This revised and augmented edition of four mythological tales translated from Ovid during the Elizabethan period calls attention to the genre of the epyllion and suggests a possible literary influence on later poets and playwrights such as Marlowe and Shakespeare. Indeed, while openly concerned with the central theme of metamorphosis, these short narrative poems express deep male anxiety about female desire. Elizabethan epyllia always seemed prone to renegotiate the

orthodoxy of early modern desire in a masculine, somewhat misogynous sphere, addressing the issues of mutability in a world of large-scale social changes. Finally, beyond the restricted readership of the spheres of the Inns of court for which they were originally intended, these works reached a much wider audience. And as students of early modern English poetry and Renaissance scholars in general are likely to find out, these witty poetic variations and rhetorical displays represent a real embarrassment of riches.

To write history is to consider how to explicate the past, to weigh the myriad possible approaches to the past, and to come to terms with how the past can be and has been used. In this book, prize-winning historian Jeremy Black considers both popular and academic approaches to the past. His focus is on the interaction between the presentation of the past and current circumstances, on how history is used to validate one view of the present or to discredit another, and on readings of the past that unite and those that divide. Black opens with an account that underscores the differences and developments in traditions of writing history from the ancient world to the present.

Subsequent chapters take up more recent decades, notably the post-Cold War period, discussing how different perspectives can fuel discussions of the past by individuals interested in shaping public opinion or public perceptions of the past. Black then turns to the possible future uses of the then past as a way to gain perspective on how we use the past today. *Clio's Battles* is an ambitious account of the engagement with the past across world history and of the clash over the content and interpretation of history and its implications for the present and future.

In the 1980s, George Marcus spearheaded a major critique of cultural anthropology, expressed most clearly in the landmark book *Writing Culture*, which he coedited with James Clifford. *Ethnography through Thick and Thin* updates and advances that critique for the late 1990s. Marcus presents a series of penetrating and provocative essays on the changes that continue to sweep across anthropology. He examines, in particular, how the discipline's central practice of ethnography has been changed by "multi-sited" approaches to anthropology and how new research patterns are transforming anthropologists' careers. Marcus rejects the view, often expressed, that these changes are undermining anthropology. The combination of traditional ethnography with scholarly experimentation, he argues, will only make the discipline more lively and diverse. The book is divided into three main parts. In the first, Marcus shows how ethnographers' tradition of defining fieldwork in terms of peoples and places is now being challenged by the need to study culture by exploring connections, parallels, and contrasts among a variety of often seemingly incommensurate sites. The second part illustrates this emergent multi-sited condition of research by reflecting it in some of Marcus's own past research on Tongan elites and dynastic American fortunes. In

the final section, which includes the previously unpublished essay "Sticking with Ethnography through Thick and Thin," Marcus examines the evolving professional culture of anthropology and the predicaments of its new scholars. He shows how students have increasingly been drawn to the field as much by such powerful interdisciplinary movements as feminism, postcolonial studies, and cultural studies as by anthropology's own traditions. He also considers the impact of demographic changes within the discipline--in particular the fact that anthropologists are no longer almost exclusively Euro-Americans studying non-Euro-Americans. These changes raise new issues about the identities of anthropologists in relation to those they study, and indeed, about what is to define standards of ethnographic scholarship. Filled with keen and highly illuminating observations, *Ethnography through Thick and Thin* will stimulate fresh debate about the past, present, and future of a discipline undergoing profound transformations.

The treatment of ophthalmologic diseases with TCM is a unique specialty in which most practitioners of Chinese medicine have little confidence in eye diseases, occurring independently or as a complication of other diseases, plague millions around the world and can sometimes lead to blindness. Using the benefits of Chinese medicine to facilitate recovery or alleviate suffering from this category of often debilitating disease is a wonderful gift to share with all medical professionals. With the aid of this carefully edited text representing the standard TCM approach to treating eye disorders in China, doctors of Chinese medicine can now learn how to

effectively treat or slow the progression of eye diseases. We are sorry that the DVD content are not included.

Clio's Warriors examines how the Canadian world war experience has been constructed and reconstructed over time. Tim Cook elucidates the role of historians in codifying the sacrifice and struggle of a generation as he discusses historical memory and writing, the creation of archives, and the war of reputations that followed each of the world wars on the battlefield. Only recently have military historians pushed the discipline to explore the impact of war on society. In analyzing where the practice of academic military history has come from and where it needs to go, *Clio's Warriors* plays a vital role in the ongoing challenge of writing critical history.

A 'coach' is more than just somebody who leads in the organisation and delivery of structured sport. The role of a coach goes beyond leadership, requiring an understanding of theories of teaching and learning. To become a coach you must know how people learn. *Becoming a Sports Coach* aims to introduce the multi-dimensional and inter-locking knowledge bases that any aspiring coach will need to develop, and that any established coach needs to master in order to improve their professional practice. While traditional coach education pathways have focused on what to coach, this book argues that understanding how knowledge can be communicated to learners is just as important. Asking why we coach, through critical reflection and self-knowledge, is also an essential part of

the process of becoming a sports coach.

The book explores three types of knowledge – content knowledge, pedagogic knowledge and self-knowledge – challenging the reader to reflect on their own coaching experiences and to develop a personal philosophy of coaching. It explores key pedagogic themes in contemporary coaching studies, such as humanistic coaching, inclusive practice, coaching for understanding, and the athlete-coach relationship. Real case studies are used to illuminate the ways – transferrable across sports – in which coaches can apply theory to practice and ultimately enhance their work. With contributions from leading coaching researchers and practitioners, combining practical guidance with important theoretical insights, this book will help any coaching student or developing professional to better understand the journey to becoming an effective sports coach.

Soon after the death of Alexander the Great, the priest Berossus wrote the first known narrative and comprehensive history of his native Babylon, and the priest Manetho likewise wrote the first such history of his native Egyptian

civilization. Nothing like these histories had been produced before in these cultures. Clio's Other Sons considers why that is: why were these histories written at this point, and for what purposes? Berossus and Manetho operated at the crossings of several political, social, and intellectual worlds. They were members of native elites under the domination of Macedonian overlords; in their writings we can see suggestions that they collaborated in the foreign rule of their lands, but at the same time we see them advocating for their cultures. Their histories were written in Greek and betray active engagement with Greek historical writing, but at the same time these texts are clearly composed from native records, are organized along lines determined by local systems of time-reckoning, and articulate views that are deeply informed by regional scholarly and wisdom traditions. In this volume John Dillery charts the interactions of all

these features of these historians. An afterword considers Demetrius, the approximate contemporary of Berossus and Manetho in time, if not in culture. While his associates wrote new histories, Demetrius' project was a rewriting of an existing text, the Bible. This historiographical "corrective" approach sheds light on the novel historiography of Manetho and Berossus.
