2012 Reprint of 1953 Edition. Exact facsimile of the original edition, not reproduced with Optical Recognition Software. An invaluable guide to the art and mind of Virginia Woolf, "A Writer's Diary" was collected by her husband from the personal record she kept over a period of twenty-seven years. Included are entries that refer to her own writing and those that are clearly writing exercises, accounts of people and scenes relevant to the raw material of her work, and finally, comments on books she was reading. The first entry is dated 1918 and the last, three weeks before her death in 1941. Between these points of time unfolds the private world - the anguish, the triumph, the creative vision - of one of the great writers of our century.

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the

two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, *A Manual for Writers* remains the essential resource for students and their teachers.

The Edinburgh Postnatal Depression Scale (EPDS) is a questionnaire and was designed as a simple means of screening for postnatal depression in health care settings. The scale is now in use around the world and this book is a practical guide to using the scale in clinical practice, its origins and development background. This second edition has been revised and contains much advice based on years of experience. All chapters and references have been updated and the chapters on screening and counselling have been considerably revised, the evidence base on interventions for perinatal depression is provided, plus details of innovative methods such as internet-based therapy. The book includes the EPDS questionnaire itself in 58 other languages, plus a discussion of the questionnaire's cultural validity. The scale can also be used by researchers seeking information on factors which influence the emotional well-being of new mothers and their families and guidance is also given on use of the scale in research settings. The book will be useful for psychologists, psychiatrists, health visitors, midwives, family doctors, obstetricians and community psychiatric nurses, plus researchers in perinatal health.

Few books have had a greater impact than *A Sand County Almanac*, which many credit with launching a revolution in land management. Written as a series of sketches based principally upon the flora and fauna in a rural part of Wisconsin, the book, originally published by Oxford in 1949, gathers informal pieces written by Leopold over a forty-year period as he traveled through the woodlands of Wisconsin, Iowa, Arizona, Sonora, Oregon, Manitoba, and elsewhere; a final section addresses the philosophical issues involved in wildlife conservation. Beloved for its description and evocation of the natural world, Leopold's book, which has sold well over 2 million copies, remains a foundational text in environmental science and a national treasure.

To the surprise of many, George W. Bush pledged \$10 billion to combat AIDS in developing nations. Noted specialist Susan Hunter tells the untold story of AIDS in Africa, home to 80 percent of the 40 million people in the world currently infected with HIV. She weaves together the history of colonialism in Africa, an insider's take on the reluctance of drug companies to provide cheap medication and vaccines in poor countries, and personal anecdotes from the 20 years she spent in Africa working on the AIDS crisis. Taken together, these strands make it unmistakably clear that a history of the exploitation of developing nations by the West is directly responsible for the spread of disease in developing nations and the AIDS pandemic in Africa. Hunter looks at what Africans are already doing on the ground level to combat AIDS, and what the world can and must do to help. Accessibly written and hard-hitting, *Black Death* brings the staggering statistics to life and paints for the first time a stunning picture of the most important political issue today.
