Personality Development across the Lifespan examines the development of personality characteristics from childhood, adolescence, emerging adulthood, adulthood, and old age. It provides a comprehensive overview of theoretical perspectives, methods, and empirical findings of personality and developmental psychology, also detailing insights on how individuals differ from each other, how they change during life, and how these changes relate to biological and environmental factors, including major life events, social relationships, and health. The book begins with chapters on personality development in different life phases before moving on to theoretical perspectives, the development of specific personality characteristics, and personality development in relation to different contexts, like close others, health, and culture. Final sections cover methods in research on the topic and the future directions of research in personality development. Introduces and reviews the most important personality characteristics Examines personality in relation to different contexts and how it is related to important life outcomes Discusses patterns and sources of personality development

K. Warner Schaie I am pleased to write a foreword for this interesting volume, particularly as over many years, I have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague, mentor, or research collaborator. The editors begin their introduction by asking why one would want to read yet another book on human development. They immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical foundations of human development and fail to embed psychological constructs within the multidisciplinary context so essential to understanding development. This volume provides a positive remedy to past deficiencies in volumes on human development with a well-organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure. This approach does not surprise. After all, the editors and most of the contributors at one time or another had a connection to the Max Planck Institute of Human Development in Berlin, whether as students, junior scientists, or senior visitors. That institute, under the leadership of Paul Baltes, has been instrumental in pursuing a systematic lifespan approach to the study of cognition and personality. Over the past two decades, it has influenced the careers of a generation of scientists who have advocated long-term studies of human development in an interdisciplinary context.

This book offers insights from a seven-year study into the impact of English as an International Language at a national level, from the effect of rich English input on a previously monolingual people's linguistic repertoire to its effect on the situated language use demanded of speakers who find themselves in a new linguistic environment for which they have not been prepared. The changes described in the book have occurred in a speech community that identifies strongly with the local language, but finds itself increasingly having to use another language to perform daily functions in education and work. Findings describe how the official language and educational policies have not addressed this new linguistic ecology of Iceland. The findings of these studies have larger international practical, educational, empirical, and theoretical implications and should be relevant to anyone interested in the impact of English as an International Language.

Lifespan developmental neuropsychology is the study of the systematic behavioral, cognitive, and psychosocial changes and growth that occur across infancy, adolescence, adulthood and later life. This book provides insight into how brain-behavior relationships change over time, how disorders differ in presentation across the lifespan, and what longer-term outcomes look like. Providing practical guidance in a succinct and accessible format, this book covers the most common neurodevelopmental, behavioral and cognitive disorders, including but not limited to ADHD, cerebral palsy, traumatic brain injury, and epilepsy. Key points concerning the practice of developmental neuropsychology are emphasized in order to aid understanding of neuropsychological development and its impact on behavior, emotion, cognition, and social integration. This will be essential reading for advanced graduate students and early career professionals in the fields of neuropsychology, pediatric psychology, clinical psychology, school psychology, and rehabilitation psychology, as well as practitioners in the allied fields that interact with neuropsychology.

This second edition of Career Counseling Across the Lifespan: Community, School, Higher Education, and Beyond is the latest volume in the Issues in Career Development Series, edited by Drs. Grafton Eliason, Mark Lepore, Jeff Samide, and John Patrick, from California University of Pennsylvania and Clarion University of Pennsylvania. The purpose of Career Development Across the Lifespan is to provide a broad and in-depth look at the field of career development as it applies to individuals involved in all areas of community counseling, school counseling, and higher education. The book

will examine some of the field's major theories, themes, approaches, and newest models incorporating chapters from national and international career counseling experts. Specific emphasis is spent examining issues reflective of today's challenges in developing and maintaining a workforce that is diverse, flexible, and efficient. Readers will be provided with an action-based framework built on the best available research. This text book is truly the culmination of a decade's work, compiling comprehensive studies from four previous volumes and updating key concepts in career counseling with the most contemporary theories and innovations. We examine three primary domains of career counseling throughout all of the developmental stages of the lifespan: community, schools K-12, and higher education. We include a specific focus on career history and theories, to prepare students for both the counseling environment and for national exams leading to certification and licensure, such as the (NCE) National Counseling Exam. We also include cutting edge research on contemporary topics, including such areas as: military careers, life after the military, individuals with disabilities or special needs, career counseling in our current socio-economic environment, and current technologies such as virtual counseling. In addition, we have added case studies and key terms as study guides at the end of each chapter. We are fortunate to include many recognized experts in the field of career counseling. Career Counseling Across the Lifespan: Community, School, Higher Education, and Beyond is a comprehensive text, written to address the broad needs of career counselors, educators, and students today.

Work Across the Lifespan coalesces lifespan theoretical and lifespan-based empirical perspectives on aging and work. The books examines human development theories that explain patterns of growth, trajectories of change and maintenance of continuities across the entirety of life. Using the implicit focus of these theories on aging as a guide to intra-individual change and goal-based self-regulation processes, the book examines the relationship between work and aging. Drawing upon developmental psychology, life course sociology, microeconomics, and critical gerontology, this authoritative reference brings together the collective thinking of researchers who study aging and working, and aging and careers. Summarizes key tenets of lifespan theories Draws upon theories from work and organizational psychology, organizational behavior, and human resources management Applies theories to work, organizational life and careers Examines age and work-related processes Provides an exclusive lifespan focus on work and aging Focuses on aging as a continuous intraindividual change process

Human Development & Performance Throughout the Lifespan, 2nd Edition is ideal for occupational therapy, physical therapy, and other rehabilitation disciplines. It provides a broad, occupation-based viewpoint of development and performance throughout all life stages with an emphasis on the factors that influence daily participation and optimal performance of desired daily life tasks. The authors use a life course conceptual model as an organizational foundation for clinical reasoning to help readers understand how to implement the activity- and participation-based goals and outcomes for therapy. Written by an occupational therapist and a physical therapist, the book incorporates chapters by leading experts in human development, giving users cutting-edge information and a wide range of perspectives. By integrating information from the International Classification of Function and Disability (ICF) with a developmental life-task perspective, the book gives both newcomers and experienced professionals an essential, contemporary frame of reference. Laura E. Berk Development Through the Lifespan, 4e What reviewers are saying... ""This is the most engaging textbook I have reviewed or used... truly remarkable in its depth, research and professional, personable, and engaging writing style... This book sets a new standard of excellence...I especially liked the excellent applications-implications included... far superior to nearly all other texts I am familiar with." " -Dale Lund, University of Utah ""One of the strengths of this book is a sense that we are learning from someone who is both a great scholar and a very wise and experienced person. Berk has credibility on both a professional and personal level. . . . [The text] also offers a sense that my students are getting exposure to the best research and ideas available in my field." -David Shwalb, Southeastern Louisiana University ""[I appreciate the] great use of concrete, real-life examples of the various concepts throughout the chapter. This is incredibly helpful for students' learning and retention of the material." " -Tracie Blumentritt, University of Wisconsin La Crosse "I especially like the way Dr. Berk addresses policy in this text... the Social Issues boxes are very useful in engaging students in topics of real-life importance that go beyond the individual." " -Ashley Maynard, University of Hawaii ""This is a high-quality text with wonderful pedagogical features." " -Laurie Gruntmeir, Redlands Community College ""One of the greatest strengths of any Berk book on human development is the quality of the research the author selects for inclusion. The timeliness and relevancy of the selected research goes a long way in enhancing the caliber of the information. The author has created a good blend of historic, classic, contemporary, and practical research, which is appropriate for the topics covered." " -Lanthan Camblin, University of Cincinnati ""Chapter 8 is outstanding. . . . The discussion of the factors that influence social and emotional adaptation illustrates the complexity of development, but in a highly readable and understandable fashion." " -Byron Egeland, University of Minnesota ""Chapter 19 is extraordinary. Other textbooks pay lip service to the topic (of death, dying and bereavement) and have the tendency to gloss over the material. Berk has written a phenomenal chapter... it is thorough, sensitive, and well written." " -Cheryl Anagnopoulos, Black Hills State University

Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, Lifespan Development: Lives in Context offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.

This handbook presents the latest theories and findings on parenting, from the evolving roles and tasks of childrearing to insights from neuroscience, prevention science, and genetics. Chapters explore the various processes through which parents influence the lives of their children, as well as the effects of parenting on specific areas of child development, such as language, communication, cognition, emotion, sibling and peer relationships, schooling, and health. Chapters also explore the determinants of parenting, including consideration of biological factors, parental self-regulation and mental health, cultural and religious factors, and stressful and complex social conditions such as poverty, work-related separation, and divorce. In addition, the handbook provides evidence supporting the implementation of parenting programs such as prevention/early intervention and treatments for established issues. The handbook addresses the complementary role of universal and targeted parenting programs, the economic benefits of investment in parenting programs, and concludes with future directions for research and practice. Topics featured in the Handbook include:

- The role of fathers in supporting children's development.
- Developmental disabilities and their effect on parenting and child development.
- Child characteristics and their reciprocal effects on parenting.
- Long-distance parenting and its impact on families.
- The shifting dynamic of parenting and adult-child relationships.
- The effects of trauma, such as natural disasters, war exposure, and forced displacement on parenting.

The Handbook of Parenting and Child Development Across the Lifespan is an essential reference for researchers, graduate students, clinicians, and therapists and professionals in clinical child and school psychology, social work, pediatrics, developmental psychology, family studies, child and adolescent psychiatry, and special education.

This book promotes a positive message for people with Down syndrome across the world. Living with Down Syndrome is a positive experience for the majority of children and adults with Down syndrome, and for their families. Of course there are difficulties to be faced, but quality of life, from infancy to old age, is determined more by the quality of healthcare, education and social inclusion offered to individuals, than by the developmental difficulties that are associated with Down syndrome. The aim of this book is to bring the latest information on research and good practice to families, practitioners and policy makers in order improve the services available to individuals with Down syndrome in all countries.
