*Explaining Crime and Its Context* Blackstone Press

The power of the modern prosecutor arises from several features of the criminal justice landscape: widespread use of law and order political rhetoric and heightened fear of crime among voters; legislatures' embrace of extreme sentencing ranges to respond to such concerns; and the uncertain or limited accountability of prosecutors to the electorate, the bar, or other political and professional constituencies. The convergence of these trends has transformed prosecution into an indispensable field of study. This volume brings together the work of leading international scholars across criminology, sociology, political science, and law - along with contributions from reform-minded practitioners - to examine a variety of issues in prosecutorial behaviour and the institutional structures that frame their behavior. The Handbook connects the dots among existing theoretical and empirical research related to prosecutors. Major sections of the volume cover (1) prosecutor performance during distinct phases of a criminal case, (2) the features of the prosecutor's environment, both inside the office and external to the office, that influence the choices of individual prosecutors and office leaders, and (3) prosecutorial strategies and priorities when dealing with specialized types of crimes, victims, and defendants. Taken together, the chapters in this volume identify the founding texts, discuss leading theoretical and methodological approaches, explain the scope of unresolved issues, and preview where this field is headed. The volume provides a bottom-up view of an important new scholarly field.

The post-Mao commitment to modernization, coupled with a general revulsion against the lawlessness of the Cultural Revolution, has led to a significant law reform movement in the People’s Republic of China. China’s current leadership seeks to restore order and morale, to attract domestic support and external assistance for its modernization program, and to provide a secure, orderly environment for economic development. It has taken a number of steps to strengthen its laws and judicial system, among which are the PRC’s first substantive and procedural criminal codes. This is the first book-length study of the most important area of Chinese law—the development, organization, and functioning of the criminal justice system in China today. It examines both the formal aspects of the criminal justice system—such as the court, the procuracy, lawyers, and criminal procedure—and the extrajudicial organs and sanctions that play important roles in the Chinese system. Based on published Chinese materials and

personal interviews, the book is essential reading for persons interested in human rights and laws in China, as well as for those concerned with China’s political system and economic development. The inclusion of selected documents and an extensive bibliography further enhance the value of the book.

The Oxford Handbook of Criminal Law reflects the continued transformation of criminal law into a global discipline, providing scholars with a comprehensive international resource, a common point of entry into cutting edge contemporary research and a snapshot of the state and scope of the field. To this end, the Handbook takes a broad approach to its subject matter, disciplinarily, geographically, and systematically. Its contributors include current and future research leaders representing a variety of legal systems, methodologies, areas of expertise, and research agendas. The Handbook is divided into four parts: Approaches & Methods (I), Systems & Methods (II), Aspects & Issues (III), and Contexts & Comparisons (IV). Part I includes essays exploring various methodological approaches to criminal law (such as criminology, feminist studies, and history). Part II provides an overview of systems or models of criminal law, laying the foundation for further inquiry into specific conceptions of criminal law as well as for comparative analysis (such as Islamic, Marxist, and military law). Part III covers the three aspects of the penal process: the definition of norms and principles of liability (substantive criminal law), along with a less detailed treatment of the imposition of norms (criminal procedure) and the infliction of sanctions (prison or corrections law). Contributors consider the basic topics traditionally addressed in scholarship on the general and special parts of the substantive criminal law (such as jurisdiction, mens rea, justifications, and excuses). Part IV places criminal law in context, both domestically and transnationally, by exploring the contrasts between criminal law and other species of law and state power and by investigating criminal law’s place in the projects of comparative law, transnational, and international law.
