American Military History provides the United States Army-in-particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

There are thousands of websites devoted to all aspects of military history from ancient Greece to the modern Gulf. This unique book helps you find the ones that will help with your research whether you are checking out a soldier ancestor or an airman or researching a naval campaign. It also features sites that are entertaining or controversial. Sections cover the British armed services and their long military history, but the author also describes in detail websites that focus on American and Canadian forces. A Guide to Military History on the Internet is a companion volume to Pen & Sword's best-selling *Tracing Your Army Ancestors* by the same author.

An Unofficial Guide To Army 2020 The Stationery Office

A career soldier, veteran of both World Wars, and British war hero remembers the campaigns he fought—and his worthy foes. Like most members of the professional military freemasonry, Field Marshal Sir William Slim came to admire “all the soldiers of different races who have fought with me and most of those who have fought against me.” Among the most likable of his enemies were the Wazirs of India’s Northwest Frontier. In 1920, Slim took

part in a retaliatory raid on an obscure village. It was an unusually easy victory over the canny Wazirs, whom the British took by surprise and escaped from with scant loss. Afterwards, in the casual frontier way, the British sent a message to the Wazirs, expressing surprise at the enemy’s unusually poor shooting. The Wazirs replied in courtly fashion that their rifles were Short Magazine Lee-Enfields captured in previous fights with the British, and that they had failed to sight the guns to accord with a new stock of ammunition. Now, having calculated the adjustment, they would be delighted to demonstrate their bull’s-eye accuracy any time the British wanted. “One cannot help feeling,” Slim says, “that the fellows who wrote that ought to be on our side.” Slim genuinely enjoyed his virtually blood-free skirmishes with such foes as the Turks, the Wazirs and the Italians in 1940 Ethiopia. “An attempt to depict the lives of ordinary men in and out of combat. The accounts are written with style, wit and exceptional humanity.”—Tom Hall

Book #7 in the popular Carrera military science fiction series. Carrera's held off his enemies coming by sea from the north, in the process dealing the naval and amphibious forces of the Zhong Empire a stinging defeat. The Zhong won't soon forget the blood-stained waters and the heaped up bodies on the shores of Balboa's Isla Real. Now, though, his adopted country of Balboa is under assault from the east, from the south, from the west, from the air, and from space. The Zhong, smarting from the butchery around the island, have bounced back and forced a lodgment east of the capital. Their lodgment is still a-building but when it is done Carrera can expect several hundred thousand brave and determined Zhong to show up on his barely defended flank. The Taurans, remembering their military roots, have assaulted Balboa from the south, taking half the area of, and cutting, the Transitway that joins Terra Nova's Mar Fusioso and her Shimmering Sea. In the process, they've cut off and besieged the second city of the country, Cristobal, trapping inside the city Carrera's Fourth Corps, and overrunning and capturing a large portion of Carrera's artillery train. West of Cristobal, the Taurans have created, almost from scratch, a series of small ports and airfields to support their siege. Inside the town, a sense of desperation is growing among the men and women of the Fourth Corps: Has their leader forgotten about or abandoned them? Meanwhile another Tauran Expeditionary force secures Balboa's eastern neighbor, Santa Josefina, as a base against them. In space, the United Earth Peace Fleet, under the Command of High Admiral Marguerite Wallenstein, keeps as low a profile as

possible, all the time spying and feeding intelligence to both Zhong and Tauran. It's beginning to look like the game is up for Balboa and Patricio Carrera. But Carrera's been planning this war for fifteen years. He certainly hopes his enemies think they're winning. At the publisher's request, this title is sold without DRM (Digital Rights Management). As WWI comes to a close a German general, an escaped prisoner of war, and the crew of an airship converge to effect THE ROMANOV RESCUE. Can there be a world without communism? Mankind's history is bound up in the fabric of fate, a strong cloth, tough and closely woven. It is the beginning of 1918, the last year of the greatest war in human history, to date. All the belligerents stagger on their feet. Starvation is an ever present reality, while disease waits in the wings. In Russia, no longer a belligerent but, instead, rapidly descending into civil war and chaos, a lone family—Father, Mother, four beautiful young girls, and a brave but sickly boy—await their own fate, shivering and hungry in the dark, hoping and praying for salvation. Their relatives in England have turned their backs. The guards set over them do little but torment them. They look Heavenward, but God doesn't answer. They know they're a threat to the new regime, a threat that will, in time, be eliminated. But even the strongest fabric has flaws. An escaped prisoner of war, caught, injured, and punished, but still highly capable, might be one. An airship, returned and at loose ends after a failed mission to Africa might be another. A German general, taking a wrong turn on his nightly walk and suddenly coming face to face with the reality of the monster rising in the east, would be a third. Follow, then, as the general gives the orders, the prisoner of war raises the men from among his fellows, and the airship launches itself forward, to contest fate, to tear the fabric of time, and to effect The Romanov Rescue. And, with this help of his second wife, he has thwarted an attempted coup that would have restored the rule of the oligarchy and undone his hard-won victory. But his fight is not over yet... The problem of the Tauran Union's control of the Transitway between Terra Nova and Earth remains, as does the problem of the nuclear armed United Earth Peace Fleet, orbiting above the planet. The Taurans will not leave, and the Balboans^{3/4}a proud people, with much recent success in war - will not tolerate that they should remain. And yet, with one hundred times the population and three or four hundred times the wealth, the Tauran Union outclasses little Balboa in almost every way, even without the support of Old Earth. Sadly, they have that support. Everything, everyone, will have to be used to finish the job of freeing the country and, if possible, the planet. The children must fight. The old must serve, too. #2 in the breakthrough Countdown modern-day military adventure series. Brutally effective retired Army colonel Wes Stauer commands a crack outfit of former comrades to pull off a miracle mission. But Stauer must also harness and direct the brute within himself – a beast he will need in order to destroy an intelligent enemy who is as implacable as Stauer himself. War is brutal. Colonel Wes Stauer gets it. He ought to. He was once one of war's most brutal practitioners – not to mention one of its most effective and least bloody. Brutal yes; stupid no. Now, not only must Stauer command his crack outfit of former comrades and pull off yet another miracle mission, he must also harness and direct the brute within himself – a beast he will need in order to destroy an intelligent enemy who is as implacable as Stauer himself. Okay, almost as implacable. There will be war. And there will be warriors like Wes Stauer who have the know-how and, once set in motion, the unstoppable professional drive, to see the bad guys to their graves and destroy every last earthly piece of their nasty legacies. Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. How do people change from conception to death? What patterns can we recognize in human behavior related to biological age, psychological age, and social age norms? Why do people react to the same stressful situation in different ways? How can social workers help reduce risk and increase protective factors during various life stages? The Third Edition of this powerful text aims to examine the human life course in nine age-graded periods, which include: 1) conception, pregnancy, and childbirth 2) infancy and toddlerhood 3) early childhood 4) middle childhood 5) adolescence 6) young adulthood 7) middle adulthood 8) late adulthood and 9) very late adulthood. By examining each of these periods, the life course perspective can be understood as ever changing and marked by predictable and unpredictable twists and turns, which ultimately contribute to a unique life journey.

Ethics and Global Security The Unofficial Guide to the Military Memorial Ceremony

Very little has survived officially to instruct units and chaplain's on how to conduct a memorial ceremony. Retired Army chaplain Richard Sones passes on his knowledge and wisdom in this handbook for the occasion. The goal of this guide is to offer a resource for chaplains and others who may be responsible for a military memorial ceremony. It answers the "where do I stand?", "what is the process?" questions, not from the approach that says this is the way it must be done, but as a body of possibilities gained from nearly thirty years' experience as a military chaplain. It is detailed enough that a separate company in combat without access to a chaplain can perform a decent memorial ceremony. It is written with the goal of instructing, motivating, and encouraging those who find themselves in the unenviable position of having to conduct a memorial ceremony in order that they will produce a work of art worthy of the price paid by the soldier they endeavor to honor. Sample messages from actual military memorial ceremonies are included at the end of the guide. As such, the guide would also be useful to local church pastors who are called upon to perform a funeral service for one of America's fallen warriors.

LBJ aims to expose Vice President Johnson's active role in the assassination of President Kennedy and how he began planning his takeover of the U.S. presidency even before being named the vice presidential nominee in 1960. Lyndon B. Johnson's flawed personality and character traits were formed when he was a child, and grew unchecked for the rest of his life as he suffered severe bouts of manic depression and bipolar disorder. He successfully hid this disorder from the public as he bartered, stole, and finessed his way through the corridors of power on Capitol Hill—though records have been uncovered proving some of his aides knew of his mental illness. Phillip F. Nelson, after years of researching Johnson and the JFK assassination, concludes that during his vice presidency Johnson suffered progressively stronger bouts of mental collapse as he was busy undermining Kennedy's domestic and foreign policy initiatives for the purpose of cunningly saving them for his own legacy. His involvement with JFK's assassination is conclusively drawn with both text and photographic evidence showing Johnson's knowledge of when and where the assassination would take place. Nelson's careful and meticulous research has led him to

uncover secrets from one of the greatest unsolved mysteries in our country's history.

Military Review

This book will be the first systematic examination of the role that ethics plays in international security in both theory and practice, and offers the reader a concrete ethics for global security.

Questions of morality and ethics have long been central to global security, from the death camps, world wars and H-bombs of the 20th century, to the humanitarian missions, tsunamis, terrorism and refugees of the 21st. This book goes beyond the Just War tradition to demonstrate how ethical commitments influence security theory, policy and international law, across a range of pressing global challenges. The book highlights how, from

patrolling a territorial border to maintaining armed forces, security practices have important ethical implications, by excluding some from consideration, presenting others as potential threats and exposing them to harm, and licensing particular actions. While many scholars and practitioners of security claim little interest in ethics, ethics clearly has an interest in them. This innovative book extends the traditional agenda of war and peace to consider the ethics of force short of war such as sanctions, deterrence, terrorism, targeted killing, and torture, and the ethical implications of new security concerns such as identity, gender, humanitarianism, the responsibility to protect, and the global ecology. It advances a concrete ethics for an era of global threats, and makes a case for a cosmopolitan approach to the theory and practice of security that could inspire a more just, stable and inclusive global order. This book fills an important gap in the literature and will be of much interest to students of ethics, security studies and international relations.
