It is a pleasure to contribute the foreword to Introduction to Cell and Tissue Culture: Theory and Techniques by Mather and Roberts. Despite the occasional appearance of thoughtful works devoted to elementary or advanced cell culture methodology, a place remains for a comprehensive and definitive volume that can be used to advantage by both the novice and the expert in the field. In this book, Mather and Roberts present the relevant methodology within a conceptual framework of cell biology, genetics, nutrition, endocrinology, and physiology that renders technical cell culture information in a comprehensive, logical format. This allows topics to be presented with an emphasis on troubleshooting problems from a basis of understanding the underlying theory. The material is presented in a way that is adaptable to student use in formal courses; it also should be functional when used on a daily basis by professional cell culturists in academia and industry. The volume includes references to relevant Internet sites and other useful sources of information. In addition to the fundamentals, attention is also given to modern applications and approaches to cell culture derivation, medium formulation, culture scale-up, and biotechnology, presented by scientists who are pioneers in these areas. With this volume, it should be possible to establish and maintain a cell culture laboratory devoted to any of the many disciplines to which cell culture methodology is applicable.

The biotechnology business in India with an increase from USD 500 million in 1997 and reaching an estimated USD 1 billion next

year health related products accounting for 60%, agro and veterinary products together 15%, and contract R&D, reagents, devices and supplies adding up to the remaining 25% of which the diagnostics share was about 10% of the total surely presented an encouraging picture even five years ago. While volumes have increased, the pattern has not. According to a report, prepared by McKinsey & Co, India's Pharmaceutical industry including domestic and export sales and contract services totals nearly USD 5 billion. Furthermore, the company optimistically projects the growth to a factor of five fold only if both the industry and the government are able to put in place achievable solutions that must take care of the formidable obstacles preventing further growth. If this assessment is correct, then the established transformation made by IT growth should also provide the confidence required by the high expectations for biotechnology which have arisen in the country in recent years. Some contributors to this are overenthusiastic these are bureaucrats, some retired scientists and of course the complacent politicians who have the least knowledge of what the new biotechnology is all about. However, there are clear indications of biotechnology growth demonstrated by a few but rapidly expanding biotech companies such as Biocon Ltd, Shantha Biotech (P) Ltd, Dr.

Biotechnology in India I Disha Publications

A study of science and scientific theories and laws is almost incomplete without relevant and methodical Experiments. In fact Experiments are an inseparable part of any Scientific Study or Research. In this book, the author has tried to simplify science to the readers, particularly the school going students through easy and interesting experiments. All the experiments given in the book are based on some scientific phenomena or other such as atmospheric pressure high and low temperatures boiling freezing and melting points of solids liquids and gases gravitational force magnetism electricity solubility of substances etc. Thus read each of these fun-filled experiments and carry it out in your homes or schools under the supervision and guidance of your teachers, parents or elders. The language used in the book is simple and all the experiments have been illustrated with relevant diagrams and methodical steps strictly based on scientific facts. So children, grab this book as fast as you can to satisfy your scientific curiosities by performing these incredible experiments and learning science with fun. #v&spublishers
