Pressley assumes the reader knows the main results of multivariate calculus and concentrates on the theory of the study of surfaces. Used for courses on surface geometry, it includes intersting and in-depth examples and goes into the subject in great detail and vigour. The book will cover three-dimensional Euclidean space only, and takes the whole book to cover the material and treat it as a subject in its own right.

Sanford Meisner was one of the best known and beloved teachers of acting in the country. This book follows one of his acting classes for fifteen months, beginning with the most rudimentary exercises and ending with affecting and polished scenes from contemporary American plays. Written in collaboration with Dennis Longwell, it is essential reading for beginning and professional actors alike. Throughout these pages Meisner is a delight—always empathizing with his students and urging them onward, provoking emotion, laughter, and growing technical mastery from his charges. With an introduction by Sydney Pollack, director of *Out of Africa* and *Tootsie*, who worked with Meisner for five years. "This book should be read by anyone who wants to act or even appreciate what acting involves. Like Meisner's way of teaching, it is the straight goods."—Arthur Miller "If there is a key to good acting, this one is it, above all others. Actors, young and not so young, will find inspiration and excitement in this book."—Gregory Peck
