Macroeconomic Theory S. Chand Publishing

Modern Economic Theory is a critique on how monetary revolution across the globe is changing the course of world economies, financial systems and markets. Beginning with discussion on price theory and microeconomics, this classic textbook progresses to describe comprehensively, theory of income and employability or macroeconomics, money and banking, international economies and public finance. Economic systems, economics of development and planning and economies of welfare provide a clear idea about recent developments in and criticism of compensation principle, market structures and social welfare. It adequately meets the requirements of the BA and B.Com courses (Pass and Honours). In addition, postgraduate students of Arts and Commerce and aspirants of various competitive examinations will also find the book very useful and informative.

Principles of Macroeconomics Oxford University Press

This book is basically concerned with the problems of unemployment, economic instability, inflation, and economic growth.

Macroeconomics S. Chand Publishing

The development of the endogenous growth model rekindled interest in growth theory. In contrast to the neo-classical model, long-run endogenous growth emerged as an equilibrium outcome, reflecting the behaviour of optimizing agents in the economy. This book brings together a number of contributions in growth theory and macroeconomic dynamics, reflecting these developments and the ongoing debate over the relative merits of neo-classical and endogenous growth models. It focuses on the emergence of three important aspects: First, it develops growth models that extend the underlying theory in different directions. Second, it addresses one of the concerns of the literature on growth and dynamics: the statistical properties of underlying data and the effort to ensure that growth models are consistent with empirical evidence. Third, it discusses the increasingly international focus of macrodynamics and growth theory, an inevitable consequence of the integration of the world economy.

Principles of Microeconomics, 22e South Asia Books

The book makes a comprehensive and analytical study of theories of demand, production/cost and determination of price and output of products in different market structures. It also discusses theory of factor pricing and income distribution as wages, rent, interest and profits. Above all, it critically analyses the conditions of economic efficiency and maximum social welfare and causes of market failures. It takes a further lead with this revision by aligning its contents with the prescribed UGC model curriculum and new Choice Based Credit System (CBCS) syllabus.
