The Natural State 118: Why Your Weight Lifting Routine is Wasting Your Time - Dr. John Jaquish  
New European Standards For Lifts Specifically: All glass must be laminated. Shaft walls must be able to withstand 1000 N. The shaft should now contain a fire extinguisher though the sprinkler should only be activated when the lift is stood... The fire or smoke detection system should switch off the lift's main switches and lighting ...New standards for lifts (EN 81-20 and EN 81-50) | NBS  
New European standards for lifts (EN 81-20 and EN 81-50) The standards EN 81-1 and EN 81-2 that were introduced in 1998 have been replaced by two new European standards - EN 81-20 and EN 81-50. These new standards apply to all lifts taken into use from 1 September 2017. Both of the new standards are regulated by the European Committee for Standardisation (CEN) and the new standards aim to improve accessibility, safety and comfort for lift passengers and those required to service installations.  
New European Standards for Lifts (EN 81-20 and EN 81-50 ...Lifts. Base: Directive 2014/33/EU of the European Parliament and of the Council of 26 February 2014 on the harmonisation of the laws of the Member States relating to lifts and safety components for lifts (recast). Applicable from 20 April 2016. OJ L 96, 29 March 2014.  
Lifts - European Commission Almost 2 years ago, new European standards for the design, manufacture and testing of lifts were introduced. The standards apply to both passenger lifts and passenger goods lifts and come with the catchy names of EN81-20 and EN81-50. The introduction commenced with a three year transition period which ultimately will see the previous standards EN 81-1 and EN 81-2 phased out completely, by 31st of August 2017.  
New European Standards - EN 81-1 EN 81-2 - Commercial Lifts  
New European standard for Lifts EN 81-20 and EN81-50 The European Commission published a new list of European harmonized standards for the CE marking of lifts earlier today. The standards on this list may be used in the conformity assessment of lifts.  
New European Standards For Lifts En 81 20 And En 81 50 According to the new lift standards, lifts must withstand a heavier force than required by previous regulations. Balustrades are to withstand 1,000 N without elastic deformation of more than 50 mm. When the distance between the balustrade and the wall are between 0.3 m and 0.5 m, the height of the balustrade must be 0.7 m.  
Lift Standards: EN 81-20 and EN 81-50 - Designing ...The working group CEN/TC10/WG8 has drafted a new European standard EN 81-41 for Vertical Platform Lifts intended for use by persons with impaired mobility. Platform Lifts that are designed, manufactured and supplied must comply with all the relevant essential Health & Safety requirements of the Machinery Directive (98/37/EC) and the new amended forthcoming Machinery directive 2006/42/EC.  
New European Safety Standards for Platform Lifts - EN81-41 The lifts Directive 2014/33/EU permits the free circulation of lifts and safety components for lifts within the internal EU market and ensures a high level of safety for lift users and maintenance staff. This harmonised EU

legislation governs the design, manufacture, and installation of lifts. It is mainly relevant for lift installers and components manufacturers but also has important implications for the owners and users of lifts.  
Lifts - European Commission Introduced in August 2014, two new European standards for lift design and manufacture will bring considerable benefits in terms of accessibility and safety for both passengers and service engineers. The first, EN 81-20:2014, sets out revised and updated safety requirements for the construction and installation of lifts.
