POWERS KYLER

Industrial Transformation in the Developing World Routledge

"An examination of how dictators and democrats in Indonesia, Malaysia and Thailand built and sustained pro-growth political coalitions"--

In the Shadow of the Rising Sun Routledge

'Grow first, clean up later' environmental strategies in the developing economies of East Asia - China, Korea, and Taiwan in Northeast Asia and Indonesia, Malaysia, the Phillippines, Singapore, Thailand and Vietnam in Southeast Asia - pose a critical regional and global sustainability challenge in this area of continuing rapid urban-based industrial growth. It is the most polluted region in the world. Whilst being at the leading edge of the processes of urbanization, industrialization, and globalization these economies are in the midst, not at the end, of their urban-industrial transformations. During the next 25 years urban populations in the region are expected roughly to double, and most of the industrial capital stock that will be on the ground by 2030 has not yet been built. Given East Asia's growing size in the world's economy and ecology, and its increasingly polluted environment, this looming urban-industrial transformation is both a challenge and an opportunity. Unless steps are taken now to make this transformation more sustainable, East Asia's, and the world's, environmental future is likely to deteriorate seriously. Using detailed case studies and rigorous empirical analyses Rock and Angel, leading experts in this field, show that East Asian governments have found institutionally unique ways to overcome the sustainability challenge. As a result of these findings, they demonstrate how even low income economies in the rest of the world can use regulatory polices, industrial policies, and an openness to trade and foreign investment that will increase the competitiveness of their firms whilst improving their environmental performance, thus proving an important antidote to those who argue that poor countries cannot afford to clean up their environment whilst their economies remain under-developed.

A Comprehensive Indonesian-English Dictionary Edward Elgar Publishing

'. . . the book makes a significant contribution to research on Asian business. The chapters are deeply researched and will be of considerable value to scholars, government policymakers and

practitioners.' - Samir Ranjan Chatterjee, Asia Pacific Journal of Economics and Business

A Global Perspective Springer

This is an open access title available under the terms of a CC BY-NC-SA 3.0 IGO licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Industrial policy still generates more heat than light among economists and development practitioners. However, there appears to be a growing consensus that markets can fail both when governments interfere too much and when they engage too little. Governments have now begun to look for a more balanced strategy to accelerate structural transformation and growth. Such a balanced approach is critically needed in Africa, where 20 years of levelling the playing field have failed to produce rapid structural transformation. This book contributes to the design of that new approach, exploring existing experiences and providing guidance on priority areas for action in strengthening government-business coordination.

. . . the book is an interesting collection of anecdotal evidence. . . the book makes for interesting reading, both from the point of view of case studies and in terms of empirical methodological applications. Silvia Grandi, Economic Geography Research Group This is a valuable book. The individual chapters contain original case-study evidence and analytical insights. . . it is one that should be consulted by any scholar working in the area of industrial agglomerations and new technology. Simona Iammarino, Economic Geography This book, a collaborative effort by researchers from Japan, Italy and the USA, seeks to explore the reasons for industrial clustering in certain regions of Asia, Europe and North America. The studies presented illustrate real examples of industrial clusters, adding anecdotal evidence to the emerging theory of economic geography by exemplifying the centripetal and centrifugal forces that regulate the clustering process. The authors examine clusters in a diverse set of countries including China, Italy, Japan, Mexico, South Korea, the

USA and Vietnam. Significantly, the book provides an interesting split between studies of IT and software-related industries, and more traditional sectors, such as steel and vehicle manufacturing. Industrial Agglomeration and New Technologies pays attention to a varied array of factors that influence clustering, such as knowledge spillovers, tacit knowledge, communication and transport costs, and the effects of various government policies. The case studies provide useful examples for government and industry leaders, as well as a starting point for researchers seeking an ultimate answer to the question: Why do firms form clusters?

Annual Report Malaysia: Doing Business and Investing in Malaysia Guide Volume 1 Strategic, Practical Information and Contacts

This important collection is a timely contribution to the debate on the Asian financial crisis. With chapters written by well-established international experts in Asian economics, this book constitutes a finely judged example of the varying opinions on the matter.

Lulu.com

This well-researched book examines the dramatic transformation of Southeast Asian countries from agricultural and mining economies to industrial nations. In doing so, it explores the effects of development policy on a number of interdisciplinary issues, and the emergence of new social and political pressures created by industrialization. These include their heightened vulnerability to complex economic crises, their use of sophisticated instruments in the labour process and increased awareness of environmental issues. The distinguished authors present a regional and cross-border focus on transnational actors and institutions, and the policy issues and problems which have a wider impact on spatial configurations in the region. This insightful study will appeal to researchers, academics and policymakers working on the economics and development of Southeast Asia.

Explores the relationships between women and economic development for developed and less developed countries.

Opportunities for Collaboration Ohio University Press

The Japanese presence in Southeast Asia is treated variously with either suspicion or encouragement. Japan and Malaysian Development critically assesses different dimensions of Japan-Malaysia economic relations. The work presents a balanced collection of essays examining Japanese involvement in Malaysia. The volume also discusses the impact and consequences of Malaysian Prime Minister Mahathir's 'Look East' policy, which advocated greater emphasis on trading relations with Japan.

Accumulation, Accommodation and Ascendance OUP Oxford

Malaysian Industrial Policy argues that selective government promotion efforts have been successful and crucial for Malaysia's industrialisation despite some disastrous consequences associated with the Mahathir governments heavy industrialisation programme. The authors present evidence to show that direct and indirect government interventions have induced and supported investments, accelerating the structural transformation of the Malaysian economy. However, industrial development in Malaysia has been modest compared with that in Northeast Asia because of weaknesses in industrial policy and excessive reliance on foreign investments.

Lessons for Africa NUS Press

First published in 1999, this volume focuses on the contributions of Small and Medium Enterprises (SMEs) to Malaysia and they can be best supported. Moha Asri Abdullah examines solutions in the form of policy supports in developing countries, financial and credit assistance, entrepreneurial development, business management training, human resources development, technical and vocational programmes, local and infrastructure facilities, fiscal policy and incentives for SMEs and the accessibility of SME support programmes. Abdullah ends with recommendations for the sector.

Microeconomies and Structural Adjustment in Africa Lulu.com

Economic Bulletin for Asia and the Pacific Edward Elgar Publishing

This publication explains why Indonesia, Malaysia, and Thailand need to ramp up cooperation to boost their special economic zones (SEZ) and spur sustainable growth. Mapping out and assessing the economic performance of SEZs across the subregion, it highlights the threats they face from factors including growing competition for foreign investment, international trade disputes, and the rise of digital technologies. The publication stresses the need for policymakers and stakeholders to intensify their strategic collaboration in order to make their SEZs more competitive. Against the backdrop of COVID-19, it details a range of practical steps designed to increase trade, create jobs, and build economic resilience across the three countries.
