An epic and transporting novel, the latest installment of the “heart-wrenching, uplifting, and utterly enthralling” (Lucy Foley, author of The Guest List) Seven Sisters series, unravelling between the dazzling streets of modern-day New York City and the breathtaking plains of 1940s colonial Kenya. Electra d’Aplièse is a top model who seems to have it all: beauty, fame, and wealth. But beneath the glittery veneer, she’s cracking under all the pressure. When her father dies, she turns to alcohol and drugs to ease the pain. As friends and colleagues fear for her health, Electra receives a shocking letter from a stranger who claims to be her grandmother. In 1939, New Yorker Cecily Huntley-Morgan arrives in Kenya’s Lake Naivasha region for the exciting chance to stay with her godmother, the famous socialite Kiki Preston. But after a sheltered upbringing, she’s astounded by the hedonistic antics of the other expats in the infamous Happy Valley set. Cecily soon grows to love her stunning but complicated new home, and she even accepts a proposal of marriage from an enigmatic older cattle farmer.

After a shocking discovery and with war looming, Cecily feels isolated and alone. Until she meets a young woman in the woods and makes her a promise that will change the course of her life forever. Featuring Lucinda Riley's "engaging and mesmerizing" (Library Journal, starred review) storytelling and filled with unforgettable and moving characters, *The Sun Sister* explores how love can cross seemingly impossible boundaries.

o caso brasileiro Simon and Schuster Transconstitutionalism is a concept used to describe what happens to constitutional law when it is emancipated from the state, in which can be found the origins of constitutional law. Transconstitutionalism does not exist because a multitude of new constitutions have appeared, but because other legal orders are now implicated in resolving basic constitutional problems. A transconstitutional problem entails a constitutional issue whose solution may involve national, international, supranational and transnational courts or arbitral tribunals, as well as native local legal institutions. Transconstitutionalism does not take any single legal order or type of order as a starting-point or ultima ratio. It rejects both nation-statism and internationalism, supranationalism, transnationalism and localism as privileged spaces for solving constitutional problems. The transconstitutional model avoids the dilemma of 'monism versus pluralism'. From the standpoint of transconstitutionalism, a plurality of legal orders entails a complementary and conflicting relationship between identity and alterity: constitutional identity is rearticulated on the basis of alterity. Rather than seeking a

'Herculean Constitution', transconstitutionalism tackles the many-headed Hydra of constitutionalism, always looking for the blind spot in one legal system and reflecting it back against the many others found in the world's legal orders.

The plan of the following Classification and Index was developed early in 1873. It was the result of several months' study of library economy as found in some hundreds of books and pamphlets, and in over fifty personal visits to various American libraries. In this study, the author became convinced that the usefulness of these libraries might be greatly increased without additional expenditure. Three years practical use of the system here explained, leads him to believe that it will accomplish this result; for with its aid, the catalogues, shelf lists, indexes, and cross references essential to this increased usefulness, can be made more economically than by any other method which he has been able to find. The system was devised for cataloguing and indexing purposes, but it was found on trial to be equally valuable for numbering and arranging books and pamphlets on the shelves.

Prezado leitor, prezada leitora:
Saudações cordiais! Escrever, em poucas palavras, a respeito de uma obra científica de tamanha magnitude e elevado rigor acadêmico como esta, que ora se torna de domínio público, não é uma tarefa fácil; porém muitíssimo gratificante. Há uma mistura qualiquantitativa de emoções, sentimentos, anseios, expectativas e desafios que se engendram. Todavia, mesmo em meio à crise sanitária que (ainda) tem assolado de forma caótica e preocupante o Brasil e o mundo nos dias

atuais, devido ao advento da pandemia de novo Coronavírus (COVID-19), é com imensa alegria e satisfação que, nas condições de organizador e autor, apresentamos o presente livro intitulado Tópicos especiais no ensino e na aprendizagem de matemática. Este primoroso opúsculo acadêmico-científico, de leitura e utilização recomendável em cursos de graduação (bacharelado, licenciatura e tecnologia), cursos específicos de formação continuada de docentes de Matemática (e disciplinas curriculares afins) e cursos de extensão universitária, bem como na realização de semanas pedagógicas escolares e no desenvolvimento de pesquisas científicas em (Educação) Matemática, está didática e metodologicamente estruturado em quatro belíssimos capítulos teóricos, os quais são resultantes de leituras dirigidas, investigações científicas, experiências escolares e acadêmicas discentes, análises crítico-reflexivas e práticas pedagógicas profissionais docentes de renomados(as) estudiosos(as)/pesquisadores(as) oriundos(as) das áreas de Educação, Pedagogia, Matemática e demais campos correlatos do conhecimento científico. Os(As) autores(as) e coautores(as) deste importante livro, que é um autêntico artefato cultural e legado eterno para todas as demais gerações vindouras, não mediram esforços em redigir os seus capítulos textuais em formato de artigos científicos, cujas temáticas são resumidamente apresentadas na seguinte sequência, sem, tampouco, levar em consideração questões hierárquicas e/ou níveis valorativos de relevância acadêmico-científica e intelectual: Abrindo com chave de ouro a coletânea científica, tem-se o primeiro

capítulo nominado de MODELAGEM MATEMÁTICA: UMA ALTERNATIVA PEDAGÓGICA PARA A SOLUÇÃO DE PROBLEMAS REAIS, de autoria de Tayla da Silva Corrêa de Freitas; Gerson dos Santos Farias e Eugenia Brunilda Opazo Uribe. A posteriori, as autoras Viviane Roncaglio; Isabel Koltermann Battisti e Cátia Maria Nehring trazem, no segundo capítulo textual, o artigo científico AULAS DE MECÂNICA GERAL I EM UM CURSO DE ENGENHARIA E A MOBILIZAÇÃO DO CONCEITO VETOR. Na continuidade, TECNOLOGIAS DIGITAIS NO ENSINO DA MATEMÁTICA: O USO DO APP "GOOGLE SALA DE AULA" COMO FACILITADOR DO PROCESSO DE ENSINO-APRENDIZAGEM compõe o terceiro capítulo autoral do livro, cujas reflexões e análises aprofundadas são desenvolvidas pelos pesquisadores Francisco Ronilso Rocha da Silva e Cleidiane de Carvalho Pereira, com ampla rigorosidade metodológico-científica também presente nos demais artigos científicos. Em última instância, compondo o quarto capítulo da obra em foco, o autor-organizador Marcos Pereira dos Santos apresenta o artigo científico intitulado REFLEXÕES SOBRE O PROCESSO ENSINO-APRENDIZAGEM DE MATEMÁTICA BÁSICA NA ESCOLA E EM CURSOS SUPERIORES DE GRADUAÇÃO NO BRASIL CONTEMPORÂNEO, que, de forma verossimilhante aos três temas abordados anteriormente, consiste em uma discussão acadêmica atual e pertinente na pós-modernidade. Sem mais delongas, desejamos com ardor que os artigos científicos compilados nesta obra literária, de valor sociocultural incalculável, possam ser lidos, relidos, trelidos e (re)utilizados de modo abrangente nos dias atuais e em todos os tempos por todos(as) aqueles(as) que fazem uso de

conhecimentos e saberes matemáticos na vida pessoal, cotidiana e profissional; bem como, e de modo muito particular, aos(às) que ensinam, aprendem e ensinam-e-aprendem Matemática, no Brasil, nas escolas de Educação Básica e instituições de Educação Superior em geral. Por ora, é isto o que temos a declarar em breves palavras. Que cada leitor(a) aproveite ao máximo e positivamente as concepções educacionais aqui expostas: eis o que almejamos com total sinceridade! Abraço fraterno!!!
