HAIDEN THOMAS

Immunization in Practice World Health Organization

Seorang demi seorang mangsa mati lemas di pantai perkelahan Port Dickson. Mayat mangsa tidak ditemui dan hilang ghaib begitu sahaja. Insiden ini membuatkan Inspektor Hadi keliru dan bingung memikirkan hal ini. Belum pernah terjadi insiden seperti ini. Inspektor Hadi telah meminta bantuan Imran, pengawal pantai yang bertugas di situ untuk menyiasat. Namun masih gagal mendapat apa-apa maklumat. Seorang wartawan bernama Jamal telah menulis cerita tentang insiden ini dan mengatakan yang mangsa bukan lemas tapi dipercayai dibaham buaya. Inspektor Hadi dan Imran tidak mempercayai cerita itu sehinggalah pada suatu hari abang ipar Imran, Darus mendapat kecederaan di kaki ketika berkelah di pantai itu. Kesan gigitan itu telah disahkan oleh Doktor Rayan yang mangsa digigit buaya. Mungkin buaya itu sesat dan masuk ke laut untuk mencari makanan. Berita itu telah menggemparkan penduduk di situ. Mereka tidak berani lagi keluar berkelah di hujung minggu dan ini membuat sektor pelancongan Port Dickson terjejas teruk. Benarkah pantai Port Dickson tercemar dengan buaya? Betul ke cerita yang ditulis Jamal atau hanya rekaan semata-mata? Tapi Doktor Rayan mengesahkan yang mangsa digigit buaya. Inspektor Hadi dan Imran Buntu memikirkan hal ini. Sama ada ia betul ataupun tidak, hanya akan terjawab dalam novel ini.

Most new psychology instructors enter their first undergraduate classrooms with little or no formal preparation for their role as a teacher. The goal of this book is to review the body of teaching research that is available as well as some of the well-accepted lore, so as to make the first foray into teaching psychology a positive experience. Teaching Psychology outlines the major problems and issues confronting psychology teachers. It presents an overview of the "nuts and bolts" of teaching psychology including dealing with troubled and troubling students, choosing and using technology, developing evaluation instruments, and selecting methods for self-evaluation. Written by two award-winning psychology professors with over 50 years of combined teaching experience, the book offers a wide range of down-to-earth suggestions and immediately usable materials intended to help psychology teachers teach better and help students learn more. The chapters are organized to roughly parallel the sequence of tasks that new psychology teachers face, beginning with goal setting and ending with evaluation of one's teaching. Each chapter is chockfull of helpful tools including checklists, sample lecture notes, writing assignments, and grading criteria. To make it

easier to customize this material, these tools are available on an accompanying CD along with a rating sheet for choosing a textbook, a student grade-record sheet, a sample statement on academic integrity and a pool of less-than-perfect test items to hone item-writing skills. This book offers guidelines for teaching such as: setting goals in line with 10 basic principles of effective teaching planning the basics including choosing a text, writing a syllabus, and creating a grading system setting a positive tone in the classroom providing tips on asking and answering questions, promoting critical thinking, and evaluating student performance. Intended for psychology graduate students who are learning to teach, faculty who train psychology instructors, and new psychology faculty at institutions ranging from high schools to universities, as well as experienced faculty wishing to hone their teaching skills.

Effective Meetings for Managers Sunway University Press

"Creativity and innovation are to events, what the heart and soul are to the living." The book aims at encouraging readers to capture the traits and develop skills for enhancing their creative and

innovative capabilities, cultivating the culture of creativity and innovation. Creativity is inventiveness with new ideas; critical thinking is generating and selecting ideas; and innovation turns creativity into products, processes and services. Creativity + Critical thinking + Innovation = Path of Desired Change The primary difference between creativity and innovation is that the former refers to conceiving a new idea while the latter involves converting that idea into a marketable commodity. Creativity and innovation are an attempt to gain a competitive advantage. Organizations are now focusing on enhancing their employees' creativity and not merely developing their technical competencies and skills. Undoubtedly, creativity is the most important human resource of all without which there would be no progress, and we would be forever repeating the same patterns. Innovation is at the heart of all successful companies.

What are emotions and why do we experience them? In the last 50 years or so, psychological science has shed light on the essence of what makes us human—why we experience a range of feelings from joy to sadness, anger to fear, and compassion to contempt. Yet, the science of emotion remains mostly inaccessible to the curious reader and those outside academic circles. This book is a story of our emotions; a story of why and how we feel as human beings. It is a tale of our emotions, told by philosophers, biologists, neuroscientists, sociologists, and economists. Drawing on the rich psychological research on emotions, this book invites you to revisit your emotions and to better appreciate and understand how feeling states define us and our humanity.

Enhancing Board Effectiveness John Wiley & Sons

"A delightfully original take on...the prospects for liberal democracy in the broader Islamic Middle East."—Matthew Kaminski, Wall Street Journal As the Arab Spring threatens to give way to authoritarianism in Egypt and reports from Afghanistan detail widespread violence against U.S. troops and women, news from the Muslim world raises the question: Is Islam incompatible with freedom? In *Islam without Extremes*, Turkish columnist Mustafa Akyol answers this question by revealing the little-understood roots of political Islam, which originally included both rationalist, flexible strains and more dogmatic, rigid ones. Though the rigid traditionalists won out, Akyol points to a flourishing of liberalism in the nineteenth-century Ottoman Empire and the unique "Islam-liberal synthesis" in present-day Turkey. As he powerfully asserts, only by accepting a secular state can Islamic societies thrive. *Islam without Extremes* offers a desperately needed intellectual basis for the reconcilability of Islam and liberty.
