MORGAN MARCO

Resistant Hypertension
London : British Museum

A r-examination of the mysteries surrounding the sinking of the Titanic, with some startling new

theories about the ship itself, its sister ship the accident-prone Olympic, the owners White Star and J.P. Morgan the financier controlling it. *Devonshire Illustrated, in a Series of Views, of Cities, Towns, Public Buildings ...* Taschen America Llc

This book reconstructs the pre-Julian calendar of Rome on the basis of epigraphical and literary evidence, and analyzes its relation to the solar and lunar years. Mrs. Michels shows how the varied contents of the calendar

were related to the political as well as to the religious life of Rome of the first century B.C. She traces the history of the calendar back to the fifth century, indicating the stages by which a single list of festivals may have developed into the complex document of the late republic. The Roman method of intercalation, the character of the days, and the history of the *trinum nundinum* are presented in appendices. Originally published in 1967. The Princeton Legacy Library uses the

latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Libri Annales Pontificum Maximorum Springer Science & Business Media
This book examines the use that Livy made of religious topics, and shows how this fits in with other aspects of his narrative. The author shows how 'Livy's views of religion' depend less on personal belief than on the refinement of his narrative technique. He looks at the history decade by decade, and demonstrates that there are radical differences between different sections: in some Livy

uses large-scale religious themes, but in others he deliberately avoids them. By a systematic analysis of Livy's narrative patterns and comparison with other ancient versions, it is proved that this is not simply due to subject-matter, but reflects a development in Livy's handling of his material. This profound difference between decades throws doubt on much of the standard picture of Livy: it also points to a need to revise notions of 'Augustan religious ideology'.

A growing number of people suffer from so-called resistant hypertension, that is to say, high blood pressure that does not respond to treatment. This disorder is of great current interest and importance for public health, being a common clinical problem faced by both primary care clinicians and specialists. Furthermore, as older age and obesity are among the strongest risk factors for uncontrolled hypertension, the

incidence of resistant hypertension will likely increase as the population becomes more elderly and heavier. While the prognosis of resistant hypertension is unknown, cardiovascular risk is undoubtedly increased since patients often have a history of long-standing, severe hypertension complicated by multiple other cardiovascular risk factors. This volume, compiled by a panel of world-renowned experts, offers a comprehensive exploration of resistant hypertension, covering

epidemiology, complex diagnostic aspects, and the therapeutic options currently available, with due attention to overall treatment strategies. New therapeutic agents and procedures, such as renal denervation and baroreceptor stimulation, are also described. In addition, the book addresses the economic aspects of resistant hypertension and the role of the different professional figures, from GPs to hypertension specialists, in dealing with it.

Ultimate Guide to Tractors
Weidenfeld & Nicolson
This is a biography of Fridtjof Nansen, intended to be read by children. Nansen was a Norwegian polymath and Nobel Peace Prize laureate. He gained prominence at various points in his life as an explorer, scientist, diplomat, and humanitarian. He led the team that made the first crossing of the Greenland interior in 1888, traversing the island on cross-country skis. He won international fame after reaching a record

northern latitude of 86°14' during his Fram expedition of 1893—1896. Although he retired from exploration after his return to Norway, his techniques of polar travel and his innovations in equipment and clothing influenced a generation of subsequent Arctic and Antarctic expeditions. The antiquities of Berkshire Good Press ""Graphic Work"" presents over 80 of Escher's most interesting pictures selected by the artist himself. It includes Escher's commentaries on

his work, which make his startling visual effects more easy to interpret. The book also features Escher's own account of his evolution as an artist. An authentic source book of high significance, it offers the best introduction to the fantastic universe of the grand master of illusion. Fragments of the Iliad of Homer from a Syriac Palimpsest Princeton University Press Explore the Cajun traditions of the Walker family, creators of the Slap Ya Mama Cajun

Seasoning company. Through family stories, Cajun lore, and some of the most prized recipes in Louisiana, this collection is sure to leave you feeling a little Cajun yourself.

Walks Through Bath

University of Michigan Press

This guide is structured to assist physicians in the management of those hypertensive patients who present with specific comorbidities, such as diabetes, systolic dysfunction, obesity, renal disease, or previous

cardiac events, often associated with hypertension. The clinical cases contained in this book have been selected to provide a paradigmatic set of scenarios frequently encountered in daily clinical practice, and will serve as an easy-to-access tool in applying general guidelines to individual patients, particularly in the choice of the most appropriate antihypertensive therapy. Treatment of hypertension with associated clinical conditions require specific

therapies and combinations of drugs, which are necessarily different from one comorbidity to another. By discussing exemplary cases that may better represent clinical practice in a “real world” setting, and analyzing step by step the diagnostic and therapeutic process, this book will assist cardiologists and physicians in selecting the diagnostic tools and forms of treatment best suited to the individual patient and the particular cardiovascular risk profile.

New description of Blenheim [&c., by W.F. Mavor.]. Humanities Press International Tractors, unique in their uses, have undergone thousands of changes over the years to become one of the most handy machines one can have, in any form. There have been so many amazing discoveries and inventions in the history of mankind that it would be difficult to place them in order of importance. Many have revolutionized the way society works, and this could also be said of the

humble tractor. Without it, it would be impossible to produce the vast amounts of food required by society today, and for this reason alone it must qualify as a small but essential cog in the vast machine that is the modern world. The earliest pioneer machines used steam traction rather than the new-fangled internal combustion engines, but technological breakthroughs came thick and fast: diesel engines, Harry Ferguson's revolutionary three-point-hitch,

sophisticated hydraulics, and the wonders of electronics in our own time. Henry Ford made tractors that small farmers could afford, International Harvester pioneered the 1920s Farmall - the first tractor able to cope with row crops - while Allis-Chalmers introduced pneumatic rubber tires in the 1930s. Nearly 30 years later the Steiger brothers invented an entirely new breed, the giant four-wheel-drive articulated super-tractor. This book covers more

than a century of tractor-making and features tractors that are regarded with something like affection - Case, Fordson, Massey-Ferguson, Minneapolis-Moline, Versatile - they are all here and many others. Tractors of all shapes, sizes, ages, colors and types - they are here in all their resplendent glory.

The Riddle of the Titanic Springer
Berklee Book Trade
This hands-on guide is essential for any musician who wants to build a fan base and increase profits

through the Internet. Peter Spellman, Director of the Career Development Center at Berklee College of Music, guides the self-managed musician through successful strategies to promote music online, reach new audiences, and maximize income. Readers will learn how to: create a professional website; share music downloads; sell and license music online; broadcast on Internet radio; webcast live concerts; create streaming audio; get an

online record deal; and much more. Includes an invaluable listing of more than 300 music-related websites!
Vectis scenery: in the Isle of Wight. To which are prefixed, a complete topographical description and the general tours of the island University of Pennsylvania Press
 An examination of the development of archaic Rome which successfully united disparate cultures and integrated them into political life. The author discusses the nature of the evidence and the

theories of ancient and modern historians, reconstructs the organisation of the archaic state and traces the deterioration of the curiae.

The New Comparative Mythology 83 Press

This book is a volume in the Penn Press Anniversary Collection. To mark its 125th anniversary in 2015, the University of Pennsylvania Press rereleased more than 1,100 titles from Penn Press's distinguished backlist from 1899-1999 that had fallen out of

print. Spanning an entire century, the Anniversary Collection offers peer-reviewed scholarship in a wide range of subject areas.

History and Antiquities of Reading Springer

This book explains how hypertension affects 20-50% of the adult population in developed countries. Heart failure is the result of the hypertension's effects on the heart and it represents a growing public health problem. In this context the international scientific

community is continuously struggling to develop better strategies in screening, diagnosing and treating hypertension and its deleterious effects. Thus, this field is continuously changing, with new important information being added constantly. This volume will offer both insights into the intimate mechanisms of transition from hypertension to heart failure and clinical practice advice on the prevention and treatment of heart failure in hypertensive population.

The mechanisms which explain the progression from hypertension to heart failure will be also covered exhaustively by offering two chapters referring to the diagnosis of heart failure in hypertensive population and one regarding echocardiography which is the most frequently used imaging method in clinical practice. The reader will be also provided with information on cardiovascular magnetic resonance which has the unique advantage of

differentiating
hypertensive heart failure
from other pathologies
associated with increased
myocardial thickness. This
book is a useful tool for
clinicians but also to the
research community
interested in heart failure
and consequences of

hypertension on heart
who want to be up-to-date
with the new
developments in the field.
