 percent of students who read on their own answered 4-5 comprehension questions correctly compared to 35.9 percent of those who listened to the story.

An Encyclopedia of Life in the Republic Springer Nature

Scientific and technological advances and innovations are critical to the economic performance of developed countries and the standard of living of the citizens. This book discusses the nature and size of the problem and shows why increasing the number of women and minorities in science, technology, engineering and mathematics industries is vital.

Expressive Discourse Springer Science & Business Media

Same-Sex Love in India presents a stunning array of writings on same-sex love from over 2000 years of Indian literature. Translated from more than a dozen languages and drawn from Hindu, Buddhist, Muslim, and modern fictional traditions, these writings testify to the presence of same-sex love in various forms since ancient times, without overt persecution. This collection defies both stereotypes of Indian culture and Foucault's definition of homosexuality as a nineteenth-century invention, uncovering instead complex discourses of Indian homosexuality, rich metaphorical traditions to represent it, and the use of names and terms as early as medieval times to distinguish same-sex from cross-sex love. An eminent group of scholars have translated these writings for the first time or have re-translated well-known

texts to correctly make evident previously underplayed homoerotic content. Selections range from religious books, legal and erotic treatises, story cycles, medieval histories and biographies, modern novels, short stories, letters, memoirs, plays and poems. From the Rigveda to Vikram Seth, this anthology will become a staple in courses on gender and queer studies, Asian studies, and world literature.

Proceedings of IEMIS 2018, Volume 3 GRIN Verlag

The series *Studia Linguistica Germanica*, founded in 1968 by Ludwig Erich Schmitt and Stefan Sonderegger, is one of the standard publication organs for German Linguistics. The series aims to cover the whole spectrum of the subject, while concentrating on questions relating to language history and the history of linguistic ideas. It includes works on the historical grammar and semantics of German, on the relationship of language and culture, on the history of language theory, on dialectology, on lexicology / lexicography, text linguistics and on the location of German in the European linguistic context.

A Study of Personal Pronoun Morphology and Change in the Germanic Languages from the First Records to the Present Day Createspace Independent Publishing Platform

While *Designing Tasks* underpins this new title, the material has been thoroughly updated and includes four new chapters.

Women and Minorities in Science, Technology, Engineering, and Mathematics Springer

The study of education and social mobility has been a key area of sociological research since the 1950s. The importance of this research derives from the systematic analysis of functionalist theories of industrialism. Functionalist theories assume that the complementary demands of efficiency and justice result in more 'meritocratic' societies, characterized by high rates of social mobility. Much of the sociological evidence has cast doubt on this optimistic, if not utopian, claim that reform of the education system could eliminate the influence of class, gender and ethnicity on academic performance and occupational destinations. This book brings together sixteen cutting-edge articles on education and social mobility. It also includes an introductory essay offering a guide to the main issues and controversies addressed by authors from several countries. This comprehensive volume makes an important contribution to our theoretical and empirical understanding of the changing

relationship between origins, education and destinations. This timely collection is also relevant to policy-makers as education

and social mobility are firmly back on both national and global political agendas, viewed as key to creating fairer societies and

more competitive economies. This book was originally published as a special issue of the British Journal of Sociology of Education.
