Winner of 5 Book Awards in Literary Fiction Intrigue on the white sands of the Indian Ocean. From the award-winning author of Clifford's Spiral. A lonely widower from Los Angeles buys a tour package to East Africa on the promise of hookups and parties. What he finds instead are new reasons to live. Aldo Barbieri, a slick Italian tour operator, convinces Harry to join a group of adventuresome "voluntourists." In a resort town on the Indian Ocean, Harry doesn't find the promised excitement with local ladies. But in the supermarket he meets Esther Mwemba, a demure widow who works as a bookkeeper. The attraction is strong and mutual, but Harry gets worried when he finds out that Esther and Aldo have a history. They introduce him to Victor Skebelsky, rumored to be the meanest man in town. Skebelsky has a plan to convert his grand colonial home and residential compound into a rehab center - as a tax dodge. The scheme calls for Harry to head up the charity. He could live like a wealthy diplomat and it won't cost him a shilling! Harry has to come to terms with questions at the heart of his character: Is corruption a fact of life everywhere? Is all love transactional? Harry Harambee's Kenyan Sundowner is an emotional story of expat intrigue in Africa, reminiscent of The Heart of the Matter by Graham Greene and The Constant Gardener by John le Carré. *Construction Site Work, Site Utilities, and Substructures Databook* McGraw Hill Professional

Working Guide to Drilling Equipment and Operations offers a practical guide to drilling technologies and procedures. The book begins by introducing basic concepts such as the functions of drilling muds; types of drilling fluids; testing of drilling systems; and completion and workover fluids. This is followed by discussions of the composition of the drill string; air and gas drilling operations; and directional drilling. The book identifies the factors that should be considered for optimized drilling operations: health, safety, and environment; production capability; and drilling implementation. It explains how to control well pressure. It details the process of fishing, i.e. removal of a fish (part of the drill string that separates from the upper remaining portion of the drill string) or junk (small items of non-drillable metals) from the borehole. The remaining chapters cover the different types of casing and casing string design; well cementing; the proper design of tubing; and the environmental aspects of drilling. Sharing our stories, who we are, what we love, how we feel, why we fear, connects us to one another. Weaving moments of grace with spiritual practices that have grounded her through life's challenges, Laurie Blefeld invites the reader into her sacramental stories. You will find yourself in Laurie's stories and reclaim bits and pieces of your own. "Our days are a stream of moments - some devastating, some down to earth and some filled with ineffable meaning. Laurie Blefeld has written a book full of tender moments that warm the heart and remind us to be grateful for and conscious of how laced with grace our lives really are. This is a book to enjoy and treasure."-Gunilla Norris, author of Sheltered in the Heart and Companions on the Way: A Little Book of Heart-full Practices "Laurie's transformational stories, told in her authentic and lyrical voice, are evocative of the highs and lows in everyone's life. Laurie's generous prose connects us to her family's living history - and through it to our own. She is a natural spiritual teacher. Moments of Grace is luminous, warm, comforting and filled with such good practices."- Dr. Joan Borysenko, from the Foreword

Professionals, it is said, have no use for simple lists of virtues and vices. The complexities and constraints of professional roles create peculiar moral demands on the people who occupy them, and traits that are vices in ordinary life are praised as virtues in the context of professional roles. Should this disturb us, or is it naive to presume that things should be otherwise? Taking medical and legal practice as key examples, Justin Oakley and Dean Cocking develop a rigorous articulation and defence of virtue ethics, contrasting it with other types of character-based ethical theories and showing that it offers a promising new approach to the ethics of professional roles. They provide insights into the central notions of professional

detachment, professional integrity, and moral character in professional life, and demonstrate how a virtue-based approach can help us better understand what ethical professional-client relationships would be like.

Killer Sudoku (also called "Sums Sudoku", "Sums Number Place", "Samunamupure", "Kikagaku Nampure") is a puzzle that combines elements of Sudoku and Kakuro. Despite the name, the simpler killer sudokus can be easier to solve than regular sudokus, depending on the solver's skill at mental arithmetic, the hardest ones, however, can take hours to crack. In Killer Sudoku, sub-regions have specified sums, and no number can be repeated within a region.

The Proboscidea, of which only two species of elephant survive today, were one of the great mammalian orders of the Cenozoic. Their success over evolutionary time is reflected by their morphological and taxonomic diversity, their nearly worldwide distribution on every continent except Australia and Antarctica, and their persistence through nearly fifty million years. Their great past ability to migrate and to adapt to changing climatic conditions and interspecific competition provides a unique laboratory for the testing of evolutionary theories and development of new concepts. This is the first complete treatise on the evolution and palaeoecology of this group for half a century. It reviews their classification and phylogeny, the early differentiation of proboscideans, the major adaptive radiations and their evolutionary patterns, and the origins and current status of extant elephant species. Written by leading international experts, this is a major study documenting the record of terrestrial biodiversity.

Guide to Organic Reactions CarTech Inc A new and incisive analysis of the political viability of human rights, with an in-depth investigation of its largest violation: world hunger. Gonzalez-Pelaez develops John Vincent's theory of basic human rights within the context of the international political economy and demonstrates how the right to food has become an international norm enshrined within international law. She then assesses the international normative and practical dimensions of hunger in connection with international trade and poverty. Using the

society of states as the framework of analysis, she explores the potential that the current system has to correct its own anomalies, and examines the measures that can move the hunger agenda forward in order to break through its current stagnation.
