The Analysis of Biological Data provides students with a practical foundation of statistics for biology students. Every chapter has several biological or medical examples of key concepts, and each example is prefaced by a substantial description of the biological setting. The emphasis on real and interesting examples carries into the problem sets where students have dozens of practice problems based on real data. The third edition features over 200 new examples and problems. These include new calculation practice problems, which guide the student step by step through the methods, and a greater number of examples and topics come from medical and human health research. Every chapter has been carefully edited for even greater clarity and ease of use. All the data sets, R scripts for all worked examples in the book, as well as many other teaching resources, are available to qualified instructors (see below).

Poetry. Translated from the Romanian by many hands. Edited by Paul Doru Mugar with Adam J. Sorkin and Claudia Serea. The poetry included in this volume reflects the alienation and the crisis of communication brought by the so-called 'transition' period of the last twenty years in Romania from the beginning of the post-communist period in 1990 to the close of the first decade of the twenty-first century. This twenty-year span was defined not only by uncertainty and fears, social inequities and misery, but also by both an enthusiasm and a hope for the future that the recent inclusion of Romania in the European Union made real.-- from the introduction by Paul Doru Mugar This anthology includes poems by Cristian Popescu, Iaon Es. Pop, Mihai Gălățanu, Daniel Bănulescu, Floarea Țuțuianu, Radu Andriescu, Simona Popescu, Emilian Galaicu-Păun, Ruxandra Cesereanu, O. Nimigean, Constantin Acoșmei, Nicolae Coandă, Mihai Ignat, Marius Ianuș, Dumitru Crudu, Adina Dabija, Ștefan Bălan, Teodor Dună, Ruxandra Novac, Mugur Grosu, George Vasilevici, Ionana Nicolaie, Radu Vancu, Andrei Peniuc, Dan Sociu, Adrian Urmanov, Răzvan Țupa, Claudiu komartin, Elena Vlădăreanu, Dan Coman, Miruna Vlada, V. Leac, Svetlana Cârstean, T. S. Khasis, Gabi Eftimie, Marius Conkan, Andrei Gamart, Michel Martin, Aida Hancer, and Anonymous.

Figuring Age engages the virtually invisible subject of older women in western culture. Like other markers of social difference, age is given meaning by a culture. Yet unlike gender and race, the subjects of age and aging have received little sustained attention. Central to *Figuring Age* is the crucial question of how women are aged by culture. How are older women represented in a visual culture that is dominated by images of youth in television, film, and life performance? How do psychoanalysis, rejuvenation therapy and hormone replacement therapy, the fashion system, cosmetic surgery, and midlife bodybuilding shape our views of aging as well as of the older body itself? What is the "timing" of aging? To what extent is aging a culturally-induced trauma?
