Resin model kits and conversion parts allow modellers to build unusual and obscure aircraft and aircraft variations. However, working with resin requires different techniques and materials that modellers may not be familiar with. Using step-by-step construction photos and a detailed text, this book gives modellers the information they need to confidently tackle any resin model aircraft project. Coverage includes a discussion of what resin is and how castings are produced, along with specific construction techniques, detailed information on tools and airbrushes, scales, glues and paints, conversions, resin and bare metal and how to properly display finished models. The techniques shown apply to any resin model kit or conversion, and much of the information applies to all model types and materials. With very little information available to help modellers build resin kits, this book will fill a gap on the shelves of many aero modellers.

much at the same time! This new book is excellent for any age group be they young or old. This is absolutely A MUST READ! I can only imagine (and look forward to) what book number three will be like!" - Bob Aberle, AMA 215, Technical Editor, Model Aviation magazine "I was really hoping Carlos' next book would be informative, entertaining, helpful, and have a brilliant educational aspect for RC flying hobbyists. However, this book didn't quite do this; it was BEYOND these expectations! Carlos kicks out another winner with this one. Yes, you can have entertaining and helpful media in RC other than podcasts!" - Jamie Burke, Host, www.AllThingsThatFly.com "Invading the mind of a designer is an intriguing adventure. After reading just the first chapter about the goals, along with what did and didn't work on the prototypes, I was eager to read on to see how the modified design worked out. Carlos continues by explaining what considerations were used, and how they were derived, to pick a "Winner" from the many prototypes. I carefully studied Carlos' ideas and techniques and learned a lot about designing this type of plane. I am so excited about the design that I just have to build one to try it out. - Ken Myers, Editor, The Ampeer
