New features in LoadRunner 9.5 | Learn LoadRunner Whats New In Loadrunner 11 First up, there is no LoadRunner version 10. The LoadRunner version number had slipped behind the other HP testing tools; so HP have realigned the numbering with the latest releases of Quality Center (now ALM) and QuickTest Professional. LoadRunner 11.00 is major update, with a large number of new features, and undercover tweaks. What's new in LoadRunner 11.00? | JDS Australia LoadRunner 11.50 was released on June 5th, during HP

Discover 2012 in Las Vegas. This release was originally going to be called LoadRunner 12.00, but this would have put it out of step with the version numbers for ALM/Quality Center and QTP, which might have created some marketing confusion. What's new in LoadRunner 11.50? | MyLoadTest • Service Test - The LoadRunner Controller can run scripts created in HP Service Test 11.00, HP's solution for creating and running automated tests for SOA and headless technologies. Refer to the Service Test documentation for details of creating Service Test scripts for a load testing scenario. Performance Testing: What's New in Loadrunner 11 HP's May 2013 release of

LoadRunner 11.52 was more than just a simple patch. While there are general performance improvements in VUGen and Analysis for general user functions, it also has several new features. What's new in LoadRunner 11.52? - Northway Solutions HP has officially announced the release of Loadrunner 11.5, and with it come a bevy of changes. The most immediately noticeable of these is a major retooling of the look and feel of VuGen. Over the coming days, we'll be breaking down and reviewing some of these changes in a couple of blog postings.
