 How should citizens of the
 world respond to the
 emergence of the United
 States as the planet's sole
 superpower and the
 military, commercial, and
 cultural centre of a new
 kind of global empire?
 This question poses the
 central dilemma of our
 time: How can we

elaborate a global rule of
 law based on principles of
 equality and democracy
 when the world's most
 powerful polity seemingly
 acknowledges no higher
 authority in the
 international arena than
 its own domestic
 priorities? For Anthony
 Hall the answer lies in the
 concept of the Fourth
 World, an inclusive
 intellectual tent covering
 a wide range of
 movements whose
 leaders have sought to
 implement alternative
 visions of globalization to
 those that have prevailed

since the Columbian
 conquests began in 1492.
 Its basic principles include
 recognition of the
 inherent rights of all
 peoples to self-
 determination and an
 enlightened embrace of
 the ecology of biocultural
 diversity. role of the
 United States began at its
 founding. The Royal
 Proclamation of 1763,
 which offered a qualified
 recognition of Aboriginal
 and treaty rights,
 infuriated many Anglo-
 American colonists. Their
 resulting sense of
 grievance was articulated

in the Declaration of Independence which proclaims the inalienable rights of all men even as it accuses King George III of having endeavoured to bring on the inhabitants of our frontiers the merciless Indian savages. The United States has never faced, let alone resolved, this fundamental contradiction in its founding document. This failure manifested itself in the lawlessness and militarism that characterized US treatment of Indigenous peoples in the most

formative phase of the country's frontier expansionism. The exclusion of savages from the republic's founding ideals of human equality came increasingly to permeate US foreign policy, culminating in the ethnic and religious prejudices colouring the so-called War on Terrorism. policies toward Aboriginals that have done much to shape the interconnected histories of the United States, Canada, Latin America, South Africa, Australia, New Zealand, and many

other countries.

It's been ten years since open data first broke onto the global stage. Over the

past decade, thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges. Meanwhile, issues related to data rights and privacy have moved to the centre of public and political discourse. As the open data movement enters a new phase in its evolution, shifting to target real-world problems and embed open data thinking into other existing or emerging communities of

practice, big questions still remain. How will open data initiatives respond to new concerns about privacy, inclusion, and artificial intelligence? And what can we learn from the last decade in order to deliver impact where it is most needed? The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world, uncovering the issues that will shape the future of

open data in the years to come.

In the aftermath of World War II, twelve million German expellees lost their homes in Central and Eastern Europe. The overwhelming majority came to occupied Germany. However, expellees found themselves also stranded in Western Europe, Africa and the Americas, which is often overlooked by researchers and the public. Going beyond the standard narratives of

flight, vigilante evictions and transfers, this book follows expellees in West Germany and Canada and shows, for example, how German prisoners-of-war, exiles or immigrants experienced the expulsions in distant Canada. As the author illustrates making extensive use of oral histories, their experiences were an integral part of the multi-faceted expellee story even though they were physically absent from their homes. Juxtaposing the record of two

countries with disparate public discourses on immigration, the author also reveals how in both countries expellees eventually adopted national identities which, based on their ethno-regional heritage, reflected their experience of extreme nationalism, war and expulsion as well as the initially difficult settlement into a new political, social and cultural environment.

The growing importance of immigration in the United States today prompted this examination of the adequacy of U.S. immigration data. This volume summarizes data

needs in four areas: immigration trends, assimilation and impacts, labor force issues, and family and social networks. It includes recommendations on additional sources for the data needed for program and research purposes, and new questions and refinements of questions within existing data sources to improve the understanding of immigration and immigrant trends.

ONE OF THE BEST BOOKS

OF THE YEAR: THE NEW YORK TIMES • NPR • THE GUARDIAN From pole to pole and across decades of lived experience, National Book Award-winning author Barry Lopez delivers his most far-ranging, yet personal, work to date. *Horizon* moves indelibly, immersively, through the author's travels to six regions of the world: from Western Oregon to the High Arctic; from the Galápagos to the Kenyan desert; from Botany Bay in Australia to finally, unforgettably, the ice

shelves of Antarctica. Along the way, Lopez probes the long history of humanity's thirst for exploration, including the prehistoric peoples who trekked across Skraeling Island in northern Canada, the colonialists who plundered Central Africa, an enlightenment-era Englishman who sailed the Pacific, a Native American emissary who found his way into isolationist Japan, and today's ecotourists in the tropics. And always, throughout his journeys to some of the hottest,

coldest, and most desolate places on the globe, Lopez searches for meaning and purpose in a broken world.

Expellees in Post-War West Germany and Canada

Wayne State University Press

"During the century 1850-1950 Vancouver Island attracted Imperial officers and other Imperials from India, the British Isles, and elsewhere in the Empire. Victoria was the main British port on the north-west Pacific Coast for forty years before the city

of Vancouver was founded in 1886 to be the coastal terminus of the Canadian Pacific Railway. These two coastal cities were historically and geographically different. The Island joined Canada in 1871 and thirty-five years later the Royal Navy withdrew from Esquimalt, but Island communities did not lose their Imperial character until the 1950s."--P. [4] of cover.

Part One of this strongly worded, informed, and

wide-ranging collection examines key issues for the future of Canadian criticism. Part Two offers new readings of important works by Grove, Wilson, MacLennan, Davies, Laurence, Hood, Wiebe, Hodgins, and Atwood. As W.J. Keith argues, `We still have a mission: to have our literature recognized as an essential reflection of our national life. This is what I mean by retrenchment and consolidation. Literature can survive without literary criticism but it cannot survive if it is

unknown and unread. It is criticism's prime function at the present time to see that it is both known and read with that mature enjoyment which is a combination of emotional sensitivity and humane intelligence. As critics, scholars, editors, we shall not be fulfilling our responsibilities or justifying our existence if we attempt anything less.' Or as Keith modestly observes in his introduction to this collection, 'If this book is of any interest, it will be because Canadian

literature is an important subject. Literary commentators like myself are middle-men, and should be prepared to admit the fact. If this book succeeds in helping readers to appreciate the works of Canadian writers that I discuss, and to derive increased pleasure and insight from them, it will have served its purpose. I can see no other justification for it -- or for any other work of criticism.'

In The American Empire and the Fourth World
Anthony Hall presents a sweeping analysis of encounters between indigenous people and the European empires, national governments, and global corporations on the moving frontiers of globalization since

Columbus "discovered America." How should we respond to the emergence of the United States as the military, commercial, and cultural centre of a global empire? How can we elaborate a global rule of law based on equality and democracy when the world's most powerful polity acknowledges no higher authority in the international arena than its own domestic priorities? For Hall the answer lies in the concept of the Fourth World, an inclusive intellectual tent covering a wide range of

movements whose leaders seek to implement alternative views of globalization. Larger than any earlier political movement, the Fourth World embraces basic principles that include the inherent rights of self-determination and a more just approach to the crafting and enforcement of international law.

and the Caribbean. Rebellion of 1837 in Upper Canada Scarborough, Ont. : Prentice Hall Ginn Canada

Analyses the American West as a constantly moving, mutating idea within a complex global culture

Walden Springer Provides practical applications of democratic teaching for classes in history/social studies education, multicultural and social justice education, community service and civic engagement, and

education and public policy. We, the Students and Teachers shows history and social studies educators how to make school classrooms into democratic spaces for teaching and learning. The book offers practical strategies and lesson ideas for transforming democratic theory into instructional practice. It stresses the importance of students and teachers working together to create community and change. The book serves as an essential text for history and social studies

teaching methods courses as well as professional development and inservice programs for history and social studies teachers at all grade levels. “The key to the excellent potential of this book is its assertion that democratic teaching can be linked to content, especially historical content, not just to a generic notion of ‘student-centered instruction.’ The theory-to-practice emphasis is very explicit, as is the emphasis on the voices of the teachers and students who participated

in the research. The book also takes a highly creative approach to its topic that I find very refreshing.” — Elizabeth Washington, University of Florida “This is an important book. Maloy and LaRoche reveal the challenges that face historians as we grapple with increasingly fraught public and political perceptions of our discipline. Their strategies for reconstituting the classroom as a laboratory for instilling democratic values and practices are both ingenious and

practical.” — Dane Morrison, author of *True Yankees: Sea Captains, the South Seas, and the Discovery of American Identity*
The Saturday Evening Post BRILL
Jacques Cartier's voyages of 1534, 1535, and 1541 constitute the first record of European impressions of the St Lawrence region of northeastern North American and its peoples. The Voyages are rich in details about almost every aspect of the region's environment and

the people who inhabited it. As Ramsay Cook points out in his introduction, Cartier was more than an explorer; he was also Canada's first ethnographer. His accounts provide a wealth of information about the native people of the region and their relations with each other. Indirectly, he also reveals much about himself and about sixteenth-century

European attitudes and beliefs. These memoirs recount not only the French experience with the Iroquois, but also the Iroquois' discovery of the French. In addition to Cartier's Voyages, a slightly amended version of H.P. Biggar's 1924 text, the volume includes a series of letters relating to Cartier and the Sieur de Roberval, who was in command of Cartier on the last voyage. Many of

these letters appear for the first time in English. Ramsay Cook's introduction, 'Donnacona Discovers Europe,' rereads the documents in the light of recent scholarship as well as from contemporary perspectives in order to understand better the viewpoints of Cartier and the native people with whom he came into contact.
