Pizza for Good is an inspiring and wildly entertaining cookbook, memoir, and philanthropic guide to building local community through food. Will Pollock, the founder of the charitable artists' collaborative ARTvision and an Atlanta-based writer, has created 20 unique recipes for specialty pizzas that emphasize locally sourced ingredients and come with a buffet of helpful kitchen tips. But Pizza for Good is also a funny, moving, and thought-provoking series of stories about Pollock's personal experience in creating a philanthropic arts organization and his community-building efforts as achieved through pizza. His aim is to not only give readers brand new ways to think about their favorite food, but to offer straightforward advice on how they can start their own "Pizza for Good" events for the causes that mean the most to them. For over ten years, Pollock has hosted a "Gourmet Pizza Extravaganza," which started as a small gathering of hungry revelers and eventually grew into an annual tradition sparking a local movement that has raised over \$40,000 to date for Positive Impact, an Atlanta-based organization helping those affected by HIV and AIDS. Pizza for Good, half the proceeds of which will go to HIV and LGBT/human rights charities, chronicles this event's progression and works as a how-to guide for eager cooks, community activists, and charitable-minded do-gooders. Featuring an innovative level of interactivity between readers and author, Pizza for Good links directly to Pollock's blog to continue the conversation online and bring the book's message of community-building into the 21st century. Embedded video and music as well as digital resources that are just a touch away make Pizza for Good a completely one-of-a-kind reader experience that will change the way you think about America's favorite food.

Science fiction is a literary genre based on scientific speculation. Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings. Science Fact and Science Fiction examines in one volume how science has propelled science-fiction and, to a lesser extent, how science fiction has influenced the sciences. Although coverage will discuss the science behind the fiction from the Classical Age to the present, focus is naturally on the 19th century to the present, when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science-fiction works speculating on the future. As scientific developments alter expectations for the future, the literature absorbs, uses, and adapts such contextual visions. The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction, but rather to study the ongoing flow and counterflow of influences, including how fictional representations of science affect how we view its practice and disciplines. Although the main focus is on literature, other forms of science fiction, including film and video games, are explored and, because science is an international matter, works from non-English speaking countries are discussed as needed.

She has been cooking with passion for the last 40 years and she received a national award for her tasty, healthy and traditional cuisine. She was knighted for her services to the industry. ALINKA RUTKOWSKA just happened to pass by and fall in love with Malivna's cuisine. She was always very curious about what was going on in the restaurant kitchen but what she heard from Malvina most often was "fuori dalla mia cucina!", meaning "get out of my kitchen!". She obeyed until once she decided that even a complete cooking analphabetic like herself could at least try to replicate the masterpieces being created in Malvina's kitchen. With a pen, paper, camera and Malvina's blessing she compiled the amazing recipes and over 300 photographs into this book.
