"In The Divine Names the unknown Dionysius the Areopagite expresses many profound truths concerning the Divine Nature, based upon discussions of the names which are ascribed in the Bible to Him and to His attributes. In doing so, Dionysius had the advantage of the mystical teachings of the Neoplatonic School, which developed the Platonic teachings. Since he treated these from a Christian point of view, Dionysius played a great part in developing Christian mysticism. At the same time he is a link with the older thought, and therefore illustrates how the one fundamental truth is continued [sic] through many schools of thought."--

Examining the growth trend towards community rehabilitation in neurology, this book is directed towards all clinicians involved with neurorehabilitation. The study analyzes community rehabilitation needs from diverse international perspectives that include the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation plans are presented, and supplemental case studies highlight the main issues. Chapters also cover the disabled child in the community and neuropsychological rehabilitation.

"A major book that scholars will want to study closely, both for its provocative treatment of the interaction of economic and social pressures with politics and ideology and for its many revisions of Marxist and non-Marxist interpretations... [Blickle's] book will influence scholarship for some time to come."-- Journal of Modern History.

While Universal's Dracula and Frankenstein (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with The Last Warning, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's The Shadow short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

Life on the Mississippi (1883) is a memoir by Mark Twain of his days as a steamboat pilot on the Mississippi River before the American Civil War. It is also a travel book, recounting his trip along the Mississippi River from St. Louis to New Orleans many years after the war.OverviewThe book begins with a brief history of the river as reported by Europeans and Americans, beginning with the Spanish explorer Hernando de Soto in 1542. It continues with anecdotes of Twain's training as a steamboat pilot, as the 'cub' (apprentice) of an experienced pilot, Horace E. Bixby. He describes, with great affection, the science of navigating the ever-changing Mississippi River in a section that was first published in 1876, entitled "Old Times on the Mississippi". Although Twain was actually 21 when he began his training, he uses artistic license to make himself seem somewhat younger,

In Lajwanti, Mulk Raj Anand focuses on a woman's predicament and struggle to find an identity for herself. Frustrated by a rigid pattern of social relationships, gender bias, religious bigotry and her own petty human foibles, her abject condition serves as a metaphor for sacrifice and servility which forms the thematic heart of these stories.

The Wisdom of the Desert Harper Collins

The Wisdom of the Desert was one of Thomas Merton's favorites among his own books—surely because he had hoped to spend his last years as a hermit. The personal tones of the translations, the blend of reverence and humor so characteristic of him, show how deeply Merton identified with the legendary authors of these sayings and parables, the fourth-century Christian Fathers who sought solitude and contemplation in the deserts of the Near East. The hermits of Screte who turned their backs on a corrupt society remarkably like our own had much in common with the Zen masters of China and Japan, and Father Merton made his selection from them with an eye to the kind of impact produced by the Zen mondo.

"Shaman of Oberstdorf tells the fascinating story of a sixteenth-century mountain village caught in a panic of its own making. Four hundred years ago the Bavarian alpine town of Oberstdorf, surrounded by the towering peaks of the Vorarlberg, was awash in legends and rumors of prophets and healers, of spirits and specters, of witches and soothsayers. The book focuses on the life of a horse wrangler named Chonrad Stoeckhlin [1549-1587], whose extraordinary visions of the afterlife and enthusiastic practice of the occult eventually led to his death-and to the death of a number of village women-for crimes of witchcraft. Wolfgang Behringer is one of the premier historians of German witchcraft, not only because of his mastery of the subject at the regional level, but because he also writes movingly, forcefully, and with an eye for the telling anecdote."--Amazon.ca.

The aim of Molecular and Nano Electronics: Analysis, Design and Simulation is to draw together contributions from some of the most active researchers in this new field in order to illustrate a theory guided-approach to the design of molecular and nano-electronics. The field of molecular and nano-electronics has driven solutions for a post microelectronics era, where microelectronics dominate through the use of silicon as the preferred material and photo-lithography as the fabrication technique to build binary devices (transistors). The construction of such devices yields gates that are able to perform Boolean operations and can be combined with computational systems, capable of storing, processing, and transmitting digital signals encoded as electron currents and charges. Since the invention of the integrated circuits, microelectronics has reached increasing performances by decreasing strategically the size of its devices and systems, an approach known as scaling-down, which simultaneously allow the devices to operate at higher speeds. * Provides a theory-guided approach to the design of molecular and nano-electronics * Includes solutions for researchers working in this area * Contributions from some of the most active researchers in the field of nano-electronics

A French convert to Catholicism in 1939, Louis Bouyer is a renowned theologian who was an influential presence at Vatican II. His classic work, Introduction to the Spiritual Life—first published in English in 1961 and now brought back into print—provides readers with an inspiring and comprehensive vision of Christian spirituality that is unmatched in its warmth, lucidity, and accessibility. Introduction to the Spiritual Life is, by author Louis Bouyer's own description, a manual for practical use. Much more than just a work of "spirituality" or "apologetics," it is a hybrid of both,

produced with an expertise and confidence borne of a lifetime of prayer and study. It aims to cultivate interior growth through a thoughtful, reasoned meditation on the spiritual meaning of the Gospel as proclaimed by the Catholic Church. Catholics who read *Introduction to the Spiritual Life* will better appreciate how a life of prayer can be shaped and enriched by sound Christian doctrine.

Communal Reformation is the most original and provocative book to appear in its field in the past quarter-century. It met with an enthusiastic response, particularly in England and the United States, when first published in Germany in 1985 and is now available in translation. Peter Blickle's groundbreaking study, which is intended for scholars and students interested in the history of pre-modern Europe, the development of Germany, the

history of Christianity, and historical sociology, reconstructs the connection between the crisis of rural society at the end of the Middle Ages, the great Peasants' War of 1525, and the reformation as a social movement. Blickle focuses on southern Germany, Switzerland, and Austria in the later Middle Ages and Early Modern eras (roughly 1400 to 1600), though his work has important implications for the social and religious history of Europe as a whole.

Trafficking in persons is a form of modern-day slavery, a human rights violation that constitutes a crime against the individual and the State. It must be recognized and punished by legislative means. Parliamentarians have an essential role to play in the fight against human trafficking. The Handbook for Parliamentarians suggests some practical ways in which they can develop and promote the comprehensive frameworks needed to do so.
