HULL CAYDEN

Elsevier Comprehensive Guide To PGMEET With Companion Website - Volume 2
Butterworth-Heinemann Medical Textbook of Surgery is a core book for medical and surgical students providing a comprehensive overview of general and speciality surgery. Each topic is written by an expert in the field. The book focuses on the principles and techniques of surgical management of common diseases. Great emphasis is placed on problem-solving to guide students and junior doctors through their surgical training. Throughout the book are numerous reproducible line drawings, tables and boxes that will prove invaluable for learning and revision. In addition there are detailed guidelines provided for surgical management. Up-to-date and ideal for medical students and junior doctors on surgical attachments and a perfect refresher for RACS and MRCS candidates. Reviews of the last edition "The textbook

presents a compact and contemporary overview and is not so much a reference book as a working tome suitable for familiarization with current trends in treatment and diagnosis in these various areas. ...found this textbook very informative and a pleasure to read." ANZ Journal of Surgery Vol. 72, No. 12. Textbook of Surgery Butterworth-Heinemann

Practical and portable, Kanski's Synopsis of Clinical Ophthalmology, 4th Edition, distills the key information from the bestselling Kanski's Clinical Ophthalmology: A Systematic Approach into a convenient, easy-to-follow volume. Perfect for quick reference, this concise resource contains "need to know" information highlighted by more than 900 high-quality illustrations and clinical photographs with clear explanations. New author, Dr. John Salmon, provides a fresh approach to critical content, ensuring that this manual remains an ideal on-the-go reference, as well as an efficient study guide for examinations. Covers the essential information you need to effectively diagnose and

manage a comprehensive range of ophthalmic disorders, using a concise format that makes it easy to quickly grasp the "must-know" aspects of each condition. Keeps you up to date with the latest advances in the treatment of glaucoma, the use of biological agents in the treatment of uveitis, genetic advances in hereditary retinal dystrophies, anti-VEGF agents for macular disease, and OCT/OCTA imaging. Includes a new chapter covering examination techniques, along with sweeping content updates on key topics. Features hundreds of high-quality images: diagnostic imaging, including OCT/OCTA; surgical and clinical photos depicting presenting signs and symptoms as well as surgical techniques; and medical illustrations that convey important anatomical considerations.

Atlas of Clinical Ophthalmology Elsevier Health Sciences

The material in this edition of *Atlas of Clinical Ophthalmology* has been thoroughly revised and expanded to include the latest research and practice. Containing 357 illustrations throughout the text, the book is not only a reasoned practical guide to the study of ophthalmology, but it embraces the ocular aspects of general diseases worldwide and basic methods of investigation and treatment where applicable. This book has references by page and illustration number, resulting from collaboration with the authors of *Colour Atlas of Ophthalmology*; the two books contain all together an outstanding 579 illustrations (343 in colour), including 16 stereo plates. Another companion book is *The Ophthalmology Examinations Review*, which aims at the most effective presentation of knowledge for examination purposes. Together these

three compact and inexpensive books provide an excellent study basis for ophthalmologists in training, while supplementing their learning of clinical work and surgical technique with the essential study of recent research papers and review monographs.

Glaucoma and Lens Butterworth-Heinemann

OphthoBook is the printed version of the amazing OphthoBook.com online book and video series. The combination of this text, along with the online video lectures, creates the most informative and easy-to-understand ophthalmology review ever written. It is geared toward medical students, optometry students, and non-ophthalmologists who want to learn more about the eye without getting bogged down with mindless detail. The book is broken down into ten chapters: 1. Eye History 2. Anatomy 3. Glaucoma 4. Retina 5. Infection 6.

Neuroophthalmology 7. Pediatric Ophthalmology 8. Trauma 9. Optics 10. Lens and Cataract Each chapter also includes "pimp questions" you might be asked in a clinic. Also, an entire chapter of ophthalmology board-review questions, flashcards, and eye abbreviations. Perhaps most useful, each chapter corresponds to the 20-minute video lectures viewable at OphthoBook.com. And lots of fun cartoons!

Kanski's Clinical Ophthalmology

Butterworth-Heinemann

Through eight outstanding editions, Kanski's Clinical Ophthalmology has been the classic specialty textbook, providing the perfect ophthalmology foundation for trainees and a valuable reference source for experienced practitioners. Building on the previous edition by Dr. Brad Bowling, Dr. John Salmon from Oxford University has comprehensively revised the textbook. The 9th Edition retains Dr. Kanski's highly effective format of succinct text and visually dynamic presentation, providing authoritative, focused guidance on the diagnosis and management of ophthalmic disorders. Extremely well organized and comprehensive in scope, this visually stunning book reflects the latest advances in the field, facilitating quick comprehension to enhance learning, aid exam preparation and guide clinical practice. As a general ophthalmic textbook, this is the gold standard. Uses targeted text, bulleted lists, tables, and visual aids to highlight salient points across all ophthalmology subspecialties. Includes 2,600 illustrations, including more than 1,000 new images of common and rare conditions and arrows to show the exact pathology. Features detailed updates on new therapeutic interventions for neurological disease and ocular tumours; new imaging

techniques such as OCT, OCT angiography, and MRI; and new topics such as circadian rhythms, graft vs host disease and the effects of Ebola virus infection on the eye. Presents examination techniques in a new, separate chapter and contains new "tips" on key issues in every chapter. Provides up-to-date information on hot topics such as intravitreal treatment with anti-VEGF agents for macular disease, genetic advances in hereditary retinal dystrophies, the use of biological agents in the treatment of uveitis and scleritis and new surgical advances such as MIGS for glaucoma and limbal stem cell grafting.

Clinical Ophthalmology Mosby

This user-friendly 2nd Edition presents over 260 high quality, full-color clinical photographs paired with descriptive overviews of each topic to provide a comprehensive resource for use as an aid to clinical diagnosis or review of a great variety of ophthalmologic disorders. Topics covered include, ptosis, glaucoma, infectious keratitis, thyroid ophthalmopathy and much more.

Signs in Ophthalmology Elsevier Health Sciences

Clinical Methods in Ophthalmology provides undergraduate students with an overview of the theoretical and clinical aspects of ophthalmology. Beginning with an introduction to ophthalmic symptoms and ocular examination, the following sections discuss diagnostic tests, instruments, lenses, drugs and surgery. A clinically structured questionnaire gives students guidance on history taking and physical and systemic examination. A separate chapter is dedicated to case presentation helping students recognise and diagnose symptoms and disorders, with emphasis on clinical applications.

This concise, easy to read manual includes more than 400 full colour clinical photographs, illustrations and tables, to assist learning. Key points Overview of theoretical and clinical aspects of ophthalmology for

undergraduate students Separate chapters dedicated to case pro forma and case presentation Concise, easy to read format Includes more than 400 full colour photographs, illustrations and tables
