Intellectual history and early modern history have always occupied an important place in Past and Present. First published in 1974, this volume is a collection of original articles and debates, published in the journal between 1953 and May 1973, dealing with many aspects of the intellectual history of the seventeenth century. Several of the contributions have been extremely influential, and the debates represent major standpoints in controversies over genesis of modern ideas.

Although England is the focus of attention for most of the contributors, their themes have wider significance. Among the topics covered in the collection are the political thought of the Levellers and of James Harrington; radical social movements of the Puritan Revolution; the ideological context of physiological theories associated with William Harvey; the relationship between science and religion and the social relations of science; and the function of millenariansim and eschatology in the seventeenth century. The editor's Introduction indicates the context in which the articles were composed and provides valuable bibliographical information about the subjects discussed.

This is the first multi-volume collection of major writings on cultural anthropology, the sub-field of anthropology which is concerned with how people in different places live and understand the world around them. It covers key methodologies (participant observation, ethnography) and topics (kinship, ritual, values) and maps the development of the field from its beginnings in the mid-nineteenth century through to recent and current debates on the 'critique of anthropology' and the rise of new methodologies such as multi-sited research. The four volumes are arranged thematically and each is separately introduced. Drawing upon essays from anthropology and related disciplines, the volumes together chart the origins of the field, explore its core theories and methods, and trace the proliferation of sub-fields that it has generated, including anthropology of art, urban anthropology, medical anthropology and the anthropology of gender and sexuality. With key texts from James George Frazer, Lewis Henry Morgan, Bronislaw Malinowski, Franz Boas, Ruth Benedict, Margaret Mead, Lucy Mair, Claude Levi Strauss, Melford Spiro, Marshall Sahlins, Laura Nader, Maurice Godelier, David Graeber, Suad Joseph and many more, this set is an essential resource for scholars and students of the subject.

Manuale di riparazione elettronica Nissan Qashqai 1.5 dCi e 2.0 dCi - EAV54 Simon and Schuster Professor Zacharias Tanee Fomum never claimed to be a self-made man. Self-made people may end up as spiritual men, but not spiritual leaders. Spiritual leaders are a concatenation of kaleidoscopic influences. When God determines to use a man for His glory and for the advance of His kingdom, He moulds him through manifold human, angelic, spiritual and normal life influences. He finally becomes an ordinary man with an extraordinary life. "FROM HIS LIPS: THE INFLUENCES THAT MOULDED HIM" delves into the plethora of influences that moulded Him into the spiritual leader of his generation. From among his own people, he was influenced by his own family, parents, siblings, teachers, university lecturers and colleagues. He was influenced constructively by people across the board from every culture. From the Western World, there were such influential figures in his life like Professor Landor, John Wesley, Charles Finney and Charles Spurgeon, just to name a few. Watchman Nee from the Oriental World was like a spiritual father and main influence to him. He read many of his books from cover to cover on his knees. African and academic influences such as Professor Sundengam, Ruth Sengat Kouo and Bishop Festo Kivengere, among a host of others, made him a citizen of heaven in the world. With such an

equilibrium of diverse cultural and spiritual influences, the Lord used him to speak to every manner of culture without fear or favour and without mincing words. These human and printed page influences moulded him and, he, in turn, was used by the Lord to mould and transform the lives of multitudes around the world. Read this book and that transformation will be yours

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.
