AIDAN REILLY

Plans and Situated Actions Forever

Mexico leads the world in community management of forests for the commercial production of timber. Yet this success story is not widely known, even in Mexico, despite the fact that communities around the globe are increasingly involved in managing their own forest resources. To assess the achievements and shortcomings of Mexico's community forest management programs and to offer approaches that can be applied in other parts of the world, this book collects fourteen articles that explore community forest management from historical, policy, economic, ecological, sociological, and political perspectives. The contributors to this book are established researchers in the field, as well as many of the important actors in Mexico's nongovernmental organization sector. Some articles are case studies of community forest management programs in the states of Michoacán, Oaxaca, Durango, Quintana Roo, and Guerrero. Others provide broader historical and contemporary overviews of various aspects of community forest management. As a whole, this volume clearly establishes that the community forest sector in Mexico is large, diverse, and has achieved unusual maturity in doing what communities in the rest of the world are only beginning to explore: how to balance community income with forest conservation. In this process, Mexican communities are also managing for sustainable landscapes and livelihoods.

From Settlement to City with Benjamin Franklin JHU Press

Ecological Informatics is defined as the design and application of computational techniques for ecological analysis, synthesis, forecasting and management. The book provides an introduction to the scope, concepts and techniques of this newly emerging discipline. It illustrates numerous applications of Ecological Informatics for stream systems, river systems, freshwater lakes and marine systems as well as image recognition at micro and macro scale. Case studies focus on applications of artificial neural networks, genetic algorithms, fuzzy logic and adaptive agents to current ecological management issues such as toxic algal blooms, eutrophication, habitat degradation, conservation of biodiversity and sustainable fishery.

Managing for Sustainable Landscapes Westview Press

CHOOSE A COLLEGE THAT WILL LAUNCH A CAREER! When it comes to getting the most out of college, the experiences you have outside the classroom are just as important as what you study. Colleges That Create Futures looks beyond the usual "best of" college lists to highlight 50 schools that empower students to discover practical, real-world applications for their talents and interests. The schools in this book feature distinctive research, internship, and hands-on learning programs—all the info you need to help find a college where you can parlay your passion into a successful post-college career. Inside, You'll Find: • In-depth profiles covering career services, internship support, student group activity, alumni satisfaction, noteworthy facilities and programs, and more • Candid assessments of each school's academics from students, current faculty, and alumni • Unique hands-on learning opportunities for students across majors • Testimonials on career prep from alumni in business, education, law, and much more ***** What makes Colleges That Create Futures important? You've seen the headlines—lately the news has been full of horror stories about how the college educational system has failed many recent grads who leave school with huge debt, no job prospects, and no experience in the working world. Colleges That Create Futures identifies schools that don't fall into this trap but instead prepare students for successful careers! How are the colleges selected? Schools are selected based on survey results on career services, grad school matriculation, internship support, student group and government activity, alumni activity and salaries, and noteworthy facilities and programs.

An Uncensored History of a Conservation Icon

 Springer Science & Business Media

This book brings together researchers in international communication and global media studies to revisit and advance the concept of media imperialism for 21st century research. Using cases across the globe, this volume is essential for understanding communications media in unequal economic, geopolitical and cultural-ideological power relations.

From the #1 New York Times bestselling author of the Ella and Micha series comes a gripping story of passion, pain, and the courage to love . . . THE TEMPTATION OF LILA AND ETHAN On the surface, Lila Summers is flawless: good looks, expensive clothes, and a big, beautiful smile. But a dark past and even darker secrets are threatening to bubble over her perfect façade. She'll do anything to keep the emptiness inside hidden—which leads her into situations that always end badly. Whenever she hits bottom, there's only one person who's there to pull her out: Ethan Gregory. Ethan set the rules a long time ago: he and Lila are just friends. He doesn't do relationships. Although his tattooed, bad boy exterior is a far cry from Lila's pretty princess image, Ethan can't deny they have a deeper connection than he's used to. If he's not careful, he could be in serious danger of becoming attached—and he's learned the hard way that attachment only leads to heartbreak. When Lila falls farther than she ever has before, can Ethan continue to help as a friend? Or is he also getting close to falling . . . for her?

Steal My Magnolia

 SAGE

A girl giant, afraid of the light, and a boy giant, afraid of the dark, live lonely lives following only the moon or the sun until an eclipse brings them together.

The Temptation of Lila and Ethan Cambridge University Press

I'm Levi Buchanan, and until five years ago, I thought the legend of my family's curse was a load of crazy, Southern nonsense. No curse can make you fall in love at first sight. No curse can force a true, deep, passionate, all-consuming love that will haunt you all the days of your life. Then I met Jocelyn Abernathy and I realized how completely wrong I was. The problem is, Jocelyn guards her feelings like well-armed soldier. She's the most beautiful, stubborn, infuriating woman I've ever met. Every time she talks, I want to kiss the living daylight out of her. But I can't. Because when we met, she didn't need true love. She needed a best friend. And that's what I've been to her... for five years. But when Jocelyn meets a handsome stranger her first day working at Donner Bakery and she lets him buy her a dill pickle cupcake, I realize with ominous regret that I may have missed my window with my best friend. If I can't get her to see past our friendship, my new curse may be to watch the

love of my life move on with someone else. 'Baking Me Crazy' is a full-length contemporary romantic comedy, can be read as a standalone, and is book #1 in the Donner Bakery series, Green Valley World, Penny Reid Book Universe.

Clint Eastwood is one of the world's most popular action stars, who has matured into a fine American producer-director. Entertaining, illuminating and packed with information, up to and including "The Changeling", this is the first book to cover his full life in the movies, from his beginnings in 1950s B-movies and in TV's "Rawhide" to "Gran Torino" showing how as both actor and filmmaker Eastwood aims for the heart of the drama, whatever the story. Howard Hughes follows Eastwood's craft through over 50 movies. He looks at his launch into superstardom in Sergio Leone's 1960s spaghetti westerns. Back in America, he built on his success as western hero with such films as "High Plains Drifter" and "The Outlaw Josey Wales", winning an Oscar for "Unforgiven" in 1992. He blasted his way through the seventies and eighties as Inspector Harry Francis Callahan, the last hope for law enforcement in San Francisco. He also monkeyed around in two phenomenally popular films with Clyde the orang-utan, which brought tough-guy Eastwood to a whole new audience and made him the biggest box office star of his generation. "Aim for the Heart" also looks at Eastwood's more unusual roles, including "The Beguiled", "The Bridges of Madison County" and "Million Dollar Baby". Since 1970, he has enjoyed parallel success as director-producer of his own Malpas Productions, with "Bird", "Mystic River" and "Letters from Iwo Jima", demonstrating formidable directing credentials. "Aim for the Heart" covers all Eastwood's movies of many genres in detail, and Eastwood's story is illustrated with film stills, glimpses behind the scenes, and rare poster advertising material. "Aim for the Heart" also includes the most comprehensive credits filmography has ever compiled on Eastwood's work, as star and director.

A thoughtful travelogue of spiritual artist, Patricia Robin Woodruff and her photographer daughter, Coriander in the Amazon jungle, Iquitos and Lima, Peru. You feel like you are traveling, learning and laughing along with them as they explore the jungle animals and plants, native earth religions and history. There is a deep spiritual side to this journey: participating in a sacred medicine ritual with a shaman, learning about native plant remedies and exploring the mysterious pottery offerings and their shamanic aspects.

American Geography Alfred Music

Soil organic matter (SOM) is the primary determinant of soil functionality. Soil organic carbon (SOC) accounts for 50% of the SOM content, accompanied by nitrogen, phosphorus, and a range of macro and micro elements. As a dynamic component, SOM is a source of numerous ecosystem services critical to human well-being and nature conservancy. Important among these goods and services generated by SOM include moderation of climate as a source or sink of atmospheric CO₂ and other greenhouse gases, storage and purification of water, a source of energy and habitat for biota (macro, meso, and micro-organisms), a medium for plant growth, cycling of elements (N, P, S, etc.), and generation of net primary productivity (NPP). The quality and quantity of NPP has direct impacts on the food and nutritional security of the growing and increasingly affluent human population. Soils of agroecosystems are depleted of their SOC reserves in comparison with those of natural ecosystems. The magnitude of depletion depends on land use and the type and severity of degradation. Soils prone to accelerated erosion can be strongly depleted of their SOC reserves, especially those in the surface layer. Therefore, conservation through restorative land use and adoption of recommended management practices to create a positive soil-ecosystem carbon budget can increase carbon stock and soil health. This volume of *Advances in Soil Sciences* aims to accomplish the following: Present impacts of land use and soil management on SOC dynamics Discuss effects of SOC levels on agronomic productivity and use efficiency of inputs Detail potential of soil management on the rate and cumulative amount of carbon sequestration in relation to land use and soil/crop management Deliberate the cause-effect relationship between SOC content and provisioning of some ecosystem services Relate soil organic carbon stock to soil properties and processes Establish the relationship between soil organic carbon stock with land and climate Identify controls of making soil organic carbon stock as a source or sink of CO₂ Connect soil organic carbon and carbon sequestration for climate mitigation and adaptation

"Zap Into the Past" University of Texas Press

Drawing on studies from Africa, Asia and South America, this book provides empirical evidence and conceptual explorations of the gendered dimensions of food security. It investigates how food security and gender inequity are conceptualized within interventions, assesses the impacts and outcomes of gender-responsive programs on food security and gender equity and addresses diverse approaches to gender research and practice that range from descriptive and analytical to strategic and transformative. The chapters draw on diverse theoretical perspectives, including transformative learning, feminist theory, deliberative democracy and technology adoption. As a result, they add important conceptual and empirical material to a growing literature on the challenges of gender equity in agricultural production. A unique feature of this book is the integration of both analytic and transformative approaches to understanding gender and food security. The analytic material shows how food security interventions enable women and men to meet the long-term nutritional needs of their households, and to enhance their economic position. The transformative chapters also document efforts to build durable and equitable relationships between men and women, addressing underlying social, cultural and economic causes of gender inequality. Taken together, these combined approaches enable women and men to reflect on gendered divisions of labor and resources related to food, and to reshape these divisions in ways which benefit families and communities. Co-published with the International Development Research Centre.

Kids Make Music Series: Kids Make Music, Babies Make Music, Too! Rowman & Littlefield

THE NUMBER ONE NEW YORK TIMES BESTSELLING AUTHOR Destined to be together? Or has fate conspired to tear them apart . . . Luke Price and Violet Hayes have been through a lot together, but ever since they discovered a cruel connection from the past, which shattered their relationship, they haven't seen each other for months. But when Luke gets into some gambling trouble with the wrong people, destiny throws them together and they find themselves together on the road to Las Vegas to try and settle his debt. As Violet spends time with Luke, all her feelings come to the surface and she begins to wonder if going back to her old life was a mistake. But just as Violet starts to open up to Luke again, she receives a call with information that could change her life forever and forces her to

question if there is anyone she can truly trust . . .

Youth Apprenticeship Scholastic

A rule-breaker with a fiery attitude, Ella always wore her heart on her sleeve. Then she left everything behind to go to college, where she transformed into someone who follows the rules, keeps everything together, and hides all her problems. Now it's summer break and she has nowhere else to go but home. But once there, Ella fears that everything she's worked so hard to bury might resurface—especially with Micha living right next door. Smart, sexy, and confident, Micha can get under Ella's skin like no one else. He knows everything about her, including her darkest secrets. If he tries to tempt the old Ella to return, he will be impossible to resist. But what Ella doesn't realize is that when she left, she took a piece of Micha's heart with her. Now he's determined to win back the girl he lost, no matter what it takes.

The Changeover Orion Children's Books

Sun & Moon Forever

A brand-new edition of the Carnegie Medal-winning THE CHANGEOVER - written by internationally bestselling author, Margaret Mahy. 'A gorgeous, strange, unforgettable story . . . I more than loved it' Laini Taylor - author of *Daughter of Smoke and Bone* 'A clammy hand pressed Laura down onto her knees beside Jacko's bed. It was the hand of terror, nothing less.' It was a warning. Laura felt it when she looked in the mirror that morning. There had been others: the day her father left home, the day she met Sorensen - the boy with the strange silver eyes. But nothing had prepared Laura for the horror of today. And now her little brother, Jacko, was fighting for his life after being sucked dry of his youth by the sinister Carmody Braque. Laura knows there is only one way to save Jacko; she must join Sorensen and use his supernatural powers to change over if there is to be any hope for her little brother. An unforgettable, supernatural romance.

The Secret of Ella and Micha Routledge

Her study of this early conservation controversy will fascinate anyone who cares about sea turtles or the oceans in which they live.

An Artist's Journey Thru History, the Amazon, and Spirit (with Travel Tips) McGraw-Hill College

What is democracy? What are the pitfalls and the positive potentials in the growing trend toward democratization? This book examines the prospects for democracy in the world today and frames the central dilemma confronting all states touched by the process of democratization. Georg Sørensen clarifies the concept of democracy, shows its application in different contexts, and questions whether democratic advancement will continue—and if so, at what price. The consequences of democracy for economic development, human rights, and peaceful relations among countries are illuminated in both their positive and negative aspects. Following the success of the first edition of *Democracy and Democratization*, Sørensen has updated the book with a new section on the prospects of democracy as we approach the millennium, an extended discussion of the economic performance of recently democratized countries, and an evaluation of the possibilities for further democratic consolidation. The second edition features a wealth of new case studies, examples, and anecdotes to illustrate historical as well as contemporary instances of democratic transition. Democracy, as Sørensen convincingly portrays it, is a value in itself as well as a potential promoter of peace, prosperity, and human well-being. But democracy is not inevitable, and actions at every level—from the individual to the international—are necessary to ensure that frail or “frozen” democracies do not founder and that established democracies flourish.
