First Published in 1983. Social problems have assumed a growing importance in France, as in all developed countries, especially since the end of the last century. While traditional early nineteenth century liberalism denied the existence of social problems as such, believing the greatest possible economic freedom to be the sole solution to all evils, the emphasis is still placed more and more insistently on the need for a definite and concerted welfare effort, to increase the material well-being of individuals and families. Since the second edition of this book was published in 1962, legislation and welfare services, and social reality itself have changed as much through circumstances as through political and economic evolution. It follows that the present edition of this book is, in fact, an almost wholly new book. It attempts to present a comprehensive view of French social life, drawing attention especially to welfare services and legislation as they are at the beginning of 1979.

This book is written strictly for the first and second semester diploma students of engineering chemistry according to the revised syllabus. It aims to provide a thorough understanding of the chemical concepts, theories and principles in Engineering Chemistry in a clear and concise manner, so that the average students are able to grasp the intricacies of the subject.

Explaining general concepts of atomic structure and chemical bond, the book covers all advanced topics such as acid-base theory, concentration of solutions, electrochemistry, corrosion, metallurgy, hydrocarbons, sources of water and its treatment, lubricants and adhesives, fuel, polymer and environmental chemistry. Each theoretical concept is well supported by

illustrative examples. Besides, the book provides a large number of solved problems to reinforce the theoretical understanding of concepts. Each chapter contains glossary terms and provides short questions and long questions for practice. Previous year question papers and model questions with answers are appended at the end of the book to help students ace in examinations.
