A great resource for your home care and hospice staff. The new 2012 Standards for Home Health, Personal Care and Support Services, and Hospice can help you quickly and easily find the standards and scoring information you need. It puts the latest accreditation requirements, policies, and procedures at your fingertips. It also includes scoring information at every element of performance, including scoring category, criticality, documentation requirement, and Measure of Success. The 2012 Standards for Home Health, Personal Care and Support Services, and Hospice has color-coded tabs, allowing you to find exactly what you need when you need it: The 2012 standards, National Patient Safety Goals, and Accreditation Participation Requirements only for home health, personal care and support services, and hospice organizations Updated accreditation process chapter, which includes new decision categories and the 2012 home care accreditation decision rules, and sentinel events chapter Applicability grids at each standard to identify setting-specific requirements for your home health, personal care and support services, or hospice organization An appendix listing Medicare requirements for hospice This 6 x 9 softcover, spiral-bound book makes a perfect reference guide handy in meetings, for orientation and training, and as a practical overview of the Joint Commission's accreditation requirements for all your staff.

Administrator's Handbook for Community Health and Home Care Services Jones & Bartlett Learning Hugely relevant in today's world of healthcare performance management, this comprehensive work applies the analytical framework of Data Envelopment Analysis methodology to provide health care administrators with specific tools for performance evaluation. Most important, the book provides health care practitioners and administrators with information of what is lacking in specific aspects of performance and then outlines the ways how these performance inadequacies can be improved.

Recommendations for the Improvement of Home Health Services in Minnesota Rowman & Littlefield Publishers

Among the issues confronting America is long-term care for frail, older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves. Improving the Quality of Long-Term Care takes a comprehensive look at the quality of care and quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these and other key questions. This book explores strengths and limitations of available data and research literature especially for settings other than nursing homes, on methods to measure, oversee, and improve the quality of long-term care. The committee makes recommendations on setting and enforcing standards of care, strengthening the caregiving workforce, reimbursement issues, and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care.

Home Health Care Cengage Learning

This book is intended to help an individual set up and open a home health-care agency. The steps provided in this book are applicable to most types of agencies. It all depends on what you chose to apply for on your initial application for home health care. Some steps may vary a little, but for the most part, the information and process are the same as written in this book.

Handbook of Home Health Care Administration DIANE Publishing

This workbook provides the tools necessary to implement outcome-based patient care using OASIS outcomes, OBQI, Care pathways and disease management.

License Application Procedures Joint Commission Resources

Addresses concerns about the rapid growth in the number of certified home health agencies (HHA) certified to care for Medicare beneficiaries & the effectiveness of the survey & certification process. Becoming a Medicare-certified HHA is relatively easy -- probably too easy, given the large number of problem agencies identified in various recent studies. This report determines how the Health Care Financing Admin. (HCFA): controls the entry of HHAs into the Medicare program, & ensures that certified HHAs continue to comply with Medicare's conditions of participation & associated standards. Also looks at HCFA's process for decertifying HHAs.

Quality Assurance in Home Care and Hospice Organizations Jones & Bartlett Publishers

Individuals with disabilities, chronic conditions, and functional impairments need a range of services and supports to keep living independently. However, there often is not a strong link between medical care provided in the home and the necessary social services and supports for independent living. Home health agencies and others are rising to the challenges of meeting the needs and demands of these populations to stay at home by exploring alternative models of care and payment approaches, the best use of their workforces, and technologies that can enhance independent living. All of these challenges and opportunities lead to the consideration of how home health care fits into the future health care system overall. On September 30 and October 1, 2014, the Institute of Medicine and the National Research Council convened a public workshop on the future of home health care. The workshop brought together a spectrum of public and private stakeholders and thought leaders to improve understanding of the current role of Medicare home health care in supporting aging in place and in helping high-risk, chronically ill, and disabled Americans receive health care in their communities. Through presentations and discussion, participants explored the evolving role of Medicare home health care in caring for Americans in the future, including how to integrate Medicare home health care into new models for the delivery of care and the future health care marketplace. The workshop also considered the key policy reforms and investments in workforces, technologies, and research needed to leverage the value of home health care to support older Americans, and research priorities that can help clarify the value of home health care. This summary captures important points raised by the individual speakers and workshop participants.

Homemaker Home Health Aide (Book Only) Jones & Bartlett Learning

The rapid growth of home health care has raised many unsolved issues and will have consequences that are far too broad for any one group to analyze in their entirety. Yet a major influence on the

safety, quality, and effectiveness of home health care will be the set of issues encompassed by the field of human factors research-the discipline of applying what is known about human capabilities and limitations to the design of products, processes, systems, and work environments. To address these challenges, the National Research Council began a multidisciplinary study to examine a diverse range of behavioral and human factors issues resulting from the increasing migration of medical devices, technologies, and care practices into the home. Its goal is to lay the groundwork for a thorough integration of human factors research with the design and implementation of home health care devices, technologies, and practices. On October 1 and 2, 2009, a group of human factors and other experts met to consider a diverse range of behavioral and human factors issues associated with the increasing migration of medical devices, technologies, and care practices into the home. This book is a summary of that workshop, representing the culmination of the first phase of the study.

A Utilization Review Program for Home Health Agencies Springer Science & Business Media

As more people live longer, the need for quality long-term care for the elderly will increase dramatically. This volume examines the current system of nursing home regulations, and proposes an overhaul to better provide for those confined to such facilities. It determines the need for regulations, and concludes that the present regulatory system is inadequate, stating that what is needed is not more regulation, but better regulation. This long-anticipated study provides a wealth of useful background information, in-depth study, and discussion for nursing home administrators, students, and teachers in the health care field; professionals involved in caring for the elderly; and geriatric specialists.

2012 Standards for Home Health, Personal Care and Support Services, and Hospice Jones & Bartlett Learning

Home health agencies (HHA) play an important role in the U.S. health care system -- allowing individuals who are unable to leave home without great difficulty to receive certain medical or therapeutic care in their own homes. In 2000, Medicare covered home health services for 2.5 million people at a cost of \$8.7 bill. This report assesses quality-related aspects of HHAs. Covers these questions: (1) what is known about the quality of care provided by HHAs, (2) is the current survey

process adequate to identify quality-of-care problems at both parent & branch offices, (3) are state investigations of complaints made against HHAs effective in protecting patients, & (4) is Fed. oversight of state survey activities & enforcement efforts adequate? Tables.

Health Care Financing Review National Academies Press

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality

(AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)." - online AHRQ blurb, <http://www.ahrq.gov/qual/nursesdbk/>
