OSBORN MADDOX

A European Perspective Springer

This study examines the broad range of factors driving farm management decisions that can improve the environment, including drawing on the experiences of OECD countries. *Chinese Economic Development* IGI Global
Over 800 million people suffer from chronic hunger, and over ten million children die each year from preventable causes. These may seem like overwhelming statistics, but as Stephen Smith shows in this call to arms, global poverty is something that we can and should solve within our lifetimes. Ending Global Poverty explores the various traps that keep people mired in poverty, traps like poor nutrition, illiteracy, lack of access to health care, and others and presents eight keys to escaping these traps. Smith gives readers the tools they need to help people overcome poverty and to determine what approaches are most effective in fighting it. For example, celebrities in commercials who encourage viewers to "adopt" a poor child really seem to care, but will sending money to these organizations do the most good? Smith explains how to make an informed decision. Grass-roots programs and organizations are helping people gain the capabilities they need to escape from poverty and this book highlights many of the most promising of these strategies in some of the poorest countries in the world, explaining what they do and what makes them effective.

Fiscal Policy for Development Bloomsbury Publishing

With contributions from 35 leading economists, this forward-looking book explores the future of development economics against the background of the past half-century of development thought and practice. Outstanding representatives of the past two generations of development economists assess development thinking at the turn of the century and look to the unsettled questions confronting the next generation. The volume offers a thorough analysis of the broad range of issues involved in development economics, and it is especially timely in its critique of what is needed in development theory and policy to reduce poverty. An overriding issue is whether in the future 'development economics' is to be regarded simply as applied economics or whether the nature and scope of development economics will constitute a need for a special development theory to supplement general economic theory. 'Frontiers of Development Economics' is an ideal reference for all those working in the international development community.

Ending Global Poverty Springer

ECONOMIC DEVELOPMENT IN ASIA explores factors that influence economic growth and development particularly from an Asian development perspective. Grounded firmly on theoretical foundations, it showcases the richness and variety of the Asian development experience through extensive coverage of individual country case studies, institutional developments, and challenges facing policy-makers in the region as well as in-depth discussions of existing empirical evidence. This book is specially tailored to meet the needs of social science students studying economic development in Asia. University students, educators and government policy makers will find the book particularly useful for understanding growth and development trends in the context of a rapidly globalizing world. With the rising tide of interest in Asian economies, the book will prove to be an invaluable for anyone seeking to better understand the process of growth and economic development in the region.

Economic Development Prentice Hall

International Economics, 13th Edition provides students with a comprehensive, up-to-date review of the field's essential principles and theory. This comprehensive textbook explains the concepts necessary to understand, evaluate, and address the economic problems and issues the nations of the world are currently facing, and are likely to face in the future. Balancing depth and accessibility, the text helps students identify the real-world relevance of the material through extensive practical applications and examples. The new, thoroughly-updated and expanded edition provides students with a solid knowledgebase in international trade theory and policy, balance of payments, foreign exchange markets and exchange rates, open-economy macroeconomics, and the international monetary system. The text uniquely employs the same graphical and numerical model in chapters that cover the same basic concept, allowing students to recognize the relationship among the different topics without having to start with a new example each time. Clear, straightforward discussions of each key concept and theory are complemented by concrete, accessible, and relatable examples

that serve to strengthen student comprehension and retention. Topics include the 'Great Recession,' the increase in trade protectionism, excessive volatility and large misalignments of exchange rates, and the impacts of resource scarcity and climate change to continued growth and sustainable development. *Critical Perspectives on Employment and Housing Policies* Elsevier
This book examines general Nongovernmental organizations (NGOs) roles and comparative advantages in the broad fight to end global poverty, as well as roles and opportunities specific to particular Millennium Development Goals sectors. *Economic Growth and Macroeconomic Dynamics* OECD Publishing
The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

A Guide to What Works World Bank Publications

Economic Development is the leading textbook in this field, providing a complete and balanced introduction to the requisite theory, the driving policy issues, and the latest research. Todaro and Smith take a policy-oriented approach, presenting economic theory in the context of critical policy debates and country-specific case studies so students see how theory relates to the problems and prospects of developing countries *Impact Evaluation in Practice, Second Edition* Studies in Development Economi
Colonialism and Its Legacy brings together essays by leading scholars in both the fields of political theory and the history of political thought about European colonialism and its legacies, and postcolonial social and political theory. The essays explore the ways in which European colonial projects structured and shaped much of modern political theory, how concepts from political philosophy affected and were realized in colonial and imperial practice, and how we can understand the intellectual and social world left behind by a half-millennium of European empires.

The Future in Perspective Anchor

Despite increasing reports across the globe on renewable development and maintenance, little is known regarding what strategies are required for improved economic growth and prosperity in Africa. Improving an understanding of the methods for promoting growth through reusable resource development and administration is a vital topic of research to consider in assisting the continent's development. The Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa provides emerging research on the strategies required to promote growth in Africa as well as the implications and issues of the expansion of prosperity. While highlighting sustainable education, pastoral development pathways, and the public-sector role, readers will learn about the history of sustainable development and governmental approaches to improving Africa's economy. This publication is a vital resource for policy makers, research institutions, academics, researchers, and advanced-level students seeking current research on the theories and applications of development in societal and legal institutions.

Zero Hunger W W Norton & Company Incorporated

The development of the endogenous growth model rekindled interest in growth theory. In contrast to the neo-classical model, long-run endogenous growth emerged as an equilibrium outcome, reflecting the behaviour of optimizing agents in the economy. This book brings together a number of contributions in growth theory and macroeconomic dynamics, reflecting these developments and the ongoing debate over the relative merits of neo-classical

and endogenous growth models. It focuses on the emergence of three important aspects: First, it develops growth models that extend the underlying theory in different directions. Second, it addresses one of the concerns of the literature on growth and dynamics: the statistical properties of underlying data and the effort to ensure that growth models are consistent with empirical evidence. Third, it discusses the increasingly international focus of macrodynamics and growth theory, an inevitable consequence of the integration of the world economy.

Economics of Development Springer

Revised year after year, now into its 24th Edition, this unique book is widely accepted as the core text for graduate / post-graduate courses in Indian economy, in various universities across India. The book is essentially, a collection of select articles by some of India's topmost economists and experts.

The Urban Informal Sector Lexington Books

The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the "2030 Agenda for Sustainable Development". On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. It encompasses 17 volumes, each devoted to one of the 17 SDGs. This volume addresses SDG 2, namely "End hunger, achieve food security and improved nutrition and promote sustainable agriculture" and contains the description of a range of related terms, to allow for a better understanding and foster knowledge. Our planet produces enough food to feed everyone. Malnutrition and hunger are the result of inappropriate food production processes, bad governance and injustice. SDG 2 seeks to guarantee quality and nutritious food to ensure healthy life by adopting a holistic approach that involves various actions targeting different actors, technologies, policies and programs. These initiatives have to face challenges coming from extensive environmental degradation, loss of biodiversity and the interrelated effects of climate change. Concretely, the defined targets are: End hunger and ensure access by all people, in particular the poor and people in vulnerable situations, including infants, to safe, nutritious and sufficient food all year round End all forms of malnutrition, including achieving the internationally agreed targets on stunting and wasting in children under 5 years of age, and address the nutritional needs of adolescent girls, pregnant and lactating women and older persons Double the agricultural productivity and incomes of small-scale food producers, in particular women, indigenous peoples, family farmers, pastoralists and fishers, including through secure and equal access to land, other productive resources and inputs, knowledge, financial services, markets and opportunities for value addition and non-farm employment Ensure sustainable food production systems and implement resilient agricultural practices that increase productivity and production, that help maintain ecosystems, that strengthen capacity for adaptation to climate change, extreme weather, drought, flooding and other disasters and that progressively improve land and soil quality Maintain the genetic diversity of seeds, cultivated plants and farmed and domesticated animals and their related wild species, including through soundly managed and diversified seed and plant banks at the national, regional and international levels, and promote access to and fair and equitable sharing of benefits arising from the utilization of genetic resources and associated traditional knowledge, as internationally agreed Increase investment, including through enhanced international cooperation, in rural infrastructure, agricultural research and extension services, technology development and plant and livestock gene banks in order to enhance agricultural productive capacity in developing countries, in particular least developed countries Correct and prevent trade restrictions and distortions in world agricultural markets, including through the parallel elimination of all forms of agricultural export subsidies and all export measures with equivalent effect, in accordance with the mandate of the Doha Development Round Adopt measures to ensure the proper functioning of food commodity markets and their derivatives and facilitate timely access to market information, including on food reserves, in order to help limit extreme food price volatility Editorial Board Datu Buyung Agusdinata, Mohammad Sadegh Allahyari, Usama Awan, Nerise Johnson, Paschal Arsein Mugabe,

[International Economics](#) Cambridge University Press

The book is orientated towards the teaching of economics within the context of the major problems of development and underdevelopment in Third World nations and fills a major void in the teaching materials available for this purpose. It has been written for use by first-year economic students at universities throughout Africa, Asia, Latin America and the Middle East.

Indian Economy Since Independence Pearson Education

"The paper presents a nontechnical summary of the current state of debate on the measurement and implications of global inequality (inequality between citizens of the world). It discusses the relationship between globalization and global inequality. And it shows why global inequality matters and proposes a scheme for global redistribution. "--World Bank web site.

Note: If you are purchasing an electronic version, MyEconLab does not come automatically packaged with it. To purchase MyEconLab, please visit www.MyEconLab.com or you can purchase a package of the physical text and MyEconLab by searching for ISBN 10: 0321931203 / ISBN 13: 9780321931207. Thoroughly updated, intuitive rather than technical, grounded in data and empirical evidence, extensively illustrated with well-chosen examples and photographs, enlivened with applications that focus on issues at play in today's world, focused on learning-by-doing, and seamlessly integrated with MyEconLab. These are the hallmarks of this ninth edition of *Economics: Canada in the Global Environment*.

[Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa](#) Financial Times/Prentice Hall

This collection of essays honors a remarkable man and his work. Erik Thorbecke has made significant contributions to the microeconomic and the macroeconomic analysis of poverty, inequality and development, ranging from theory to empirics and

policy. The essays in this volume display the same range. As a collection they make the fundamental point that deep understanding of these phenomena requires both the micro and the macro perspectives together, utilizing the strengths of each but also the special insights that come when the two are linked together. After an overview section which contains the introductory chapter and a chapter examining the historical roots of Erik Thorbecke's motivations, the essays in this volume are grouped into four parts, each part identifying a major strand of Erik's work—Measurement of Poverty and Inequality, Micro Behavior and Market Failure, SAMs and CGEs, and Institutions and Development. The range of topics covered in the essays, written by leading authorities in their own areas, highlight the extraordinary depth and breadth of Erik Thorbecke's influence in research and policy on poverty, inequality and development.

Acknowledgements These papers were presented at a conference in honor of Erik Thorbecke held at Cornell University on October 10-11, 2003. The conference was supported by the funds of the H. E. Babcock Chair in Food, Nutrition and Public Policy, and the T. H. Lee Chair in World Affairs at Cornell University.

Corporate Social Investment Routledge

Compelled by the extent to which globalization has changed the nature of labor relations, Harry C. Katz, Thomas A. Kochan, and Alexander J. S. Colvin give us the first textbook to focus on the workplace outcomes of the production of goods and services in emerging countries. In *Labor Relations in a Globalizing World* they draw lessons from the United States and other advanced industrial countries to provide a menu of options for management, labor, and government leaders in emerging countries. They include discussions based in countries such as China, Brazil, India, and South Africa which, given the advanced levels of economic development they have already achieved, are often described as "transitional," because the labor relations practices and procedures used in those countries are still in a

state of flux. Katz, Kochan, and Colvin analyze how labor relations functions in emerging countries in a manner that is useful to practitioners, policymakers, and academics. They take account of the fact that labor relations are much more politicized in emerging countries than in advanced industrialized countries. They also address the traditional role played by state-dominated unions in emerging countries and the recent increased importance of independent unions that have emerged as alternatives. These independent unions tend to promote firm- or workplace-level collective bargaining in contrast to the more traditional top-down systems. Katz, Kochan, and Colvin explain how multinational corporations, nongovernmental organizations, and other groups that act across national borders increasingly influence work and employment outcomes.

[Economics of Development](#) Pearson Education India

This third edition of a successful, established text provides a concise and well-illustrated introduction to the ideas behind, and the practices flowing from the notion of sustainable development. *What it is and why it Matters* St. Martin's Press

Nafziger explains the reasons for the recent fast growth of India, Poland, Brazil, China, and other Pacific Rim countries, and the slow, yet essential, growth for a turnaround of sub-Saharan Africa. The book is suitable for those with a background in economics principles. The fifth edition of the text, written by a scholar of developing countries, is replete with real-world examples and up-to-date information. Nafziger discusses poverty, income inequality, hunger, unemployment, the environment and carbon-dioxide emissions, and the widening gap between rich (including middle-income) and poor countries. Other new components include the rise and fall of models based on Russia, Japan, China/Taiwan/Korea and North America; randomized experiments to assess aid; an exploration of whether information technology and mobile phones can provide poor countries with a shortcut to prosperity; and a discussion of how worldwide financial crises, debt, and trade and capital markets affect developing countries.
