This edited volume provides an inclusive explanation of what, why, and how cities interact with global counterparts as well as with nation states, non-governmental organizations, and foreign publics. The chapters present theoretical and analytical approaches to the study of city diplomacy as well as case studies to capture the nuances of the practice. By bringing together a diverse group of authors in terms of their geographic location, academic and practitioner backgrounds, the volume speaks to multiple disciplines, including diplomacy, political science, communication, sociology, marketing and tourism.

Even after the recent economic crisis, cultural and creative industries are still able to easily draw audience members and consumers, as well as new talent to enrich these fields. Exploring the topic from economic, artistic, and policymaking perspectives, *Pioneering Minds Worldwide* is an interdisciplinary approach to these trades on a global scale, while making an important distinction between the cultural sector—products that are consumed on the spot, such as concerts or dance performances—and the creative sector, which generates artistic products that we have a protracted interaction with, i.e. design, architecture, and advertising. The authors of these highly informative essays offer new concepts and viewpoints on the entrepreneurial dimension of the cultural and creative industries in sixteen countries and explore how urban area development, new technological innovations, and education all influence these continually expanding industries.

This book focuses on the Base of the Pyramid (BOP) in Latin America and examines the role of the markets in serving low-income populations as consumers, distributors, and entrepreneurs. Deep inequalities, violence, and urbanisation characterise the region. Despite the reduction of poverty observed during the first two decades of the 21st century, Latin America is the most unequal region

in the world. Outside active war zones, the region has the highest homicide rate in the world and violence and inequality are both deeply intertwined. Markets have a crucial role to play in closing this gap and offering job and income opportunities, especially to unemployed youth, paving the way for safer, more peaceful, and sustainable development. The book also offers a theoretical reflection on the role that community enterprises who manage common-pool resources can play in serving markets and creating income opportunities for the rural poor. The book is recommended for managers, policy makers, students, and scholars interested in Base of the Pyramid markets and their potential to lift people out of poverty and to promote a more equal society.

Understanding Institutional Context and Influence MDPI

Combining emerging trends in collaboration, democratization, and urbanization, this book examines the emergence of entrepreneurship and innovation as a primarily urban phenomenon, explains why urban environments are rapidly attracting global innovators across three distinct forms of

"urbanpreneurship," and lights the path forward for entrepreneurs, innovators, and city governments. • Documents how the integration of three converging trends—collaboration, democratization, and urbanization—contribute to what the author calls the "Urbanpreneur Spiral" • Presents eye-opening insights and reflections on the current and future state of entrepreneurship and innovation in society • Explains why today's cities are the primary source of opportunities for new entrepreneurs • Pays much-needed attention to the growing role of local governments in fostering entrepreneurship and innovation

This book introduces predictive analytics in sports and discusses the relationship between analytics and algorithms and statistics. It defines sports data to be used and explains why the unique nature of sports would make analytics useful. The book also explains why the proper use of predictive analytics includes knowing what they are incapable of doing as well as the role of predictive analytics in the bigger picture of sports entrepreneurship, innovation, and technology. The book looks at the mathematical foundations that enhance technical knowledge of predictive models and illustrates through practical, insightful cases that will help to empower readers to build and deploy their own analytic methodologies. This book targets readers who already have working knowledge of location, dispersion, and distribution statistics, bivariate relationships (scatter plots and correlation coefficients), and statistical significance testing and is a reliable, well-rounded reference for furthering their knowledge of predictive analytics in sports.

What makes the city of the future? How do you heal a divided city? In *Radical Cities*, Justin McGuirk travels across Latin America in search of the activist architects, maverick politicians and alternative communities already answering these questions. From Brazil to Venezuela, and from Mexico to Argentina, McGuirk discovers the people and ideas shaping the way cities are evolving. Ever since the mid twentieth century, when the dream of modernist utopia went to Latin America to die, the continent has been a testing ground for exciting new conceptions of the city. An architect in Chile has designed a form of social housing where only half of the house is built, allowing the owners to adapt the rest; Medellín, formerly the world's murder capital, has been transformed with innovative public architecture; squatters in Caracas have taken over the forty-five-story Torre David skyscraper; and Rio is on a mission to incorporate its favelas into the rest of the city. Here, in the most urbanised continent on the planet, extreme cities have bred extreme conditions, from vast housing estates to sprawling slums. But after decades of social and political failure, a new generation has revitalised architecture and urban design in order to address persistent poverty and inequality. Together, these activists, pragmatists and social idealists are performing bold experiments that the rest of the world may learn from. *Radical Cities* is a colorful journey through Latin America—a crucible of architectural and urban innovation.

Entrepreneurship and intrapreneurship have become a vehicle that offers solutions for social, environmental, and economic problems. Even though the level of entrepreneurial activity and its diversity have been motivated through public policies, social support has also played an important role in encouraging people to think of entrepreneurship as a desirable career choice. This book brings together analyses of those elements required for entrepreneurial and intrapreneurial intention and action, which ultimately become important leverages of development. Chapters highlight the importance of rural, urban, university, organizational, and family environments for a bunch of intentions and behaviors such as green, sport, social, corporate, innovative, traditional, and gender entrepreneurship. This entrepreneurial diversity is translated into higher development through the empowerment of women, environmental consciousness, and efficient production. Policymakers, scholars, and practitioners can find different examples and cases useful for decision-making, learning, and practice in this book.

Entrepreneurial Rise in the Middle East and North Africa Routledge

ICT has had a huge impact on businesses and organizations in general, with new business models, new marketing channels, and new markets being reached using these technologies. ICT can promote new strategies and enhancers to optimize various aspects of business, but this technology

also provides important tools that can empower social entrepreneurship initiatives to develop, fund, and implement new and innovative solutions to social, cultural, and environmental problems. With the upheaval caused by the COVID-19 pandemic and its subsequent impact on the economy, the methods and tools used within this field will be forever impacted. ICTs and the digital economy are huge trends that will affect organizations in several dimensions, such as how to communicate and improve performance. Thus, new perspectives and research are needed to identify the trends emerging in these fields. The Handbook of Research on Entrepreneurship, Innovation, Sustainability, and ICTs in the Post-COVID-19 Era broadens the exploitation of entrepreneurship, innovation, and ICTs in a global approach to draw attention to multidisciplinary perspectives of these contexts and their influence in modern organizations. In addition, the book explores and discusses, through innovative studies, case studies, systematic literature reviews, and reports, the key developments in digital entrepreneurship, circular economy and digitalization, digital business models, digital market and internationalization, digital economy, trends and challenges for organizations, digital entrepreneurial ecosystems, IS/ICT in organizations, social aspects of information systems, and more. This book is ideally intended for business managers, industry professionals, entrepreneurs, practitioners, stakeholders, researchers, academicians, and students looking for how business and organizations are going to shift and advance in the post-COVID-19 era.

There is an increasing pressure for leading universities to perform well in competitive global and national ranking systems. *International Perspectives on Leadership in Higher Education* studies the complexity involved in the development and upkeep of good higher education provision. Without taking anything about leadership, management, governance, administration, authority or power for granted, this book draws together international case studies relating to specific instances of leadership to analyse how they relate to critical thinking and global challenges in higher education. Using a selection of global case studies, this book explores: The extent to which critical thinking on global challenges is employed by higher education leaders, The potential for an increase in the role of critical thinking in leadership, The creative potential for critical leadership thinking to transform institutions and communities, The essential attributes of critical thinking, namely cognitive, affective and social dimensions, and The possibility for critical thinking to contribute to the global public common good by encouraging enhanced research, teaching and public service excellence. Responding to the ever-increasing demands of the higher education climate, *International Perspectives on Leadership in Higher Education* is a vital resource for anyone occupying leadership positions in higher education institutions and any researchers or students looking to explore the landscape of critical thinking.
