An extraordinary and rare insight into how a few determined entrepreneurs created an icon... - C. K. PrahaladThe targets were stupendous and considered unachievable by almost everyone. Slightly over two years to find a suitable partner, finalize all legal documentation, get governmental approval to these agreements as well as to the investment proposals, build a factory, develop a supplier base to meet localization regulations, create a sales and service network, and develop and launch a peoples car that would sell 100,000 a year, in a sector where Indian expertise was limited. And to do this as a public sector company, having to follow all governmental systems and procedures, and having to please both its masters in the government and Suzuki Motor Corporation. However, the Maruti project succeeded, and in ways that were unimaginable in 1983. The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle-class men and women could aspire to own a reliable, economical and modern car, and the steep sales targets were easily met. Twenty-six years later, the company, now free of government controls and facing competition from the worlds major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story, involving grit, management skill and entrepreneurship of a high order. R.C. Bhargava, who was at the helm of the company, and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account of a landmark achievement.

The list goes on: the interior of the new stadium for Juventus Turin, the Nash Healey Spider seen in Billy Wilder's Sabrina, and the legendary Ferrari Dino 246 and Ferrari Testarossa. However, Pininfarina is not resting on its laurels, but blasting full speed ahead into the future with an expanded portfolio while honoring its heritage. Whether it's a solution for sustainable mobility, interior designs, or household gadgets, all Pininfarina projects bear an unmistakable signature. To visually celebrate the history and influence of Pininfarina, there is no one better suited than a man who has made his own unmistakable mark on automotive photography. Gunther Raupp has spent 30 years photographing cars for Ferrari's official calendars, which enjoy a cult following among the experts. He has two successful books with teNeues, the most recent being The Ferrari Book. Better still, you probably wish to attempt servicing and maintaining your bike, all by yourself (the DIY way). This is the book for you then. To most of us, motorcycle maintenance is cleaning the bike and taking it for a service frequently. But there is actually much more to it than cleaning and oiling. It involves performing a specific set of tasks that need to be carried according to a specific schedule. But any of this information is not readily available and is too technical for the regular bike owner. This book aims to provide all that necessary information in the most straightforward simple fashion. It has been written specifically to serve an absolute beginner to motorcycle maintenance and the whole Do It Yourself (DIY) ethic. This book tries not just to show how easy motorcycle maintenance is but also to show how much fun it actually can be.
