Developing Excel Models to Raise Capital, Increase Cash Flow, Improve Operations, Plan Projects, and Make Decisions Arihant Publications India limited

Sports athletes are connected to business entrepreneurship due to the relationships of business strategies, psychological, and motivational characteristics according to authoritative research. Barrel racing has become a limitless opportunity for success becoming the second favorite event in the rodeo. However, the barrel-racing cowgirl faces criticisms, perhaps, due to a psychic prison that society continues to live from the lack of knowledge of this type of culture. It is debated this industry is not an efficient entrepreneurship endeavor. However, the woman barrel racer is a sports athlete who participates in her own activity to obtain capital, self-actualization, and achievement. It is further acknowledged she is responsible for her own financial resources to pay for business expenses in order to continue the venture. Cowboys have been studied and confirmed to be entrepreneurs so why would women barrel racers be different? The purpose of this study was to compare and contrast Women Barrel Racers (also referred as World Athlete Entrepreneurs) with Women Business Entrepreneurs and determine if there is an association between women who race and women who have their own businesses. The main areas of concern were business strategies, psychological traits, and motivational characteristics. This study also investigated the Birth Theory and the Only or Eldest Daughter Syndrome. Finally, barriers experienced by World Athlete Entrepreneurs and Women Business Entrepreneurs were analyzed.

Handbook of Research Methodologies and Design in Neuroentrepreneurship Edward Elgar Publishing

Creativity and innovation as hallmarks of entrepreneurship have been recognized as the modern-day mantra for success in business and industry. It is with this realization, the Government of India, by announcing a number of policies and schemes, has been giving ever-increasing emphasis on developing creativity and innovation in entrepreneurship in the country. So much so, an increasing number of educational institutions in the country have started offering the paper on creativity and innovation in entrepreneurship in their course curricula. Because Creativity and Innovation in Entrepreneurship, as a subject, is relative of recent origin in India, there has so far not been any comprehensive textbook available on the subject in the Indian context. The present book is a modest attempt to fill in this gap.

Creatives who read this book will learn: How to launch their creative startups Ways to run and market their venture efficiently Effective methods to test new services, products, and experiences To incorporate their entire skill set in an authentic way That they can do all of this now, without business classes or special training With actionable information, real-world case studies as examples, and specific steps to build business acumen from an artistic perspective, this book puts entrepreneurial tools into the frameworks and mindsets of those working in creative fields. Paula Landry, MBA, is a creator, writer/filmmaker, and musician who has been teaching and coaching creatives for a decade, through undergraduate and graduate programs in New York City, as well as at various non-profits.

The Entrepreneur's Toolkit Apress

Financial Modeling for Business Owners and Entrepreneurs: Developing Excel Models to Raise Capital, Increase Cash Flow, Improve Operations, Plan Projects, and Make Decisions may be one of the most important books any entrepreneur or manager in a small or medium-sized enterprise will read. It combines logical business principles and strategies with a step-by-step methodology for planning and modeling a company and solving specific business problems. You'll learn to create operational and financial models in Excel that describe the workings of your company in quantitative terms and that make it far more likely you will avoid the traps and dead ends many businesses fall into. Serial entrepreneur and financial expert Tom Y. Sawyer shows how to break your company down into basic functional and operational components that can be modeled. The result is a financial model that, for example, you can literally take to the bank or bring to local angel investors to receive the funding you need to launch your business or a new product. Or it might be a model that shows with startling clarity that your new product development effort is a likely winner—or loser. Even better, you'll learn to create models that will serve as guideposts for ongoing operations. You'll always know just where you are financially, and where you need to be. The models you will learn to build in Financial Modeling for Business Owners and Entrepreneurs can be used to: Raise capital for

startup or any stage of growth Plan projects and new initiatives Make astute business decisions, including go/no-go assessments Analyze ROI on your product development and marketing expenditures Streamline operations, manage budgets, improve efficiency, and reduce costs Value the business when it is time to cash out or merge In addition to many valuable exercises and tips for using Excel to model your business, this book contains a combination of practical advice born of hard-won lessons, advanced strategic thought, and the insightful use of hard skills. With a basic knowledge of Excel assumed, it will help you learn to think like an experienced business person who expects to make money on the products or services offered to the public. You'll discover that the financial model is a key management tool that, if built correctly, provides invaluable assistance every step of the entrepreneurial journey. Tom Y. Sawyer has used the principles this book contains to create financial models of numerous startup and early-stage companies, assisting them in planning for and raising the capital that they needed to grow their businesses and ultimately exit with multiples of their initial investment. Financial Modeling for Business Owners and Entrepreneurs, a mini-MBA in entrepreneurship and finance, will show you how you can do the same. Note: This book is an updated version of Sawyer's 2009 title, Pro Excel Financial Modeling.

Multiple Choice Tests in Principles of Business Arihant Publications India limited

The ingredients for success in starting and developing a technology-based company aren't obvious. Why, for example, did Digital Equipment Corporation succeed--and indeed become one of the most successful high-tech corporations in the world--while dozens of other companies with similar beginnings fail? It is a question that demands careful consideration by anyone setting up a new company or who is interested in starting one. In *Entrepreneurs in High Technology*, Edward Roberts, a Professor at the MIT Sloan School of Management, offers entrepreneurs a goldmine of information on starting, financing, and expanding a high-tech firm. His book reveals the results of research conducted over twenty-five years on several hundred high-tech firms, and it reflects the insights of the author's own first-hand experience as a company founder, director, and venture capitalist. Focusing on firms in the Greater Boston area--many of which have had technological links with MIT--Roberts traces the origins and the evolution of the high-technology failures and successes. He examines the work experience and family backgrounds of successful technical entrepreneurs, their sources of funding, and the ways they respond to the challenge of business growth. He compares the track records of firms with multi-founder teams and firms with individual founders, contrasts the performance of consulting firms and research-and-development contractors against companies that start out with a product, identifies the factors that limit an enterprise's ability to raise outside capital, and explores the critical influence of marketing orientation on successful companies. In a penetrating analysis of highly successful ventures, the author reveals the importance of strategically transforming the company to a market-oriented focus, and he examines the widespread tendency, even among the most successful high-tech firms, to displace the founder before the company achieves "super-success." For anyone planning to start a technology-based enterprise, *Entrepreneurs in High Technology* is essential reading--an invaluable preview of the financial, organizational, and marketing issues that confront every new high-tech venture. For business and technology watchers, it is an informative account of the promise and the perils entailed in bringing innovative ideas to the marketplace.

Entrepreneurship With Practical Class XII by Dr. S. K. Singh, Sanjay Gupta John Wiley & Sons

This Handbook provides an overview of neuroscience-driven research methodologies and how those methodologies might be applied to theory-based research in the nascent field of neuroentrepreneurship. It presents the current thinking and examples of pioneering work, serves as a reference for those wishing to incorporate these methods into their own research, and provides several helpful discussions on the nature of an answerable question using neuroscience techniques. It includes concrete examples of new ways to conduct research that can shed light onto such areas as decision-making and opportunity recognition, allowing us to ask different, perhaps better, questions than ever before.

SBPD Publications Morgan James Publishing

Arihant CBSE Information Technology Term 2 Class 10 for 2022 Exam (Cover Theory and MCQs) SBPD Publications

This book is a commendable source of reference for entrepreneurship researchers. It offers insight into a number of focused research accounts that may assist other researchers in their entrepreneurship research proposals and execution. . . the literature review section will be of particular value to such early scholars of the field. The book is highly recommended for postgraduate entrepreneurship students and would be worthy of filling a space on any active entrepreneurship researcher's bookshelf. David Douglas, International Journal of Entrepreneurial Behaviour and Research Strategic choices made by entrepreneurs have major consequences for SME performance. This book explores the factors that influence entrepreneurial strategic decisions using a cognitive theoretical framework. The proposed model, based on a dual processing approach, integrates motivation, emotions and information processing modes and is tested in several empirical studies. The results show the model's potential for furthering interesting research agendas in entrepreneurial cognition research. The authors also reveal that entrepreneurial cognitions can be elicited and represented in the form of cognitive maps. The structural complexity of the cognitive maps (cognitive complexity) is an important prerequisite of effective strategic decisions and is a core concept for the advancement of our knowledge in entrepreneurial cognition. The book is an informed and interesting exploration of entrepreneurial cognition with both theoretical and methodological contributions to this field of research. Entrepreneurial Strategic Decision-Making will be of great interest to undergraduate students and academics in the field of entrepreneurship. Policymakers will learn from this book to understand the distinctions between various types of entrepreneurial decision-makers and the way they make strategic decisions. *With-disciplinary Based Questions* Edward Elgar Publishing

Are you an entrepreneur? Then this book may be the next critical step towards the success you want and deserve. While that statement may seem presumptuous, it should resonate with the entrepreneur in you. Even if this book isn't the missing ingredient, the innovative business owner and manager in you may still come to treasure it and continually refer back to it. The authors wrote this book for those free thinkers who constantly look for the edge that creates the success.
