Rabbinic Literature Peter  
Owen Publishers

A very short book,  
"Mother and Child were  
Saved" features a  
translation of the memoirs

that Frisian midwife, Catharina Schrader had written in the late 17th and the early 18th centuries. These were extracted from her notes that documented almost 3000 deliveries over the course of Schrader's career as a midwife. The memoir, exhibited around 100 of the most complicated that Schrader had helped with. These included both mother and child who had died, some where only the child died, some where one of a set of multiples lived, some where both lived happily.

Though the essays and the introduction focus on the medical aspects of Schrader's career. The social aspect as a female midwife in a period of medicalized transition cannot be overlooked. One can see the burgeoning reticence emanate even from Schrader herself towards midwives who were incompetent and merely "tortured" their patients. However, this Memoir is integral for any study of midwifery in Europe during the early modern period. While the

introductory essays could have been expanded to consider the social consequences of gender and midwifery, the fact that the Memoirs have been translated from their mix of three languages (Dutch, German and Frisian) into one ubiquitous language: English, gives the modern historian greater access to a primary source that details the travails and tribulations that women faced during this period that did not have the same kind of prenatal care that women see

today. Ultimately, women faced with every birth, the possibility that they could die, and this memoir shows that there was a marked response to do anything they could to prevent that on the part of midwives and other obstetrical practitioners during this period. Regardless with the lack of exploration into the issues surrounding gender or the views of conception or any other number of paths that the essayists at the beginning could have explored, this work should be read by any historian

that is considering gender in the early modern period.

A Guide to the Monumental Centre of Ancient Rome with Reconstructions of the Monuments Hodder Education

This volume provides a much-needed update on imaging of the spleen, a subject that has witnessed a revival of interest in recent years owing to new insights into physiology and pathophysiology and the application of modern noninvasive imaging

modalities. Introductory chapters discuss the normal anatomy and radiological appearances. Thereafter individual chapters document the imaging findings in a wide range of hematological, immunological, oncological, infectious, vascular, and systemic disorders. Splenic pathology in infancy and childhood is considered separately, and there is a chapter on interventional procedures. Informative differential diagnostic tables are also provided. This well-illustrated book

will serve as an invaluable source of easily accessible information for both clinicians and radiologists.

From the landscapes of Constable to the imagery of Blake and Bacon, this book, published to accompany a major exhibition at the Museum of Fine Arts, Ghent, is a

lavish survey of British art from 1750 to 1950.

Spanning two hundred years, British Vision presents some of the most iconic works in British art history from major public and private collections in Europe and the USA. William Hogarth, Thomas Gainsborough, George Stubbs, William Blake, John Constable, Joseph Mallord William Turner, Dante Gabriel Rossetti, Edward Burne-Jones, Stanley Spencer, Graham Sutherland, Henry Fuseli, Richard Dadd, Francis Bacon and

Lucian Freud are among the many outstanding artists whose work appears on the book's pages. Essays by a raft of distinguished art historians focus on the two defining characteristics of British art: observation and imagination. This lavishly illustrated catalogue is a sumptuous record of the most comprehensive exhibition of British art to be staged under one roof in recent years, and represents a unique opportunity to discover the creative forces that

shaped British art over two centuries.

"The knowledge and wisdom of 100 happiness professors from around the world." It may be surprising to learn the amount of scientific research conducted on happiness and that there is a World Database of Happiness, a cumulative

and continuous register of that research. In fact, the United States ranks higher than average in happiness, though not as high as the Nordic countries, including the happiest of nations, Denmark. So perhaps there is a lot to be learned about happiness and how to achieve it. "The World Book of Happiness" is a fascinating compilation of brief essays by 100 of the most prominent experts in positive psychology working in 50 countries. Writing from their own areas of expertise in

language free of academic jargon, the contributors examine the principles of happiness, also known as subjective well-being, and how to achieve it. These expert recommendations are shown as "keys" to happiness. The book reveals many paths to happiness. From the founder of positive psychology, it is "other people matter." From Germany it is "pride, modesty and gratitude." In Malaysia it is "nourish the soul," and in Austria "fitness, friends and fun"

bring happiness. And in Denmark, home to the happiest: "Believe in yourself." But what, too, of genetics, geography and health? The experts also consider these factors and recommend keys to happiness that address what we think we cannot control. Positive psychology may not be widely known, but the desire to be happy is universal. By transforming information into knowledge and knowledge into wisdom, "The World Book of Happiness" brings readers a hopeful and

practical guide to that elusive state of being. *The Antiquity of Disease* New York Review of Books The authors identify direct address, a dialogic way of address and response, as the fundamental means of healing in relationships, especially in the family, viewing residual trust as the keystone of the dialogic process. Bare Hands Marshall Cavendish International (Asia) Pte Limited This text is concerned with the organization, ideas and problems of palliative care in the

European context. As a result of a BIOMED project, various organizations, concepts and problematic issues of palliative care have been studied and described. *Operative Techniques and Recent Advances in Acute Care and Emergency Surgery* 010 Publishers By Nobel Prize Winner Peter Handke Provocative, romantic, and restlessly exploratory, Peter Handke is one of the great writers of our time. *Slow Homecoming*, originally published in the late 1970s, is central to his

achievement and to the powerful influence he has exercised on other writers, chief among them W.G. Sebald. A novel of self-questioning and self-discovery, *Slow Homecoming* is a singular odyssey, an escape from the distractions of the modern world and the unhappy consciousness, a voyage that is fraught and fearful but ultimately restorative, ending on an unexpected note of joy. The book begins in America. Writing with the jarring intensity of his early work, Handke

introduces Valentin Sorger, a troubled geologist who has gone to Alaska to lose himself in his work, but now feels drawn back home: on his way to Europe he moves in ominous disorientation through the great cities of America. The second part of the book, "The Lesson of Mont Sainte-Victoire," identifies Sorger as a projection of the author, who now writes directly about his own struggle to reconstitute himself and his art by undertaking a pilgrimage to the great mountain that Cézanne

painted again and again. Finally, “Child Story” is a beautifully observed, deeply moving account of a new father—not so much Sorger or the author as a kind of Everyman—and his love for his growing daughter. *Truth, Trust And Relationships* Rodopi

The work of Herman Hertzberger is the subject of wide international esteem. 1991 first saw publication of Hertzberger's *Lessons for Students in Architecture*, an elaborated version of lectures he had given

since 1973 at Delft University of Technology. This immensely successful book has gone through many reprints and has also been published in Japanese, German, Italian, Portuguese, Taiwanese, Dutch, Greek, Polish, Iranian, Korean and Chinese. *Space and the Architect* is the second book written by Hertzberger. It charts the backgrounds to his work of recent years and the ideas informing it, drawing on a wide spectrum of subjects and designs by artists,

precursors, past masters and colleagues, though with his own work persistently present as a reference. Space is its principal theme, physical space but also the mental or intellectual regions the architect calls upon during the process of designing. Once again Hertzberger's broad practical experience, his ideas and his seemingly inexhaustible 'library' of images are a major source of inspiration for anyone whose concern is the design of space. Susan B. Anthony's

Women's Right to Suffrage Speech MIT Press  
Analyzes the impact of cultural interventions on urban society from the point of view of artists, architects, and scientists. Does culture today still function as a guiding principle, or does it merely serve as a catalyst for spectacular buildings? Are the creative and cultural sectors the industries of the future in postindustrial societies?

Leading international artists and art educators consider the challenges of art education in today's dramatically changed art world. The last explosive change in art education came nearly a century

ago, when the German Bauhaus was formed. Today, dramatic changes in the art world—its increasing professionalization, the pervasive power of the art market, and fundamental shifts in art-making itself in our post-Duchampian era—combined with a revolution in information technology, raise fundamental questions about the education of today's artists. Art School (Propositions for the 21st Century) brings together more than thirty leading international artists and

art educators to reconsider the practices of art education in academic, practical, ethical, and philosophical terms. The essays in the book range over continents, histories, traditions, experiments, and fantasies of education. Accompanying the essays are conversations with such prominent artist/educators as John Baldessari, Michael Craig-Martin, Hans Haacke, and Marina Abramovic, as well as questionnaire responses from a dozen

important artists—among them Mike Kelley, Ann Hamilton, Guillermo Kuitca, and Shirin Neshat—about their own experiences as students. A fascinating analysis of the architecture of major historical art schools throughout the world looks at the relationship of the principles of their designs to the principles of the pedagogy practiced within their halls. And throughout the volume, attention is paid to new initiatives and proposals about what an art school can and should be in the

twenty-first century—and what it shouldn't be. No other book on the subject covers more of the questions concerning art education today or offers more insight into the pressures, challenges, risks, and opportunities for artists and art educators in the years ahead. Contributors Marina Abramovic, Dennis Adams, John Baldessari, Ute Meta Bauer, Daniel Birnbaum, Saskia Bos, Tania Bruguera, Luis Camnitzer, Michael Craig-Martin, Thierry de Duve, Clémentine Deliss,

Many organizations do not yet have a formal programme of records management, but increasingly they are recognizing the benefits

of well managed records and the serious consequences of inadequate records systems. Establishing records management and maintaining an effective programme requires specialist expertise. This essential manual of practice provides a detailed guide to the concepts, skills and techniques of records management for organizational staff who have a responsibility for setting up, maintaining or restructuring a records management programme.

It offers invaluable advice on the management of records in both electronic and traditional paper media, and focuses on the following areas:  
understanding records management analysing the context for records management classifying records and documenting their context creating and capturing records; managing appraisal, retention and disposition maintaining records and assuring their integrity providing access implementing records management. The

appendices provide a wealth of additional information including a list of standards for records management, an annotated bibliography and sources of further information, and details of professional and advisory bodies. Readership: This much needed manual is an indispensable purchase for organizations wishing to introduce better practices for managing their records. The book is intended to be of value to experienced records managers as well as LIS

practitioners and newcomers to the field. It should be on the desk of every manager and every information professional with responsibility for records management. Culture IOS Press  
A fully updated edition of the classic text on the knee, *The Problem Knee*, Third Edition is highly illustrated in colour and offers a fundamental approach to dealing with soft-tissue and skeletal disorders of the knee. The book focuses on younger patients, rather than degenerative conditions,

covering both injuries and congenital abnormalities. The crucial skills of accurate history-taking, clinical examination, investigation and modern surgical management are the focus throughout. From this framework, the latest techniques in imaging and arthroscopic procedures, rehabilitation methods and ligament reconstruction are discussed, plus indications for techniques such as meniscal suturing and osteochondral grafting. A logical, systematic approach Clear line

drawings to illustrate examination methods  
Scans and x-rays to help you identify injuries and problems  
Over 500 references

**Mother and Child Were Saved** Routledge

In this volume, Boszormenyi-Nagy and Krasner provide a comprehensive, sharply focused guide to the clinical use of Contextual Therapy (CT) as a therapy rooted in the reality of human relationships. The authors describe a far-reaching trust-based approach to individual

freedom and interpersonal fairness that makes possible a remarkably effective system of psychotherapy. *Between Give and Take* clearly delineates four basic dimensions of relational reality: factual predeterminants, human psychology, communications and transactions and due consideration or merited trust. It is this last dimension that is the cornerstone of CT. It builds on the realm of the "between" that reshapes human relationships and

liberates each relating person for mature living. *The Lion of Flanders* OUP Oxford
