Verbal Reasoning Invincible Publishers
In Religion and the Making of Nigeria, Olufemi Vaughan examines how Christian, Muslim, and indigenous religious structures have provided the essential social and ideological frameworks for the construction of contemporary Nigeria. Using a wealth of archival sources and extensive Africanist scholarship, Vaughan traces Nigeria's social, religious, and political history from the early nineteenth century to the present. During the nineteenth century, the historic Sokoto Jihad in today's northern Nigeria and the Christian missionary movement in what is now southwestern Nigeria provided the frameworks for ethno-religious divisions in colonial society. Following Nigeria's independence from Britain in 1960, Christian-Muslim tensions became manifest in regional and religious conflicts over the expansion of sharia, in fierce competition among political elites for state power, and in the rise of Boko Haram. These tensions are not simply conflicts over religious beliefs, ethnicity, and regionalism; they represent structural imbalances founded on the

religious divisions forged under colonial rule.

translation is widely considered to be the foremost in conveying the meaning and sensibility of the original Arabic text, making this edition a must-have for English readers with a budding interest in Islamic studies and veteran scholars alike.

151 Essays YOUTH COMPETITION TIMES

This book specifies the foundation for Adapted Primary Literature (APL), a novel text genre that enables the learning and teaching of science using research articles that were adapted to the knowledge level of high-school students. More than 50 years ago, J.J. Schwab suggested that Primary Scientific Articles "afford the most authentic, unretouched specimens of enquiry that we can obtain" and raised for the first time the idea that such articles can be used for "enquiry into enquiry". This book, the first to be published on this topic, presents the realization of this vision and shows how the reading and writing of scientific articles can be used for inquiry learning and teaching. It provides the origins and theory of APL and examines the concept and its importance. It outlines a detailed description of creating and using APL and provides examples for the use of the enactment of APL in classes, as well as descriptions of possible future prospects for the implementation of APL.

Altogether, the book lays the foundations for the use of this authentic text genre for the learning and teaching of science in secondary schools.

The non-Newtonian calculi provide a wide variety of mathematical tools for use in science, engineering, and mathematics. They appear to have considerable potential for use as alternatives to the classical calculus of Newton and Leibniz. It may well be that

these calculi can be used to define new concepts, to yield new or simpler laws, or to formulate or solve problems.

Fast Track Objective Arithmetic Dorling Kindersley Ltd

This valuable work on the methodology of exegesis by Dr. Recep Dogan will serve as an important source of future works in the field. With his expertise in the history and exegesis of the Qur'an, as well as his familiarity and comprehensive understanding of Islamic disciplines, Dr. Dogan has managed to combine both classical and modern acquis. Presenting a variety of different approaches, Dr. Dogan also offers a broad range of Western approaches in reading the Qur'an.
