LARSEN NORMAN

A Brief Spanish Grammar John Benjamins Publishing
This collection of texts deals with lexicographical and grammatical issues of Spanish from a contrastive and didactic perspective. It aims at identifying the phenomena which are most interesting for compiling contrastive grammars and dictionaries for the Spanish language by focussing on the latest developments in the field of foreign language teaching. In its first part, the volume presents discussions of the contrastive method in linguistics as well as in foreign language teaching and of the theoretical issues concerning the nature of the tertium comparationis for comparative linguistic analysis. In the second part, it provides case studies on grammatical, lexical and lexicographical issues comparing Spanish with German, Galician, French, and Italian. The volume is laid out as a compendium of a number of key issues for future research in the field.

Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

This volume is a collection of 12 papers which originated from a research project on 'Europe and the Mediterranean from a linguistic point of view: history and prospects'. The papers deal with specific morphosyntactic aspects of language structure and evolution. The comparative perspective is adopted both from a synchronic (typological) and a diachronic (historical) angle, focusing in particular on possible contact phenomena. Therefore, methodological key words of this book are areal typology and linguistic area. The issues addressed cover such diverse aspects of language structure and change as verb morphology, relative clause formation, Noun Phrase determination, demonstrative systems, possessive markers in Noun Phrases, conjunctive, disjunctive and adversative constructions, non-canonical object marking, impersonal constructions, reduplication and early translations of the Gospels. These topics are discussed particularly in relation to Romance, Germanic, Celtic and Semitic languages, both modern and ancient. This book will interest researchers in typological, historical, functional and general

linguistics.

A Grammar of the Modern Spanish Language Taylor & Francis

"This book provides a detailed account of verb movement across more than twenty standard and non-standard Romance varieties. Norma Schifano examines the position of the verb with respect to a wide selection of hierarchically-ordered adverbs, as laid out in Cinque's (1999) seminal work. She uses extensive empirical data to demonstrate that, contrary to traditional assumptions, it is possible to identify at least four distinct macro-typologies in the Romance languages: these macro-typologies stem from a compensatory mechanism between syntax and morphology in licensing the Tense, Aspect, and Mood interpretation of the verb. The volume adopts a hybrid cartographic/minimalist approach, in which cartography provides the empirical tools of investigation, and minimalist theory provides the technical motivations for the movement phenomena that are observed. It provides a valuable tool for the examination of fundamental morphosyntactic properties from a cross-Romance perspective, and constitutes a useful point of departure for further investigations into the nature and triggers of verb movement cross-linguistically."--Dust jacket flap.

Excerpt from *A Spanish Grammar: With Practical Introductory Lessons* The purpose of the illustrations is to teach pictorially some ideas about Spanish civilization and history in Spain and America. The text accompanying the pictures may be used as translation exercises on which the teacher may base questions in Spanish similar to those suggested. In order that early use may be made of the illustrations, the first questions are framed in simple language. The later pictures are inserted in a historical order so as to give a brief survey of the most important events in Spanish history. The teacher who desires to use only Spanish in the classroom will find at the end of the book a brief summary in Spanish of the rules discussed in Part I. This will supply not only the proper grammatical terms but also idiomatic language to use when talking about grammar with the pupils. About the Publisher

Using interaction as a fundamental springboard, *Addressing Methodological Challenges in Interpreting Studies Research* showcases the major breakthrough in interpreting studies made by investigating community interpreting and the inherent high degree of participant interaction. The book adds a 'reflexive'

twist, and espouses the notion of the analyst as not separate from the context under study. After looking at dialogue interpreters, cast away from the carpeted walls of sound-proof booths and deprived of the spotlighted lectern-podium position at high level fora, it has become clear that the interpreter's invisibility, not to mention their neutrality, is uppermost in the minds of both users and providers in terms of expectations. Among all the participants in any 'mediated' communicative situation, it is the interpreter who is exceedingly visible and potentially most influential in shaping and coordinating the ongoing exchanges. The book proposes that a similar view be applied to researchers engaged in interpreting research, especially in empirical investigations. Different forms of 'interaction' between researchers and the data in their studies are inevitable. This applies to every stage of their work, ranging from all the pre-analysis activities to the analysis itself, and the post-analysis stage, in which results are disseminated in the research community and, possibly, the target population. This volume will stand to benefit all those who work with researching language issues, not only because of the various approaches covered in the volume, but also because of the ways in which they are reframed as a result of shifting contextual constraints.

This volume offers novel insights into linguistic diversity in the domains of spatial and temporal reference, searching for uniformity amongst diversity. A number of authors discuss expression of dynamic spatial relations cross-linguistically in a vast range of typologically different languages such as Bezhta, French, Hinuq, Italian, Japanese, Polish, Serbian, and Spanish, among others. The contributions on linguistic expression of time all shed new light on pertinent questions regarding this cognitive domain, such as the hotly debated relationship between cross-linguistic differences in talking about time and universal principles of utterance interpretation, modelling temporal inference through aspectual interactions, as well as the complexity of the acquisition of tense-aspect relations in a second language. The topic of space and time in language and culture is also represented, from a different point of view, in the sister volume *Space and Time in Languages and Cultures: Language, Culture, and Cognition* (HCP 37) which discusses spatial and temporal constructs in human language, cognition, and culture in order to come closer to a better understanding of the interaction between shared and individual characteristics of language and culture that shape the way people interact with each other and exchange information about the spatio-temporal constructs that underlie their cognitive, social, and linguistic foundations.
