Birdwhistell, in this study of human body motion (a study he terms kinesics ), advances the theory that human communication needs and uses all the senses, that the information conveyed by human gestures and movements is coded and patterned differently in various cultures, and that these codes can be discovered by skilled scrutiny of particular movements within a social context. Project MUSE - Kinesics and Context A product of systematic social interaction, the kinesic system is a social system. Out of the range of muscular adjustments produced by a human being, some are utilized by the social system for communicational purposes. Thus, to say it simply, no human body produces a kine (least kinesic unit); it moves or adjusts in a set of muscular relationships. In social interaction, certain of these have demonstrable special utility in the communicational
