This book discusses what constitutes vocational education as well as its key purposes, objects, formation and practices. In short, it seeks to outline and elaborate the nature of the project of vocational education. It addresses a significant

gap in the available literature by providing a single text that elaborates the scope and diversity of the sector, its key objectives (i.e. vocations and occupations), its formation and development as an education sector, and the scope of its purposes and considerations in the curriculum. The volume achieves these objectives by discussing and defining the concept of vocational education as being that form of education that seeks to advise individuals about, prepare

them for, and further develop their capacities to perform the kinds of occupations that societies require and individuals need to participate in—and through which they often come to define themselves. In particular, it discusses the distinctions between occupations as a largely social fact and vocations as being a socially shaped outcome assented to by individuals. As people identify closely with the kinds of occupations they engage in, the standing of, and the effectiveness

of vocational education is central to individuals' well-being, competence and progress. Ultimately, this book argues that the provision of vocational education needs to realise important personal and social goals.

For more than three decades Michael Apple

has sought to uncover and articulate the connections among knowledge, teaching and power in education. Beginning with *Ideology and Curriculum* (1979), Apple moved to understand the relationship between and among the economy, political and cultural power in society on the one hand "and the ways in which education is thought about, organized and evaluated" on the other. This edited collection invites several of the world's leading

education scholars to reflect on the relationships between education and power and the continued impact of Apple's scholarship. Like Apple's work itself, the essays will span a range of disciplines and inequalities; emancipatory educational practices; and the linkage between the economy and race, class and gender formation in relation to schools.

Major changes have occurred in the last few years in the methods of cutting and manufacturing outerwear. Light clothing companies are now manufacturing these heavy garments because of the development of fusible interlinings and new manufacturing techniques which have resulted in the deskilling of traditional tailoring methods. Outerwear has consequently assumed

much greater importance in light clothing courses and this book - the first of its kind - has been written to reflect these industrial changes. It offers a course of practical and theoretical study which is related to specific garment types and fabrics. An essential manual for students at every level. Suitable for use in CGLI, BTEC and degree courses, this uniquely comprehensive work is certain to become a standard textbook on its subject.

Ride. Protect. Defend. Anna Kloss grew up as a smart girl in the Sinister Knights Motorcycle Club, an above-the-law group of misfits that fights to safeguard the women of their town. Straddling both worlds, she's lived the last few years in a college dorm, losing

herself in the promise of her future and trying to forget the lost love of her past. As Vice President of the Sinister Knights, Ryker Beckett has proven his dedication and loyalty by sitting in a county jail cell for three years for saving one woman from a nightmarish assault. The woman. The only one who matters. Prez's young,

innocent, and untouched daughter, Anna. But now, Ryker is back, his sights set on reconnecting with the woman who occupied every minute of his thoughts while he was away. Anna's all grown up, but she's still the only one he can't have, the only one he craves... Is she ready for this giant, rough-around-the-edges

biker to protect and defend her forever? Warning: Ryker is hard in all the right places-a tall, tattooed drink of water sitting on a powerful engine. He's got his mind on one woman only, and when he sees her again, he's determined to get her bred and on his bike for their sultry ride into the sunset.
