Now in its 10th edition, English Skills with Readings emphasizes personalized learning to address

student deficits in grammar and mechanics. Throughout the book, students are exposed to examples of writing that reflect the three key realms of their lives - personal, academic, and workplace. Seeing these different types of writing helps students understand the critical way in which writing will have an impact on the many facets of their lives. English Skills with Readings continues to encourage new writers to see writing as a skill that can be learned and a process that must be explored. The four skills, or bases, for effective writing are as follows: • Unity: Discover a clearly stated point, or topic sentence, and make sure that all other information in the paragraph or essay supports that point. • Support: Support the points with specific evidence, and plenty of it. • Coherence: Organize and connect supporting evidence so that paragraphs and essays transition smoothly from one bit of supporting information to the next. • Sentence skills: Revise and edit so that sentences are error-free for clearer and more effective communication. The four bases are essential to effective writing, whether it be a narrative paragraph, a cover letter for a job application, or an essay assignment. The new edition also includes a new and updated focus on information literacy, working with sources and writing research papers, making this a powerful and flexible text for students and instructors alike.

The Four Point series is designed for English language learners whose primary goal is to succeed in an academic setting. The series covers the four academic skills of reading, writing, listening, and speaking while providing reinforcement and systematic recycling of key vocabulary and further exposure to grammar issues. In order to participate in academic settings, ELLs need focused activities to develop and then maintain their use of vocabulary and grammar. Each book in the series focuses heavily on vocabulary in particular, highlighting between 125-150 key vocabulary items including individual words, compound words, phrasal verbs, short phrases, idioms, metaphors, collocations, and longer set lexical phrases. Each unit in Reading-Writing 2, Advanced, includes two reading passages on the same topic within a field of academic study: Language, Sociology, Physiology, Geology, Economics, and Environmental Science. The exercises accompanying the readings are meant to strengthen a range of reading and writing skills like comprehending details, developing vocabulary, paraphrasing, summarizing, and synthesizing information. Students will read longer, more difficult readings on interesting academic topics that represent an array of classroom interests, and they will write both short and long assignments that can be organized around more traditional writing templates. By addressing the breadth and depth of reading and writing tasks required in academic settings instead of only reading for pleasure or writing for research projects, this volume truly prepares ELLs for the type of reading they will find in their course books and for the writing assignments they will receive in class. Interactive vocabulary activities are provided on the book's companion website.
