Edmund Basseni is a small business owner, a body shop guy who pieces together the parts of car engines and their housings, motor and chassis. And he is also a hired assassin, a mechanic who does jobs as easily and flawlessly as he puts together a 383 hemi into a collectible Dodge. Vinnie, as he is called by friend and foe alike, has a problem. He has suffered a severe wound to his forearm, which leads to the hands and fingers that do the terrible job of "whacking" a wrong doer. After the accident he must piece his life together again and make it right; and in Vinnie's world morality is a very important issue. There is justice and retribution and a code of honor that drives this good fellow to commit murder and mayhem. After an extensive period of rehab and strengthening, the shattered Vinnie is determined to pick up his weapon of choice, A Browning pistol, and return to the glory and privilege of his former world. He is also not exactly an outsider. As an insider and operative in the shady world of finance and extortion, he owes people and is obliged to do their biddings. If he is ready; and Vinnie is in the process of getting ready. Bored with the tedium of reconstructing cars, he meets a very hot and sweet, but "married to the mob" young lady named Elizabeth. This slowly and inexorably develops into a "relationship" for them, but in the process of getting involved with Elizabeth, Vinnie meets and greets women in various places—forest, city and bar—and has some very steamy, and somewhat psychotic, sexual encounters. Vinnie and Alan conspire in a plot that is recreated about four times. Each job is a work of art, and that is Vinnie's approach to his work. There is an interesting dynamic to their friendship, since they're kind of bonded in the blood and iron of their work—organized criminal activity that is ruthless and business like, with violence and violent language a big part of their argot. Finally, the job is completed, and Vinnie, in the final scene in the novel, realizes a fractured dream of completion that is simply a continuation of the bizarre life he cannot seem to extricate himself from, no matter how hard he tries.

The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial

services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets of the automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM.

The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. It is a joint work between the United States, Canada, and Mexico that allows a high level of comparability between the countries. The NAICS officially replaced the SIC (Standard Industrial Classification) system in 1997. The publisher has included the SBA Size Standards Table as an appendix at the back of this book to assist users of the data. Automotive Technician Training is the definitive student textbook for automotive engineering. It covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is ideal for courses and exams run by other awarding bodies. This revised edition overhauls the coverage of

general skills and advanced diagnostic techniques. It also includes a new chapter about electric and hybrid vehicles and advanced driver-assistance systems, along with new online learning activities. Unlike current textbooks on the market, this takes a blended-learning approach, using interactive features that make learning more enjoyable and effective. It is ideal to use on its own but when linked with IMI eLearning online resources, it provides a comprehensive package that includes

activities, video footage, assessments and further reading. Information and activities are set out in sequence to meet teacher and learner needs, as well as qualification requirements.
