Toward Sustainable Agricultural Systems in the 21st Century
Georgetown University Press

The assault on North Africa on 8 November 1942 led to a bitter conflict that finally culminated in the defeat of the Axis forces in Tunisia seven months later. The campaign was, for the U.S. Army, a school in coalition warfare and an introduction to enemy tactics. *Les temps sauvages* Editions Gallimard

The Early Settlement of North America is an examination of the first recognisable culture in the New World: the Clovis complex. Gary Haynes begins his analysis with a discussion of the archaeology of Clovis fluted points in North America and a review of the history of the research on the topic. He presents and evaluates all the evidence that is now available on the artefacts, the human populations of the time, and the environment, and he examines the adaptation of the early human settlers in North America to the simultaneous disappearance of the mammoths and mastodons. Haynes offers a compelling re-appraisal of our current state of knowledge about the peopling of this continent and provides a significant new contribution to the debate with his own integrated theory of Clovis, which incorporates vital new biological, ecological, behavioural and archaeological data.

A Brief History of Islam in Europe Le lion Patricia vit avec ses parents dans une réserve naturelle du Kenya. Initiée aux secrets de la brousse par son père, elle a apprivoisé un lionceau, King. Que deviendra cette amitié quand l'animal atteindra l'âge adulte? Pour le savoir, laissez-vous guider par le narrateur du Lion au coeur du pays des Masaï... Une histoire d'amitié passionnante dans un univers envoûtant. Le Lion The Crew

Felix Kersten, physician to the high-demon of the Third Reich, Heinrich Himmler could alleviate Himmler's severe stomach pains with his hands using massage and manipulation. In return, Kersten bargained with Himmler to order the release of innocent prisoners condemned to die. It is an amazing story of the good-natured little fat man who looked like a "cross between a Flemish burgomaster and a Buddha of the West," studied the higher curative powers of massage under a lama-doctor Ko, and applied them to Himmler whose excruciating stomach aches were only relieved by Kersten's therapy. During the five years to come, Kersten attended Himmler but was an alien by birth and sympathies among his entourage, with the one exception of Himmler's private secretary who collaborated with him in drawing up the lists of doomed men—Jehovah's Witnesses, Jews, concentration camp victims of all nationalities. At the close, Kersten was jockeying with Himmler (and when persuasion failed, withholding treatment) to try and secure mass scale liberation of victims first through Sweden, then Switzerland.... Kersten is fascinating to follow-through his circumspect, ambivalent

career—even though there may be points in question at its close.—KIRKUS Review

Great Commanders [Illustrated Edition] Routledge

The heart-pounding history of how Pope Pius XII -- often labeled "Hitler's Pope" -- was in fact an anti-Nazi spymaster, plotting against the Third Reich during World War II. The Vatican's silence in the face of Nazi atrocities remains one of the great controversies of our time. History has accused wartime pontiff Pius the Twelfth of complicity in the Holocaust and dubbed him "Hitler's Pope." But a key part of the story has remained untold. Pope Pius in fact ran the world's largest church, smallest state, and oldest spy service. Sainly but secretive, he sent birthday cards to Hitler -- while secretly plotting to kill him. He skimmed from church charities to pay covert couriers, and surreptitiously tape-recorded his meetings with top Nazis. Under his leadership the Vatican spy ring actively plotted against the Third Reich. Told with heart-pounding suspense and drawing on secret transcripts and unsealed files by an acclaimed author, Church of Spies throws open the Vatican's doors to reveal some of the most astonishing events in the history of the papacy. Riebling reveals here how the world's greatest moral institution met the greatest moral crisis in history.

Montmartre au petit jour. Chaque matin, l'auteur, attablé au Sans-Souci, voit passer une femme dans la rue. Elsa Wiener, il l'apprendra bientôt, a fui l'Allemagne. Son mari Michel y est resté, enfermé dans un camp. Elle chante dans les boîtes de nuit. Elle vit seule avec un enfant juif, Max, que les nazis ont rendu infirme. On suit avec fascination la lente chute d'Elsa, sa déchéance, au nom d'un amour qui n'existe peut-être pas. Avec le portrait de cette passante des aubes transies de Pigalle, Kessel semble dire adieu au Paris des années folles. Ce livre, publié en 1936, parlait pour la première fois sans doute des camps de concentration hitlériens.

The crew of a French reconnaissance plane during WW1 consisted of just two men: a pilot and an observer. Two such men are Jean Herbillon and Claude Maury. Herbillon's dreams of glory as an air ace have been dashed after only a few months at the front; Maury suffers from a broken heart--his only hope is that his exploits as a pilot will win back his lost love. Together the two form one of the best crews in the air, fighting in the first aerial conflict in history--one in which a combatant can count his life expectancy in weeks. The pressure of war forges a strong bond between the two flyers, but can it survive the discovery that they are both in love with the same woman? Joseph Kessel's autobiographical novel is a staggering tale of courage, brotherhood and loss.

The Everything Store Springer Nature

Historians have tried time and again to identify the central issues of the conflict which devastated Europe between 1618 and 1648.

The Thirty Years War by Ronald G. Asch puts the religious and constitutional struggle in the Holy Roman Empire squarely back into the centre of events. However, other issues are not neglected. Thus the problems of war finance are shown to be an important key to the interaction between inter-state and domestic conflicts during the war. Equally confessional tensions are analysed as a decisive factor linking international and domestic disputes, and the reader is provided with a succinct narrative account concentrating on the major turning points of the war.

Historical Perspectives of the Operational Art, a companion volume to Clayton R. Newell's and Michael D. Krause's *On Operational Art*, captures the doctrinal debate over the evolving concept of operational art-the critical link between strategy and tactics-in the face of the new complexities of warfare and the demands of irregular operations in the twenty-first century. Consisting of fifteen original essays selected and edited by Michael D. Krause in collaboration with R. Cody Phillips, the well-organized anthology presents the collective view of distinguished military historians and scholars that operational art must be adjusted to accommodate the changing circumstances happening around the world, especially when dealing with broad coalitions and alliances in regional environments and at an international level. One of the great seats of learning and repositories of knowledge in the ancient world, Alexandria, and the great school of thought to which it gave its name, made a vital contribution to the development of intellectual and cultural heritage in the Occidental world. This book brings together twenty papers delivered at a symposium held at the J. Paul Getty Museum on the subject of Alexandria and Alexandrianism. Subjects range from "The Library of Alexandria and Ancient Egyptian Learning" and "Alexander's Alexandria" to "Alexandria and the Origins of Baroque Architecture." With nearly two hundred illustrations, this handsome volume presents some of the world's leading scholars on the continuing influence and fascination of this great city. The distinguished contributors include Peter Green, R. R. R. Smith, and the late Bernard Bothmer.

Story in Children's Lives: Contributions of the Narrative Mode to Early Childhood Development, Literacy, and Learning Editions Gallimard

A Dictionary of Moroccan Arabic presents, in a range, the core vocabulary of everyday life in Morocco - from the kitchen to the mosque, from the hardware store to the natural world of plants and animals. It contains myriad examples of usage, including formulaic phrases and idiomatic expressions. Understandable throughout the nation, it is based primarily on the standard dialect of educated Moroccans from the cities of Fez, Rabat, and Casablanca. All Arabic citations are in an English transcription,

making it invaluable to English-speaking non-Arabists, travelers, and tourists - as well as being an important resource tool for students and scholars in the Arabic language-learning field.

Alexandria and Alexandrianism Getty Publications

The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as "the definitive account of how a tech icon came to life." Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

The Ardennes Indiana University Press

This book is based on the power of stories to support children in all areas of their lives. It examines the role narratives can play in encouraging growth in contexts and domains such as personal and family identity, creative movement, memory and self-concept, social relationships, or developing a sense of humor. Each chapter describes innovative and research-based applications of narratives such as movement stories, visual narratives to develop historical thinking, multimodal storytelling, bibliotherapy, mathematics stories, family stories, and social narratives. The chapters elaborate on the strength of narratives in supporting the whole child in diverse contexts from young children on the autism spectrum improving their social skills at school, to four- and five-year-olds developing historical thinking, to children who are refugees or asylum-seekers dealing with uncertainty and loss. Written by accomplished teachers, researchers, specialists, teaching artists and teacher educators from several countries and backgrounds, the book fills a gap in the literature on narratives. "...this work delves into the topic of narratives in young children's lives with a breadth of topics and depth of study not found elsewhere." "Collectively, the insights of the contributors build a convincing case for emphasizing story across the various disciplines and developmental domains of the early childhood years." "The writing style is scholarly, yet accessible. Authors used a wide array of visual material to make their points clearer and show the reader what meaningful uses of story "look like"." Mary Renck Jalongo, Journal and Book Series Editor Springer Indiana, PA, USA

Why is Landscape Beautiful? Pickle Partners Publishing

Trois nouvelles composent ce recueil. La première se déroule dans l'Irlande déchirée par la guerre : Mary de Cork arme la main de son fils et l'engage, pour raison politique, à commettre un parricide. La deuxième se passe en Russie : on prête à Nestor Ivanovitch Makhno toutes les audaces, toutes les cruautés, mais, un jour, une jeune fille juive lui tient tête. Dans le dernier récit, nous sommes à Paris, l'hiver : Sogoub a froid, il entre chez des émigrés russes - c'est un être vil, un déclassé douteux. Mary, Makhno, Sogoub sont pourtant des cœurs purs, car, selon Kessel, les cœurs instinctifs sont purs sans qu'intervienne aucune notion morale, purs à la manière d'un vin, d'une pierre ou d'un poison, purs par leur violence et leur intégrité.

Dynamics in Action Bloomsbury Publishing

This book presents recent research in intelligent and fuzzy techniques. Emerging conditions such as pandemic, wars, natural disasters and various high technologies force people for significant changes in business and social life. The adoption of digital technologies to transform services or businesses, through replacing non-digital or manual processes with digital processes or replacing older digital technology with newer digital technologies through intelligent systems is the main scope of this book. It focuses on revealing the reflection of digital transformation in our business and social life under emerging conditions through intelligent and fuzzy systems. The latest intelligent and fuzzy methods and techniques on digital transformation are introduced by theory and applications. The intended readers are intelligent and fuzzy systems researchers, lecturers, M.Sc. and Ph.D. students studying digital transformation. Usage of ordinary fuzzy sets and their extensions, heuristics and metaheuristics from optimization to machine learning, from quality management to risk management makes the book an excellent source for researchers.

The Lion and the Rose Little, Brown

Sacred Natural Sites are the world's oldest protected places. This book focuses on a wide spread of both iconic and lesser known examples such as sacred groves of the Western Ghats (India), Sagarmatha /Chomolongma (Mt Everest, Nepal, Tibet - and China), the Golden Mountains of Altai (Russia), Holy Island of Lindisfarne (UK) and the sacred lakes of the Niger Delta (Nigeria). The book illustrates that sacred natural sites, although often under threat, exist within and outside formally recognised protected areas, heritage sites. Sacred natural sites may well be some of the last strongholds for building resilient networks of connected landscapes. They also form important nodes for maintaining a dynamic socio-cultural fabric in the face of global change. The diverse authors bridge the gap between approaches to the conservation of cultural and biological diversity by taking into account cultural and spiritual values together with the socio-economic interests of the custodian communities and other relevant stakeholders.

The Horsemen Birkhäuser

Includes 3 maps and 7 illustrations The command of military forces in combat is unlike any other field of human endeavor. If war is the ultimate form of human competition, then the commander is the ultimate competitor. The commander operates in an environment of chance, uncertainty, and chaos, in which the stakes are, quite literally, life and death. He or she contends against an adversary who is using every means, fair or foul, to foil his plans and bring about his defeat. The commander is ultimately responsible for every variable that factors into military success or failure-training, logistics, morale, equipment, planning, and execution. The commander reaps the lion's share of plaudits in victory, but also must accept the blame in defeat, warranted or not. Very often the line that separates fame and ignominy is slender indeed. It is not difficult to identify "great" commanders, though the overwhelming majority of generals who win battles are never considered "great." Something more than a favorable ratio of wins to losses is needed to establish greatness...The truly great commander is generally considered to be one who attains the unexpected or the unprecedented; one who stands above his contemporaries through his skill on the battlefield, or through the

sheer magnitude of his accomplishments. ...The commanders selected were masters of warfare in their particular time and environment. Each capitalized upon the social, political, economic, and technological conditions of his day to forge successful military forces and win significant and noteworthy victories that profoundly altered the world in which he lived.-Dr Christopher R. Gabel. The Great Commanders covered by this volume are Alexander the Great, Genghis Khan, Napoleon, John J. Pershing, Erwin Rommel and Curtis E. LeMay
The Man With The Miraculous Hands National Academies Press
Lucius Burckhardt (1925-2003) taught architectural theory at Kassel University and, in the 1980s, coined the term "Promenadology" or the science of Strollology and developed this into a complex and far-sighted planning and design discipline. Given that "the landscape" as an idea only exists in our heads, Burckhardt's writings (and drawings) are not so much concerned with beautiful vistas, but focus instead on the multi-faceted interaction a simple walk-taker has with his environment. To those who observe the environment with their eyes wide open, interesting questions will arise again and again; for example, why "city" and "country" can no longer be separated so easily in the face of progressive urbanization. Or why we consider a viaduct to be beautiful, but a nuclear power station an intrusion. And also, why gardens are works of art and should therefore be appraised as such. This book contains 28 texts by the design and planning critic, for the first time in English, with the focus on landscapes, gardens as an art form and the science of strollology.

Inselbergs Fordham Univ Press

The book compiles the research works related to smart solutions concept in context to smart energy systems, maintaining electrical grid discipline and resiliency, computational collective intelligence consisted of interaction between smart devices, smart environments and smart interactions, as well as information technology support for such areas. It includes high-quality papers presented in the International Conference on Intelligent Computing Techniques for Smart Energy Systems organized by Manipal University Jaipur. This book will motivate scholars to work in these areas. The book also prophesies their approach to be used for the business and the humanitarian technology development as research proposal to various government organizations for funding approval.

Le lion

The Catholic Church and the Holocaust, 1930-1965 Springer Nature

Burt Korall is widely recognized as the most authoritative writer on jazz drumming. His first book *Drummin' Men--The Heartbeat of Jazz: The Swing Era* is considered a classic. Now, in this exciting sequel, Korall offers a richly informative history of drumming in the Bebop era. Korall looks at this music through the eyes of the musicians themselves, covering a whole range of important jazz drummers, but focusing upon the most original and significant--principally Kenny Clarke, Max Roach, and Art Blakey. Korall provides a knowledgeable background about the history of bebop--and the unfortunate and almost universal heroin addiction that swept through the jazz world in the wake of Charlie Parker's habit. The book contains Korall's own memoir of nearly 50 years in the jazz world, linked by his narrative of the careers of these drummers and their place in the bebop jazz scene.
