This thrilling and mysterious account of Fawcett's ten years of travels in forests and death-filled rivers in search of a secret city was compiled from manuscripts, letters and logbooks by his son. 'The disappearance of Colonel Fawcett in the Matto Grosso remains one of the great unsolved mysteries of today. In 1925 Fawcett was convinced that he had discovered the location of a lost city; he had set out with two companions, one of whom was his eldest son, to destination 'Z', never to be heard of again. His younger son, Brian Fawcett, has compiled this book from letters and records left by his father whose last written words to his wife were: 'You need have no fear of any failure...' Fawcett had tried to find lost cities for ten years: 'That the cities exist I know'. 'a book of great power....should be read by everyone' Daily Telegraph

This compelling collection of essays explores the Qhapaq nan (or Great Inca Road), an extensive network of trails reaching modern-day Colombia, Ecuador, Peru, Bolivia, Chile, and Argentina. These roads and the accompanying agricultural terraces and structures that have survived for more than six centuries are a testament to the advanced engineering and construction skills of the Inca people. The Qhapaq nan also spurred an important process of ecological and community integration across the Andean region. This book, the companion volume to a National Museum of the American Indian exhibition of the same name, features essays on six main themes: the ancestors of the Inca, Cusco as the center of the empire, road engineering, road transportation and integration, the road in the Colonial era, and the road today. Beautifully designed and featuring more than 225 full-color illustrations, *The Great Inka Road* is a fascinating look at this enduring symbol of the Andean peoples' strength and adaptability.

Considered to be one of the New Seven Wonders of the World in 2019, Machu Picchu is a man-made structure situated in the Andes Mountains in Peru. One of the things that makes it so special is that even though it was built in the 1400s, it was not discovered until the early 1900s, giving it a long-lasting opportunity to keep its form and magnificence when it comes to architecture and engineering. This ancient citadel was built by the incredible Inca civilization many centuries ago.

An explorer searches the Peruvian Andes for a lost ruin in "a gem of a book [that] transcends the travel writing genre" with fascinating Inca history (Los Angeles Times). A New York Times Notable Book With the backdrop of the ever-intriguing Andes mountains, Hugh Thomson explores the intoxicating history of the Inca people and their heartland. The author, an acclaimed documentary filmmaker and explorer, expertly weaves accounts of his own discoveries and brushes with danger with the history of those who preceded him—including the explorer Hiram Bingham, who discovered Machu Picchu; the twentieth century South American photographer, Martín Chambi; the poet Pablo Neruda; and the Spanish conquistadores who destroyed the Inca civilization—and the eccentric characters he meets on his travels. Following in the footsteps of the explorers Gene Savoy and Hiram Bingham, Thomson set off into the jungle to find the lost city of Llactapat. This is the story of his journey to discover it via the interconnecting paths the Incas laid across the Andes.

Lost City of the Incas Penguin

In 1532, when Pizarro conquered Peru, the Inca realm was one of the largest empires on earth, graced by gold masterpieces, towns with great palaces and temples, and an impressive network of roads. But this glittering culture only obscured the rich and diverse civilizations that had preceded it: Chavin, Moche, Nazca, Tiwanaku, Huari, and Chimu. Described as a "masterly study" and an "outstanding volume" on its first publication, *The Incas and Their Ancestors* quickly established itself as the best general introduction to the cultures and civilizations of ancient Peru. Now this classic text has been fully updated for the revised edition. New discoveries over the last decade are integrated throughout. The occupation of Peru's desert coast can now be traced back to 12,000 BC and ensuing maritime adaptations are examined in early littoral societies that mummified their dead and others that were mound builders. The spread of Andean agriculture is related to fresh data on climate, and protracted drought is identified as a recurrent contributor to the rise and fall of civilizations in the Cordillera. The results of recent excavations enliven understanding of coastal Moche and Nazca societies and the ancient highland states of Huari and Tiwanaku. Architectural models accompanying burials provide fresh interpretations of the palaces of imperial Chan Chan, while the origins of the Incas are given new clarity by a spate of modern research on America's largest native empire. -- Description from <http://www.amazon.com> (Feb. 13, 2012).

Machu Picchu, recently voted one of the New Wonders of the World, is one of the world's most famous archaeological sites, yet it remains a mystery. Even the most basic questions are still unanswered: What was its meaning and why was it built in such a difficult location? Renowned explorer Johan Reinhard attempts to answer such elusive questions from the perspectives of sacred landscape and archaeoastronomy. Using information gathered from historical, archaeological, and ethnographical sources, Reinhard demonstrates how the site is situated in the center of sacred mountains and associated with a sacred river, which is in turn symbolically linked with the sun's passage. Taken together, these features meant that Machu Picchu formed a cosmological, hydrological, and sacred geological center for a vast region.

The Machu Picchu Guidebook Abrams

*Includes pictures of Machu Picchu and other important people and places. *Explains the history of the site and the theories about its purpose and abandonment. *Describes the layout of Machu Picchu, its important structures, and the theories about the buildings' uses. In 1911, American historian Hiram Bingham publicized the finding of what at the time was considered a "lost city" of the Inca. Though local inhabitants had known about it for century, Bingham documented and photographed the ruins of a 15th century settlement nestled along a mountain ridge above the Urubamba Valley in Peru, placed so perfectly from a defensive standpoint that it's believed the Spanish never conquered it and may have never known about it. Today, of course, Machu Picchu is one of South America's best tourist spots, and the ruins have even been voted one of the Seven New Wonders of the World. But even though Machu Picchu is now the best known of all Incan ruins, its function in Incan civilization is still not clear. Some have speculated that it was an outpost or a frontier citadel, while others believe it to be a sanctuary or a work center for women. Still others suggest that it was a ceremonial center or perhaps even the last refuge of the Incas after the Spanish conquest. One of the most theories to take hold is that Machu Picchu was the summer dwelling of the Inca's royal court, the Inca's version of Versailles. As was the case with the renaming of Mayan and Aztec ruins, the names given to various structures by archaeologists are purely imaginary and thus not very helpful; for example, the mausoleum, palace or watchtower at Machu Picchu may have been nothing of the sort. What is clear at Machu Picchu is that the urban plan and the building techniques employed followed those at other Incan settlements, particularly the capital of Cuzco. The location of plazas and the clever use of the irregularities of the land, along with the highly developed aesthetic involved in masonry work, followed the model of the Inca capital. At Machu Picchu, the typical Incan technique of meticulously assembling ashlar masonry and creating walls of blocks without a binding material is astounding. The blocks are sometimes evenly squared and sometimes are of varying shape. In the latter case, the very tight connection between the blocks of stone seems quite remarkable. Even more astounding than the precise stone cutting of the Incas is the method that they used for the transportation and movement on site of these enormous

blocks. The Incas did not have the wheel, so all the work was accomplished using rollers and levers. Machu Picchu: The History and Mystery of the Incan City comprehensively covers the history of the

city, as well as the speculation surrounding the purpose of Machu Picchu and the debate over the buildings. Along with pictures and a bibliography, you will learn about Machu Picchu like you never have before, in no time at all.
