This edited volume is based on the European Law Institute's project, The Rescue of Business in Insolvency Law, which ran from 2013 to 2016. The project sought to investigate and articulate the essential features of well-functioning procedures for the "rescue" of distressed but viable businesses. Although the focus was primarily on the design and implementation of formal procedures (that is, those provided by law), the project also required consideration of the interaction between such procedures and informal solutions to distress, given the obvious cost advantages of the latter. The ELI project was not confined exclusively to restructurings, since these are only one possible route to maximising the value of a distressed but viable business (an auction procedure, in which the business is sold on a going concern basis to a new owner, is one obvious alternative). The ELI project encompasses various aspects of both public/constitutional law and insolvency law that may have a bearing on the functionality of formal restructuring procedures.

The best way to improve your quality of life is through the decisions you make. This book teaches several fundamental decision-making skills, provides numerous applications and examples, and ultimately nudges you toward smarter decisions. These nudges frame more desirable decisions for you to face by identifying the objectives for your decisions and generating superior alternatives to those initially considered. All of the nudges are based on psychology and behavioral economics research and are accessible to all readers. The new concept of a decision opportunity is introduced, which involves creating a decision that you desire to face. Solving a decision opportunity improves your life, whereas resolving a decision problem only restores the quality of your life to that before the decision problem occurred. We all can improve our decision-making and reap the better quality of life that results. This book shows you how.

Parliament is Britain's most important political institution, yet its workings remain obscure to academics and the wider public alike. MPs are often seen as 'out of touch' or 'all the same' and their individual motivations, achievements and regrets remain in the background of party politics. In this book, Emma Peplow and Priscila Pivatto draw on the History of Parliament Trust's collection of oral history interviews with postwar British MPs to highlight their diverse political experiences in Parliament. Featuring extracts from a collection of interviews with over 160 former MPs who sat from the 1950s until the 2000s, The Political Lives of Postwar British MPs gives a voice to those MPs' stories. It explores why they became interested in politics, how they found their seat and fought election campaigns, what it felt like to speak in the chamber and how their class or gender dictated their experiences at Westminster. In the process, readers will be given rare glimpse into the spaces inhabited by MPs, the political rivalries and friendships and the rising and falling of their careers. With accounts from MPs of all political stripes, from the well-known like David Owen and Ann Taylor to those who sat for just a few years such as Denis Coe; from old political families like Douglas Hurd to those like Maria Fyfe who felt themselves outsiders, this book provides deep insight into the political lives of MPs in our age.

This book provides a comprehensive and balanced account of global energy policy; covering moral, political, social, technical and economic aspects of the subject. While The Energy Conundrum does not offer easy solutions, it provides the facts and evidence gathered from sources in government, industry, academia, and NGOs alike, for readers to understand the issues and make their own judgements. With a foreword by Dr Fatih Birol, Executive Director of the International Energy Agency and a leading figure in world energy, The Energy Conundrum comprises eleven chapters covering topics from history and geopolitics to contemporary challenges for climate mitigation and governance. The book also offers realistic case studies which invite readers to try their hand at making energy policy as government energy ministers in two countries with very different circumstances. Effective leadership reflects both art and science. Background, theory, and knowledge is the science. Appropriate and effective application is the art. Conceptual and practical, this concise, easy to understand book is an excellent resource. The intent of The Art and Science of Leading is to support those educators who work to realize the mission of education: to educate all children to become thoughtful, independent, successful, and happy adults, ones who make positive contributions to the well-being of their community, their country, and the world. It discusses the theory of leadership, includes beliefs and skills critical to effective leadership, and provides specific examples that illustrate the practical, real-life applications of those theories, beliefs, and skills. Institutions and individuals with an interest in planning, group dynamics, and leadership, both inside and outside the field of education, will find The Art and Science of Leading to be highly valuable, including incumbent administrators, college professors, and districts with leadership development programs. This book will stimulate thought and discussion while providing specific, helpful tips for current and future leaders. [Managerial Accounting For Dummies](#) Jossey-Bass

This book provides a practice-driven, yet rigorous approach to executive management decision-making that performs well even under unpredictable conditions. It explains how executives can employ prescribed engineering design methods to arrive at robust outcomes even when faced with uncontrollable uncertainty. The book presents the paradigm and its main principles in Part I; in Part II it illustrates how to frame a decision situation and how to design the decision so that it will produce its intended behavior. In turn, Part III discusses in detail in situ case studies on executive management decisions. Lastly, Part IV summarizes the book and formulates the key lessons learned.
