Hans Christian Andersen was a Danish author best known for writing children's stories including "The Little Mermaid" and "The Ugly Duckling." But he didn't just write short stories, and his intended audience wasn't restricted to children. In addition to his fairy tales, Andersen wrote poems, plays, novels, travel books, essays, and more. He hungered for recognition at home (Denmark) and abroad-and he got it! Eventually. Today, his stories can be read in over one hundred languages. But no matter what language they're in, Andersen's tales have got something for everyone. In them, you'll find beauty, tragedy, nature, religion, artfulness, deception, betrayal, love, death, judgment, penance, and-occasionally-a happy ending. They're complex tales, but since Andersen himself was pretty complex, we like to think that art imitates life. Or something like that. "The Emperor's New Clothes" (Danish: Kejserens nye Kl?der) is a short tale by Hans Christian Andersen about two weavers who promise an Emperor a new suit of clothes that is invisible to those who are unfit for their positions, stupid, or incompetent. When the Emperor parades before his subjects in his new clothes, no one dares to say that he doesn't see any suit of clothes until a child cries out, "But he isn't wearing anything at all!" The tale has been translated into over a hundred languages. Includes a unique illustration!

Lyons provides a fresh and thought-provoking understanding of the children's public mental health system, as well as the need to foster its evolution and improvement. He presents the history of child mental health systems, including the U.S. system's roots and the early 19th-century case of the Wild Boy of Aveyron, which demonstrated the potentially therapeutic effects of environment. He shows us why modern leaders and presidents have issued calls for improvements to the U.S. child mental health system, and what barriers have slowed or even halted this evolution. Such barriers, Lyons explains, can be removed with community development and better clinical outcomes management. In addition to providing information for parents, family members, and advocates for improving the lives of children needing mental health care, this work will also interest clinicians, policy makers and students in social work, clinical psychiatry, public health and public policy.
