Volkswagen Beetle, Karmann Ghia Official Service Manual, Type 1 Eric Clearinghouse on Reading Defining propaganda as "efforts by special interests to win over the public covertly by infiltrating messages into various channels of public expression ordinarily viewed as politically neutral," this book argues that propaganda has become pervasive in American life. Pointing out that the 1990s society is inundated with propaganda from numerous sources (including government, business, researchers, religious groups, the news media, educators, and the entertainment industry) the book exposes these channels of propaganda and the cumulative effect they have on public opinion and the functioning of American democracy. Chapter 1 reviews materials on diverse vantage points from which American writers and opinion leaders have tried to reconcile mass persuasion with the democratic way of life during the 20th century. Chapters 2-6 examine propaganda in: (1) government (e.g., Federal Bureau of Investigation, aid to the Contras, Star Wars, presidential styles); (2) research and religion (e.g., national security, private sector, religion and politics); (3) news (e.g., getting good coverage, pressure groups, and business); (4) classroom (e.g., business propaganda, pressure groups, textbooks, pressures on teachers); and (5) entertainment (e.g., film, television). Chapters 7 and 8 question: (1) what action a democratic people should take to safeguard intelligent discussion and free choice from the taint of devious communication; (2) to what extent propaganda casts a shadow over public life; and (3) whether large-scale, engineered persuasion can ever be squared with the ideal of democratic public deliberation. Extensive chapter notes and an index are included. (NKA)

An exclusive look at one of the world's most successful and controversial companies, and the mysterious family behind it. BMW is arguably the most admired carmaker in the world. It's financial performance is the envy of its competitors, and BMW products inspire near-fanatical loyalty. While many carmakers struggle with falling sales, profits and market share, demand for BMWs continues to grow, frequently outpacing production. Now, David Kiley-Detroit Bureau Chief at USA Today and author of Getting the Bugs Out, which covered Volkswagen's demise and rebirth, goes inside the fabled German automaker to see how it does what it does so well. With unprecedented access to BMW executives, Kiley goes behind the walls of BMW's famed "Four Cylinders" headquarters in Munich at a time when the company is in its most aggressive, and some say riskiest, expansion in its history and when some of the company's new products, like the 7 Series sedan and Z4 roadster, are for the first time drawing as many barbs from critics as bouquets. Kiley covers intimate details of the boardroom drama surrounding the company's nearly disastrous acquisition and subsequent sale of the British Rover Group and its expansion into selling MINI and Rolls Royce cars. Besides being a world-class carmaker, BMW is also considered one of the smartest consumer marketing companies and Kiley explores the extraordinary value and management of the BMW brand mystique. He also takes a revealing look at the mysterious and ultra-private Quandt family of Bad Homburg Germany, which owns a controlling stake in BMW: Johanna and Susanne Quandt, two of

the wealthiest women in Europe and Stefan Quandt, one of the wealthiest bachelors on the continent. David Kiley (Ann Arbor, MI) is the Detroit Bureau Chief at USA Today who has covered the auto industry for 17 years. He has been featured on Nightline, CNBC, CNN, MSNBC, NPR and the Today show. He is also the author of Getting the Bugs Out: The Rise, Fall, and Comeback of Volkswagen in America (0-471-26304-4), also available from Wiley.

This book explains, compares and assesses the legal implications of Dieseltgate within a range of selected jurisdictions and at the EU, international and comparative law level. The book analyses the US EPA-VW \$14.7 billion dollar settlement of 2016, one of the largest civil settlements in the history of environmental law. As it shows, the Dieseltgate affair has raised a host of issues concerning corporate and social responsibility, tort liability, environmental liability, contractual

defective products, warranty, and false environmental claims in a range of jurisdictions. Issues like repurchasing or retrofitting cars from consumers and making direct payments to consumers through car buy-backs and compensation are analysed. Further, the book relates how Dieseltgate has also contributed to the discussion about the introduction of more effective collective measures of redress for consumers, such as class actions, in Germany, France, Italy and the UK. The book subsequently reviews the criminal offences Volkswagen is currently confronted with in Germany, France and Italy, i.e. fraud and manipulation of capital markets (by belatedly providing shareholders with essential information relevant for the share value), and, potentially, environmental crimes. It demonstrates how Dieseltgate has sparked new debates in Germany, Italy, France and the UK about the need to introduce enterprise liability for organised crimes, lack of compliance and control structures, and intentional violations of the law. Lastly, the book discusses how EU law has sought to respond to Dieseltgate and thus investigates the controversial EU Regulation No. 2016/646 introducing a "temporary conformity factor" of 2.1 (equivalent to a 110% increase on the current limit) to be applied for NOx in the new RDE testing cycle, and the works of the EU committee of inquiry into Emissions Measurements in the Automotive Sector (EMIS).
