International Business Routledge

Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the USA angle, going on to address IB issues from other countries' perspectives, what we call the "Reverse Perspective." The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

When was the last time you said everything on your mind without holding back? In this no-holds-barred discussion of America's top hot-button issues, a journalist and a cultural anthropologist express opinions that are widely held in private—but rarely heard in public. Everyone edits what they say. It's a part of growing up. But what if we applied tell-it-like-it-is honesty to grown-up issues? In *Impolite Conversations*, two respected thinkers and writers openly discuss five "third-rail" topics—from multi-racial identities to celebrity worship to hyper-masculinity among black boys—and open the stage for honest discussions about important and timely concerns. Organized around five subjects—Race, Politics, Sex, Money, Religion—the dialogue between Cora Daniels and John L. Jackson Jr. may surprise, provoke, affirm, or challenge you. In alternating essays, the writers use reporting,

interviews, facts, and figures to back up their arguments, always staying firmly rooted in the real world. Sometimes they agree, sometimes they don't, but they always reach their conclusions with respect for the different backgrounds they come from and the reasons they disagree. Whether you oppose or sympathize with these two impassioned voices, you'll end up knowing more than you did before and appreciating the candid, savvy, and often humorous ways in which they each take a stand.

Concerning financing an overseas construction project, this book discusses supplier and buyer credit, project finance, syndicated loans, and independent guarantees (or standby letters of credit). The book also covers export credit insurance (or export credit guarantee), which is very useful for the facilitation of financing in the international sale of goods and in overseas construction projects.

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction-at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

It was probably the greatest private hoard of gold in the world: two thousand tons of bullion lying in a vault in Zurich, which had to be sold. The Greek who owned the gold believed that he was cursed by it; the American underworld who had accepted it as security for a loan wanted their money back. Yet, its sale on the open market would cause the price of gold to plummet and precipitate a global financial crisis. Two men were separately commissioned to secretly sell the gold to private investors. Eddy Polonski, a metallurgist of genius, was being hounded by the South African gold cartel. Dan Daniels, an international attorney, was brilliant but broke. Both recognized the Greek gold was an opportunity to make millions, but did not realize that there was a ruthless force to contend with: a major international bank, which saw a chance to manipulate the market fix of the century—the Gold Rush of 1979. The price of gold doubled in under three weeks; an event as sensational as the Wall Street Crash. In a blend of fact and fiction, in which the fiction pales in comparison with the fact, Bullion tells the real story.

"A damning denunciation of things as they are, and a platform for how we can do better."—Andrew Leonard, Salon Building on the international bestseller Globalization and Its Discontents, Joseph E. Stiglitz offers here an agenda of inventive solutions to our most pressing economic, social, and environmental challenges, with each proposal guided by the fundamental insight that economic globalization continues to outpace both the political structures and the moral sensitivity required to ensure a just and sustainable world. As economic interdependence continues to gather the peoples of the world into a single community, it brings with it the need to think and act globally. This trenchant, intellectually powerful, and inspiring book is an invaluable step in that process.
