Brick has long been a trusted material, used worldwide by builders who appreciate its strength and versatility. It offers proven value to both traditional works and contemporary designs. The venerable material has even become a trendsetter; as the New York Times recently reported, "Bricks Return with Style in New High-End Buildings." Following the popular first volume of Folio, Folio 2 features the most inspiring new brick buildings in North America and Australia. Here single-family homes, university buildings, cultural centers, showroom interiors, and more show the possibilities of brick. Each project uses material manufactured by Glen-Gery in a variety of shapes, colors, and textures, from conventional brick to glass brick to custom-designed brick for unique implementations. The buildings are thoroughly documented in photos and drawings, and with texts based on

new interviews with their designers--a who's who of both up-and-coming and established architecture firms.

Successful STEM Mentoring Initiatives for Underrepresented College Students is a step-by-step, research-based guide for higher education faculty and administrators who are charged with designing mentoring programs to recruit and retain students from underrepresented groups. Written by an acknowledged expert in the field of STEM mentoring, the book constitutes a virtual consultant that enables readers to diagnose the issues they face, identify priorities, and implement appropriate practices to achieve their goals. The book describes the real and perceived barriers that underrepresented students—to include women, students of color, transfer students, and first-generation college students—encounter when considering enrollment, or

participating, in science courses; considers the issues they face at the various transitions in their education, from entering college to declaring a major and moving on to a profession; and sets out the range of mentoring options available to program designers. By posing key questions and using three running case illustrations of common dilemmas, the book walks readers through the process of matching the best design options with the particular needs and resources of their own department or campus. Intentionally brief and to the point, the book is nonetheless a comprehensive guide to the full range mentoring models and best practices, that also covers issues of institutional and departmental climate and teaching methods, and offers insider insights to help designers avoid pitfalls as they create effective, sustainable mentoring initiatives. This guide will assist administrators working on new initiatives to broaden access and improve persistence and graduation in their programs, as well as apply for research grants, by clarifying objectives and identifying the effective evidence-based practices to achieve them. It also provides common conversation-starters for departments to identify obstacles to enrollment and broaden participation.

In his most visionary book, internationally renowned educator Marc Prensky presents a compelling alternative to how and what we teach our children. Drawing on emerging world trends, he elaborates a comprehensive vision for K-12 education that includes new goals, new means, a new curriculum, a new kind of teaching, and a new use of technology. “Marc Prensky—one of the smartest people working in educational reform today—offers us a lucid, inspiring, optimistic, doable, and crucial blueprint for

how we can build a future with the schools children desperately need in our modern, high-risk, highly complex, fast-changing, and imperiled world.” —James Paul Gee, Mary Lou Fulton Presidential Professor of Literacy Studies, Regents’ Professor, Arizona State University “Marc Prensky was always ahead of his time. Education to better their world continues this trend in spades. This book is a goldmine and a powerful wakeup call that the future is already here—in pockets right now but a harbinger of what is rapidly emerging. Read the book and make yourself part of the future today. As we are finding in our own work, students are agents of change—in pedagogy, in learning environments, and of society itself. Exciting possibilities await!” —Michael Fullan, Professor Emeritus, OISE/University of Toronto “Marc Prensky’s answer to the question ‘What is the purpose of education?’—that education should now empower youth to improve their communities and the world—would unleash the energy, creativity, and compassion of students and teachers in ways we have never imagined. We need the better world Prensky envisions and we need it now.” —Milton Chen, The George Lucas Educational Foundation “Prensky offers perhaps the most compelling case and model yet articulated by anyone for today’s globally-empowered children. A must-read book for all educators and anyone who cares about education.” —James Tracey, Head of School, Rocky Hill School, RI “Wow. As a takeaway it is good—very good.” —John Seeley Brown “A great book. Filled with ‘food for thought’, common sense, provocative ideas and fun to read.” —Nieves Segovia, Presidenta, Institucion Educativa SEK (SEK International Schools)

The Generosity Network is the essential guide to the art of activating resources of every kind behind any worthy cause. Philanthropist Jeff Walker and fund-raising expert Jennifer McCrea offer a fresh new perspective that can make the toughest challenges of nonprofit management and development less stressful, more rewarding—and even fun. Walker and McCrea show how traditional pre-scripted, money-centered, goal-oriented fund-raising techniques lead to anxiety and failure, while open-spirited, curiosity-driven, person-to-person connections lead to

discovery, growth—and often amazing results. Through engrossing personal stories, a wealth of innovative suggestions, and inspiring examples, they show nonprofit leaders how to build a community of engaged partners who share a common passion and are eager to provide the resources needed to change the world—not just money, but also time, talents, personal networks, creative thinking, public support, and all the other forms of social capital that often seem scanty yet are really abundant, waiting to be uncovered and mobilized. Highly practical, motivating, and thought provoking, The Generosity Network is designed to energize and empower nonprofit leaders, managers, donors, board members, and other supporters. Whether you help run a multimillion-dollar global nonprofit or raise funds for a local scout troop, PTA, or other community organization, you'll learn new approaches that will make your work more successful and enjoyable than ever.

"What strategies do great principals use to influence teachers, students, and classroom instruction? This best-selling book by Joseph Blase and Peggy C. Kirby, now in its third edition, provides the answers from the teachers themselves. New material in this revised edition compares the authors' original research findings with recent literature on transformational leadership, school productivity, and adult learning, as well as the ISLLC and ELCC standards. Such comparisons underscore the continued timeliness and timelessness of this teacher's-eye view of effective school leadership. The book offers strategies and related practices that allow leaders to use the power of praise, influence others by using expectations and involvement, encourage professional autonomy lead by standing behind,

suggest rather than direct, use formal authority positively, ideal for experienced or aspiring school principals, this enlightening and compact resource provides invaluable perspectives on how to motivate and inspire classroom teachers."--PUBLISHER'S WEBSITE.

During the 1970s there was a rapid increase in interest in metacognition and metalinguistics. The impetus came from linguistics, psychology, and psycho linguistics. But with rather unusual rapidity the work from these scientific disciplines was taken over in education. This new direction in these various areas of academic study was taken simultaneously by several different investigators. Although they had varying emphases, their work sometimes appears to be overlapping; despite this, it has been rather difficult to find a consensus. This is reflected in the varying terminology used by these independent investigators "linguistic awareness," "metacognition," "metalinguistic ability," "task awareness," "lexical awareness," and so on. For educators these developments presented a glittering array of new ideas that

promised to throw light on children's thinking processes in learning how to read. Many reading researchers and graduate students have perceived this as a new frontier for the development of theory and research. However, the variety of independent theoretical approaches and their accompanying terminologies has been somewhat confusing.
