Suspension is probably
the most misunderstood
aspect of motorcycle
performance. This book,
by America's premier
suspension specialist,
makes the art and science
of suspension tuning
accessible to professional
and backyard motorcycle
mechanics alike. Based on
Paul Thede's wildly
popular Race Tech
Suspension Seminars, this
step-by-step guide shows
anyone how to make their

bike, or their kid's, handle
like a pro's. Thede gives a
clear account of the three
forces of suspension that
you must understand to
make accurate
assessments of your
suspension's condition.
He outlines testing
procedures that will help
you gauge how well
you're improving your
suspension, along with
your riding. And, if you're
inclined to perfect your
bike's handling, he even
explains the black art of
chassis geometry. Finally,
step-by-step photos of
suspension disassembly
and assembly help you
rebuild your forks and
shocks for optimum
performance. The book
even provides detailed
troubleshooting guides for
dirt, street, and
supermoto--promising a
solution to virtually any
handling problem.
